PART 1 – THE SCHEDULE

SECTION B

SUPPLIES OR SERVICES AND PRICES/COSTS

B.1 COST-PLUS AWARD FEE/FIXED PRICED INDEFINITE DELIVERY/INDEFINITE QUANTITY

The contractor shall provide Kennedy Integrated Communication Services (KICS) in accordance with Attachment J-1, Performance Work Statement under a cost-plus award fee/fixed price indefinite delivery/indefinite quantity type arrangement. The estimated cost and award fee is set forth in Table B-1A below.

Contract Line Item (CLIN)	Description	Total Cost No Fee
0001	Phase In Period 1st Quarter FY04	$0

Table B-1A	Estimated Cost and Fee			
CLIN	Description	Estimated Cost	Award Fee	Total Cost Plus Award Fee
0002	Basic Requirements (Cost Reimbursable) 1/1/04 - 9/30/08 in accordance with Performance Work Statement Section J-1	$143,116,760	$8,587,006	$151,703,765

A government fiscal year breakdown of the cost and fee summarized in Table B-1A above is provided in Tables B-1B.

Table B-1B	Breakdown of Basic Period Cost and Fee			
Contract Line Item No. (CLIN)	**Description**	**Estimated Cost**	**Award Fee**	**Total Cost Plus Award Fee Total**
0002	Basic Requirements			
	1/1/04 – 9/30/04	$22,034,078	$1,322,045	$23,356,123
	10/1/04 – 9/30/05	30,611,118	1,836,667	32,447,785
	10/1/05 – 9/30/06	30,072,766	1,804,366	31,887,132
	10/1/06 – 9/30/07	30,041,965	1,802,518	31,844,483
	10/1/07 – 9/30/08	30,356,833	1,821,410	32,178,243

B.2 INDEFINITE DELIVERY/INDEFINITE QUANTITY ITEMS

The government may order Indefinite Delivery/Indefinite Quantity (ID/IQ) services at any time after contract start, in accordance with the procedures set forth in Section I of this contract. The contractor shall provide engineering and technical skills in support of analyses and new technology development projects for non-manifested future programs and initiatives. The government will define the overall requirements of each order, including intermediate and final deliverable end items, and decide the respective responsibilities of each organization participating in the effort.

The contractor shall utilize the fully burdened, fixed-price rates shown in Attachment J- 6 for pricing task orders. The contractor shall only accept task orders/delivery orders issued by the contracting officer.

CLIN	Description	
0003	Indefinite Delivery/Indefinite (ID/IQ) Quantity Catalog of Specialized Services - Firm Fixed Price	See Attachment J-6 (a)
0004	Catalog of Products & Services - Administrative Telephones	See Attachment J-6 (b)
0005	Catalog of Products & Services - DOD Technical Multi-Media Support	See Attachment J-6 (c)
0006	Catalog of Products & Services - DOD Technical Multi-Media Support - Additional Products	See Attachment J-6 (d)

B.3 AWARD FEE

The amount of fee earned by the contractor under CLIN 0002 shall be determined in accordance with Attachment J.4, Award Fee Evaluation Plan.

The amount of available and earned fee, by evaluation period, is provided in Table B-3 below:

Table B-3	Available and Earned Fee					
CLIN 0002	**Evaluation Periods**	**Available Fee**	**Earned Fee**	**Score**	**Rating**	**Fee Mod No.**
1	1/1/04 - 3/31/04					
2	4/1/04 - 9/30/04					
3	10/1/04 - 3/31/05					
4	4/1/05 - 9/30/05					
5	10/1/05 - 3/31/06					
6	4/1/06 - 9/30/06					
7	10/1/06 - 3/31/07					
8	4/1/07 - 9/30/07					
9	10/1/07 - 3/31/08					
10	4/1/08 - 9/30/08					

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

For purposes of payment of cost, and fees in accordance with the Limitation of Funds clause, the total amounts allotted by the Government to this contract and the period of performance through which it is estimated these funds will cover are specified in Table B-4. Also included in this table is the total amount obligated under this contract for payment of fee. These allotments are applicable to the basic KICS services provided in CLIN 0002 and are considered adequate to reimburse the contractor's performance through the dates shown in the table.

Table B.4 Contract Funding

AS OF MOD #	CONTRACT VALUE	COST	FEE	TOTAL COST AND FEE	ADEQUATE THROUGH
BASIC	$151,703,765	$29,522.00	$ 0	$29,522.00	3/31/04
001	$	$	$	$	
002	$	$	$	$	
003	$	$	$	$	
004	$	$	$	$	
005	$	$	$	$	
006	$	$	$	$	
007	$	$	$	$	
008	$	$	$	$	

B.5 SPECIAL COST PROVISIONS (KSC 52.231-90) (DEC 2000)

Pursuant to the terms of the contract FAR clause 52.216-7 entitled "Allowable Cost and Payment", the contractor shall be reimbursed for such actual and allowable expenditures incurred in the performance of work required by this contract as may be approved by the Contracting Officer, subject to the following limitations and provisions:

(a) TRAVEL

Pursuant to Title 11, Section 21 of the Federal Civilian Employee and Contractor Travel Expense Act of 1985 (PL 99-234), reimbursement for travel shall be in accordance with the provisions of FAR 31.205-46. Travel required in performance of work under this contract shall be in accordance with the Contractor's approved travel policy.

(b) PROVISIONAL INDIRECT BILLING RATES

Provisional billing rates for indirect cost pools shall be set at the discretion of the Contracting Officer based upon proposals from the contractor and following review by Government auditors. These provisional billing rates shall be specified in writing and may be revised either retroactively or prospectively by the Contracting Officer. Prior to each Contractor fiscal year, the Contractor shall submit a proposal for the coming year's provisional billing rates. If during the course of any particular year a significant disparity should arise between the approved provisional billing rates and the actual rates, the Contractor shall submit a proposal requesting consideration for revision of the provisional rates to ones more closely reflective of the actual rates anticipated of the year. After expiration of each of its fiscal years the Contractor shall adjust its billings to the estimated actual rates.

To prevent substantial over or under payment, the provisional billing rates may, at the discretion of the Contracting Officer, be revised, either retroactively or prospectively, and such revision shall be set forth in a modification to this contract.

(c) RELOCATION COSTS

Reimbursement for relocation costs shall be in accordance with the provisions of FAR 31.205-35. No relocation costs will be reimbursable under this contract for employees whose residence at the time of hiring or assignment to this contract was within a fifty (50) mile radius of Kennedy Space Center, Florida. In no event shall the average reimbursement for relocation costs exceed the following ceiling:

$10,000

(d) HOUSEHOLD GOODS SHIPMENTS

1. Movement of household goods and personal effects of contractor employees, when the total transportation costs are to be reimbursed by the government, shall be made by carriers furnishing reduced rates under 49 U.S.C. § 107.21, when such rates are available. The Transportation Office, TA-E1, Kennedy Space Center, Florida, telephone number (321) 867-4105, will provide the contractor with applicable

instructions for household goods movement and such other support or guidance that is requested.

2. The contractor shall furnish the Chief, Propellants, Logistics, and Services Branch, TA-E1, Kennedy Space Center, Florida, with advanced information of any planned mass movement of personnel (10 or more families) thirty (30) or more days prior to the start of any major relocations in order to provide the government with sufficient time for rate negotiation action.

3. Carriers bill of lading and related shipping documents will be annotated with the following statement:

"All transportation and services hereunder are for the National Aeronautics and Space Administration and the actual total transportation, accessorial and valuation charges paid to the carrier by the consignor or consignee are to be reimbursed by the U. S. Government, pursuant to the cost reimbursable Contract No. NAS10-02007. This may be confirmed by contacting such agency at (321) 867-2860. The undersigned, party to the above contract, is aware that a false statement submitted to the carrier for the purpose of receiving such reduced rates is a criminal offense under the Interstate Commerce Act.

_____
Name of Company

BY:_____
(Company Official - Title)

4. Copies of all carriers' bills of lading will be available for review by the government on movements of household goods and personal effects that are the result of the relocation of the contractor employees when the total transportation costs are to be reimbursed by the government. Requests for deviations from the procedures established by this clause should be in writing and addressed to the Contracting Officer. Such requests must be made prior to the proposed move and in sufficient time for the Contracting Officer to make a decision.

5. Failure to comply with the provisions of this clause may result in the disallowance of costs, which are in excess of those that would have resulted from utilization of reduced rates obtainable under the provisions of this clause.

(e) SEVERANCE PAY

Reimbursement for severance pay shall be in accordance with the provisions of FAR 31.205-6(g). However, in no event shall the government reimburse the contractor for the cost of severance pay for any individual contractor employee who voluntarily elects to work for a succeeding contractor. This provision shall apply to any contract extension hereof.

(f) PENSION PROGRAM REQUIREMENTS

Pursuant to NFS 1852.237-71, Pension Portability, included in full text in Section H of this contract, a clear description of the portable pension plan, including service, pay, liabilities, vesting, termination, and benefits from prior contracts will be inserted in this contract after award as a separate attachment in Section J.

(g) FRINGE BENEFITS

The contractor shall inform the contracting officer of all proposed changes in fringe benefits which may result in an increased cost to the contract as soon as practicable, but in any event, prior to such changes being implemented. Fringe benefits include, but are not limited to, such items as health insurance, life insurance, pension plans, retiree health care, savings plans, bonus plans, education assistance, and leave policies. Failure to comply with the terms of this clause may result in the disallowance of costs.

(h) TRANSFER OF ACCRUED BENEFITS

The contractor will accept transfer of accrued sick leave hours and recognize the sick leave and vacation leave accrual rates of incumbent personnel hired from the predecessor contract NAS-9-98100, provided the employee had no break in service from the predecessor contract exceeding 60 days. The costs of the transferred sick leave hours will not be paid under this contract unless and until they are used.

[END OF SECTION]

SECTION C

DESCRIPTION/SPECIFICATION/WORK STATEMENT

C.1 SCOPE OF WORK (KSC 52.210-90) (FEB 1990)

The Contractor shall provide personnel, materials, and facilities (except as otherwise provided for in this contract) necessary to perform those functions set forth in Attachment J, entitled "Performance Work Statement for Kennedy Integrated Communication Services", and included in Section J.

C.2 DATA REQUIREMENTS LIST (DRL)

The contractor shall furnish all data identified and described in Attachment J-1, Appendix 1, "Data Requirements List (DRL) and Data Requirements Description (DRD) Documents."

The government reserves the right to reasonably defer the date of delivery of any or all line items of data specified in the DRL. Such right may be exercised at no increase in the contract value. The government also reserves the right to terminate the requirement for any or all line items of data specified in the DRL. In the event the government exercises this latter right, the contract value shall be subject to equitable adjustment in accordance with the Changes Clause.

To the extent that data required to be furnished by other provisions of this contract are also identified and described in the DRL, or supplemental DRLs, and in the DRDs references in such DRL(s), compliance with the DRL shall be accepted as compliance with such other provisions. In the event of conflict between the identity and description of data called for by specific provisions of this contract and the DRL or DRDs, the DRL and DRDs shall control the data to be furnished.

Nothing contained in this DRL provision shall relieve the contractor from furnishing data not identified and described in the DRL attachment but called for by, or under the authority of, other provisions or as specified elsewhere in this contract. Except as otherwise provided in this contract, the cost of data to be furnished in response to the DRL attached to this or data to be delivered under the authority of other sections (clauses/statement of work) are included in the price of this contract.

(End Of Clause)

G.2 AWARD FEE FOR SERVICE CONTRACTS (NFS 1852.216-76) (JUN 2000)

(a) The contractor can earn award fee from a minimum of zero dollars to the maximum stated in NASA FAR Supplement clause 1852.216-85, "Estimated Cost and Award Fee" in this contract.

(b) Beginning 6 months after the effective date of this contract, the government shall evaluate the Contractor's performance every 6 months to determine the amount of award fee earned by the contractor during the period. The Contractor may submit a self-evaluation of performance for each evaluation period under consideration. These self-evaluations will be considered by the Government in its evaluation. The Government's Fee Determination Official (FDO) will

determine the award fee amounts based on the Contractor's performance in accordance with Attachment J-4. The plan may be revised unilaterally by the Government prior to the beginning of any rating period to redirect emphasis.

(c) The Government will advise the Contractor in writing of the evaluation results. The John F. Kennedy Space Center, General Accounting A/P, GG-B-C2 will make payment based on issuance of unilateral modification by Contracting Officer

(d) After 85 percent of the potential award fee has been paid, the Contracting Officer may direct the withholding of further payment of award fee until a reserve is set aside in an amount that the Contracting Officer considers necessary to protect the Government's interest. This reserve shall not exceed 15 percent of the total potential award fee.

(e) The amount of award fee which can be awarded in each evaluation period is limited to the amounts set forth at B.3. Award fee which is not earned in an evaluation period cannot be reallocated to future evaluation periods.

(f)(1)Provisional award fee payments will be made under this contract pending the determination of the amount of fee earned for an evaluation period. If applicable, provisional award fee payments will be made to the Contractor on a monthly basis. The total amount of award fee available in an evaluation period that will be provisionally paid is the lesser of 80 percent or the prior period's evaluation score.

(2) Provisional award fee payments will be superseded by the final award fee evaluation for that period. If provisional payments exceed the final evaluation score, the Contractor will either credit the next payment voucher for the amount of such overpayment or refund the difference to the Government, as directed by the Contracting Officer.

(3) If the Contracting Officer determines that the Contractor will not achieve a level of performance commensurate with the provisional rate, payment of provisional award fee will be discontinued or reduced in such amounts as the Contracting Officer deems appropriate. The Contracting Officer will notify the Contractor in writing if it is determined that such discontinuance or reduction is appropriate.

(4) Provisional award fee payments will be made prior to the first award fee determination by the Government.

(g) Award fee determinations are unilateral decisions made solely at the discretion of the Government.

(End of clause)

G.3 SUBMISSION OF VOUCHERS FOR PAYMENT (NFS 1852.216-87)(MAR 1998)

(a) The designated billing office for cost vouchers for purposes of the Prompt Payment clause of this contract is indicated below. Public vouchers for payment of costs shall include a reference to the number of this contract.

(b)(1)If the contractor is authorized to submit interim cost vouchers directly to the NASA paying office, the original voucher should be submitted to:

John F. Kennedy Space Center, NASA
General Accounting/Accounts Payable Office
GG-B-C2
Kennedy Space Center, FL 32899

(2) For any period that the Defense Contract Audit Agency (DCAA) has authorized the Contractor to submit interim vouchers directly to the Government paying office, interim vouchers are not required to be sent to the Auditor, and are considered to be provisionally approved for payment, subject to final audit.

(3) Copies of vouchers should be submitted as directed by the Contracting Officer.

(c) If the contractor is not authorized to submit interim cost vouchers directly to the paying office as described in paragraph (b), the contractor shall prepare and submit vouchers as follows:

(1) One original Standard Form (SF) 1034, SF 1035, or equivalent Contractor's attachment to the cognizant DCAA office

(Mailing address to be provided at time of contract award)

(2) Five copies of SF 1034A, SF 1035A, or equivalent Contractor's attachment to the following offices by insertion in the memorandum block of their names and addressees:

(i) Copy 1 - NASA Contracting Officer

(ii) Copy 2 - DCAA Auditor

(iii) Copy 3 - Contractor

(iv) Copy 4 - Contract Administration Office, if delegated

(v) Copy 5 - Project management office

(3) The Contracting Officer may designate other recipients as required.

(d) Public vouchers for payment of fee shall be prepared similarly to the procedures in paragraphs (b) or (c) of this clause, whichever is applicable, and be forwarded to:

John F. Kennedy Space Center, FL
Attn: Contracting Officer

Mail Code OP-MS
Kennedy Space Center, FL 32899

This is the designated billing office for fee vouchers for purposes of the Prompt Payment clause of this contract.

(e) In the event that amounts are withheld from payment in accordance with provisions of this contract, a separate voucher for the amount withheld will be required before payment for that amount may be made.

(f) For KSC Administrative Telephone System monthly invoicing and payment purposes, the following guidelines shall apply: Seat and service level services installed or in effect by the 15th day of the month will be invoiced for the whole month. Seat and service level services cancelled on or before the 15th day of the month will not be invoiced for that month. Seat and service level services installed or in effect after the 15th of the month will not be invoiced for that month but will be invoiced beginning with the next month. The minimum invoice period for a Seat is one month.

G.4 SUBMISSION OF INVOICES FOR DOD REQUIREMENTS

A. The contractor shall submit one copy of each invoice to the DOD Program Manager (PM) designated by the Contracting Officer. Each invoice submitted by the contractor under this contract for DOD technical multi-media support shall cite the date, contract number, delivery order number, contract line item (CLIN) and applicable subCLIN(S), item description, and price per subCLIN, with a total amount due. Invoice shall designate whether it is an interim or final invoice, and show breakout by subCLIN of the obligated amount, less previous invoices, and the amount of remaining funds available for payment of this delivery order.
B. All invoices for additional services and products against issued delivery orders shall be accompanied with a summary breakdown. This summary shall cite that delivery order number, applicable invoice number, items ordered against this billing, quantity, price, names and phone numbers of requestor and receiver, and date of performance and delivery.
C. The contractor may only bill for launch packages upon completion. Incremental billing against a launch package is disallowed.
D. Final billing shall be submitted 30 days after final delivery. Additional orders placed after that time shall be considered a separate work order using established commercial billing methods.

G.5 DESIGNATION OF NEW TECHNOLOGY REPRESENTATIVE AND PATENT REPRESENTATIVE (NFS 1852.227-72) (JULY 1997)

(a) For purposes of administration of the clause of this contract entitled "New Technology" or "Patent Rights--Retention by the Contractor (Short Form)," whichever is included, the following named representatives are hereby designated by the Contracting Officer to administer such clause:

Title	Office Code	Address
New Technology Representative	YA-C1	John F. Kennedy Space Center, NASA Attn: David Makufka Technology Transfer Officer YA-C1 Kennedy Space Center, FL 32899
Patent Representative	CC-A	John F. Kennedy Space Center, NASA Attn: Randall Heald Patent Counsel CC-A Kennedy Space Center, FL 32899

(b) Reports of reportable items, and disclosure of subject inventions, interim reports, final reports, utilization reports, and other reports required by the clause, as well as any correspondence with respect to such matters, should be directed to the New Technology Representative unless transmitted in response to correspondence or request from the Patent Representative. Inquiries or requests regarding disposition of rights, election of rights, or related matters should be directed to the Patent Representative. This clause shall be included in any subcontract hereunder requiring a "New Technology" clause or "Patent Rights--Retention by the Contractor (Short Form)" clause, unless otherwise authorized or directed by the Contracting Officer. The respective responsibilities and authorities of the above-named representatives are set forth in 1827.305-370 of the NASA FAR Supplement.

G.6 CONTRACTOR REQUESTS FOR GOVERNMENT-OWNED EQUIPMENT (1852.245-70) (JULY 1997)

(a) **"Equipment,"** as used in this clause, means commercially available items capable of stand-alone use, including those to be acquired for incorporation into special test equipment or special tooling.

(b)(1) Upon determination of need for any Government-owned equipment item for performance of this contract, the contractor shall provide to the contracting officer a written request justifying the need for the equipment and the reasons why contractor-owned property cannot be used, citing the applicable FAR or contract authority for use of Government-owned equipment. Equipment being acquired as a deliverable end item listed in the contract or as a component for incorporation into a deliverable end item listed in the contract is exempt from this requirement.

(2) The contractor's request shall include a description of the item in sufficient detail to enable the Government to screen its inventories for available equipment or to purchase equipment. For this purpose, the contractor shall (i) prepare a separate DD Form 1419, DOD Industrial Plant Equipment Requisition, or equivalent format, for each item requested and (ii) forward it through the contracting officer to the Industrial Property Officer at the cognizant NASA installation at

least 30 days in advance of the date the contractor intends to acquire the item. Multiple units of identical items may be requested on a single form. Instructions for preparing the DD Form 1419 are contained in NASA FAR Supplement 1845.7102. If a certificate of non-availability is not received within that period, the contractor may proceed to acquire the item, subject to having obtained contracting officer consent, if required, and having complied with any other applicable provisions of this contract.

(c) Contractors who are authorized to conduct their own screening using the NASA Equipment Management System (NEMS) and other Government sources of excess property shall provide the evidence of screening results with their request for contracting officer consent. Requests to purchase based on unsuitability of items found shall include rationale for the determined unsuitability.

(End of clause)

G.7 INSTALLATION-ACCOUNTABLE GOVERNMENT PROPERTY (NFS 1852.245-71) (JUNE 1998)

a) The Government property described in the clause at 1852.245-77, List of Installation-Accountable Property and Services, shall be made available to the Contractor on a no-charge basis for use in performance of this contract. This property shall be utilized only within the physical confines of the NASA installation that provided the property. Under this clause, the Government retains accountability for, and title to, the property, and the Contractor assumes the following user responsibilities:

The Contractor shall assume the responsibilities as custodian / user as defined in the current edition of NPG 4200.1, NASA Equipment Management Manual and NPG 4200.2, Equipment Management Manual for Property Custodians.

The contractor shall establish and adhere to a system of written procedures for compliance with these user responsibilities. Such procedures must include holding employees liable, when appropriate, for loss, damage, or destruction of Government property.

(b)(1) The official accountable record keeping, physical inventory, financial control, and reporting of the property subject to this clause shall be retained by the Government and accomplished by the installation Supply and Equipment Management Officer (SEMO) and Financial Management Officer. If this contract provides for the contractor to acquire property, title to which will vest in the Government, the following additional procedures apply:

(i) The contractor's purchase order shall require the vendor to deliver the property to the installation central receiving area;

(ii) The contractor shall furnish a copy of each purchase order, prior to delivery by the vendor, to the installation central receiving area:

(iii) The contractor shall establish a record of the property as required by FAR 45.5 and 1845.5 and furnish to the Industrial Property Officer a DD Form 1149 Requisition and Invoice/Shipping

Document (or installation equivalent) to transfer accountability to the Government within 5 working days after receipt of the property by the contractor. The contractor is accountable for all contractor-acquired property until the property is transferred to the Government's accountability.

(iv) Contractor use of Government property at an off-site location and off-site subcontractor use require advance approval of the contracting officer and notification of the SEMO. The contractor shall assume accountability and financial reporting responsibility for such property. The contractor shall establish records and property control procedures and maintain the property in accordance with the requirements of FAR Part 45.5 until its return to the installation.

(2) After transfer of accountability to the Government, the contractor shall continue to maintain such internal records as are necessary to execute the user responsibilities identified in paragraph (a) and document the acquisition, billing, and disposition of the property. These records and supporting documentation shall be made available, upon request, to the SEMO and any other authorized representatives of the contracting officer.

ALTERNATE I
(MARCH 1989)

(3) The contractor shall not utilize the installation's central receiving facility for receipt of Contractor-acquired property. However, the Contractor shall provide listings suitable for establishing accountable records of all such property received, on a quarterly basis, to the Contracting Officer and the Supply and Equipment Management Officer

G.8 FINANCIAL REPORTING OF NASA PROPERTY IN THE CUSTODY OF CONTRACTORS (1852.245-73) (AUGUST 2001)

(a) The Contractor shall submit annually a NASA Form (NF) 1018, NASA Property in the Custody of Contractors, in accordance with the provisions of 1845.505-14, the instructions on the form, subpart 1845.71, and any supplemental instructions for the current reporting period issued by NASA.

(b)(1) Subcontractor use of NF 1018 is not required by this clause; however, the Contractor shall include data on property in the possession of subcontractors in the annual NF 1018.

(2) The Contractor shall mail the original signed NF 1018 directly to the cognizant NASA Center Deputy Chief Financial Officer, Finance, unless the Contractor uses the NF 1018 Electronic Submission System (NESS) for report preparation and submission.

(c) The annual reporting period shall be from October 1 of each year through September 30 of the following year. The report shall be submitted in time to be received by October 31. The information contained in these reports is entered into the NASA accounting system to reflect current asset values for agency financial statement purposes. Therefore, it is essential that required reports be received no later than October 31. The Contracting Officer may, in NASA's interest, withhold payment until a reserve not exceeding $25,000 or 5 percent of the amount of the contract, whichever is less, has been set aside, if the Contractor fails to submit annual NF 1018 reports in accordance with 1845.505-14 and any supplemental instructions

for the current reporting period issued by NASA. Such reserve shall be withheld until the Contracting Officer has determined that the required reports have been received by NASA. The withholding of any amount or the subsequent payment thereof shall not be construed as a waiver of any Government right.

(d) A final report shall be submitted within 30 days after disposition of all property subject to reporting when the contract performance period is complete in accordance with (b)(1) through (3) of this clause.

(End of clause)

G.9 CONTRACTOR ACCOUNTABLE ON-SITE GOVERNMENT PROPERTY (1852.245-74) (MARCH 1989) (APPROVED DEVIATION)

(a) In performance of work under this contract, certain Government property identified in the contract shall be provided to the Contractor on a no-charge-for-use basis by the installation's Supply and Equipment Management Officer. That property shall be utilized in the performance of this contract at the installation that provided the property or at such other installations or locations as may be specified elsewhere in this contract. The Contractor assumes accountability and user responsibilities for the property.

(b) Government property provided shall in every respect be subject to the provisions of the FAR 52.245 Government property clause of this contract. In addition, the contractor is responsible for managing this property in accordance with the guidelines provided by the installation's Supply and Equipment Management Officer or any other formally designated representatives of the Contracting Officer. The guidelines include but are not limited to requiring the Contractor to--

(1) (Deleted by Deviation);

(2) Utilize the Federal Cataloging System;

(3) Comply with shelf-life requirements;

(4) (Deleted by Deviation);

(5) (Deleted by Deviation);

(6) (Deleted by Deviation);

(7) Conduct walk-through utilization inspections;

(8) (Deleted by Deviation);

(9) (Deleted by Deviation); and

(10) Use Government sources as the first source of supply.

(c) Data requirements relating to the guidelines in paragraph (b) of this clause are specified under Section F, Deliveries or performance.

(End of clause)

G.10 LIST OF GOVERNMENT-FURNISHED PROPERTY (NASA 1852.245-76) (OCT 1988)

For performance of work under this contract, the Government will make available Government property identified below or in Attachment J-1, Appendix 5 of this contract on a no-charge-for-use basis. The Contractor shall use this property in the performance of this contract at Kennedy Space Center, FL and at other location(s) as may be approved by the Contracting Officer. Under the FAR 52.245 Government Property clause of this contract, the Contractor is accountable for the identified property.

DATE TO BE FURNISHED	ITEM	QUANTITY	ACQUISITION COST TO THE CONTRACTOR

See Attachment J-1, Appendix 5

(End-Of-Clause)

G.11 LIST OF INSTALLATION-PROVIDED PROPERTY AND SERVICES (NFS 1852.245-77) (JULY 1997)(MODIFIED)

In accordance with the clause at 1852.245-71, Installation-Accountable Government Property, the Contractor is authorized use of the types of property and services listed below, to the extent they are available, in the performance of this contract within the physical borders of the installation, including CCAFS and all other locations referenced in the PWS, which may include buildings and space owned or directly leased by NASA in close proximity to the installation, if so designated by the Contracting Officer. The Contracting Officer may designate additional sites.

(a) Office space, work area space. Government telephones are available for official purposes only; pay telephones are available for contractor employees for unofficial calls.

(b) Non-controlled general- and special-purpose equipment, including office furniture.

(1) Equipment to be made available is listed in Section J, Appendix 5. The Government retains accountability for this property under the clause at 1852.245-71, Installation-Accountable Government Property, regardless of its authorized location.

(2) The Contractor shall not bring to the installation for use under this contract any property owned or leased by the Contractor, or other property that the Contractor is accountable for under any other Government contract, without the Contracting Officer's prior written approval.

(c) Publications and blank forms stocked by the installation.

(d) Life Safety and Fire Protection Engineering and surveys for Contractor personnel and facilities.

(e) Medical treatment of a first-aid nature for Contractor personnel injuries or illnesses sustained during on-site duty. Utilization of the Occupation Health Facilities for employee physicals to comply with required work related certifications.

(f) Cafeteria privileges for Contractor employees during normal operating hours.

(g) Building maintenance for facilities occupied by Contractor personnel.

(h) Moving and hauling for office moves, movement of material and equipment that cannot be safely transported by KICS transportation. Moving services shall be provided on-site, as approved by the Contracting Officer.

(i) Supply support and services as specified in KHB 4000.1, entitled "Supply Support System Manual"

(j) Administrative Desktop Computer Seats - Administrative Desktop Computer Services are limited to that subset of generic office type computers including equipment physically connected to those computers such as personal printers, personal scanners, commercial digital cameras, and barcode readers. The Offeror may utilize the Outsourcing Desktop Initiative for NASA (ODIN) contract as a means of acquiring administrative desktop computing services. Additional information regarding the ODIN Master Contract and KSC ODIN Delivery Order can be found at the following web-sites: http://www.odin.nasa.gov/ and http://osfodin.ksc.nasa.gov/KSCInitialDO2.html.

(k) Mail services

(l) Printing/Micro-imaging at Central KSC Print Shop.

(m) Library reference and loan materials.

(n) Janitorial services for offices, corridors, restrooms, conference rooms, stairwells, lobbies, break rooms, and food service areas.

(o) Bus service between major areas.

(p) Specialized vehicle maintenance TV vans, audio vans, cable trucks, splicing trailers forklifts, generators, air dryers and purge system connections.

(q) Training courses or successors listed in Figures 8-1 and 8-2.

(r) Packing, crating, shipping including TAL site shipping.
(s) Rigging, high lift and heavy lift support

(t) Non-destructive evaluation radiography.

(u) Security including TAL site security.

(v) Delivery of fuel for trucks and generators in the field.

(w) Documentation release authority for NASA, KSC and 45th Space Wing

(x) Environmental support including blood level testing, gas testing after initial contractor evaluation of manholes, asbestos testing and containment.

(y) Proofloading

(z) Hazardous Waste Management including hazardous and controlled waste handling, treatment, collection, and disposal. Generators of waste shall contain, document, and store waste for pickup and disposal by the Government.

(aa) Utilities

Water, electricity, natural gas, and sewage treatment will be provided by the Government to the Contractor's assigned facilities. Chilled water, high temperature hot water, and compressed air are provided to the Contractor's assigned facilities by the Government from the Utility Annex, Industrial Area Chiller Plant, Hypergol Maintenance Facility, Heat Plant and Central Heat Plant.

(bb) SPECSINTACT

Design specifications are maintained current and provided to the Contractor in electronic form and hard copy.

(cc) Fire fighting and Emergency Medical transport

The Government provides 24 hour / 7 days a week fire fighting capabilities for all Contractor facilities and operations. Services include rescue, ambulance transport to off site hospitals as required, fire prevention planning and fire protection engineering. Fire alarm systems and suppression systems maintenance is also provided by the Government except for Contractor assigned deluge systems.

(dd) Excess Property Disposal service.

Services include the receipt and disposal of excess property for Contractors and other Government organizations.

(ee) Technical Documentation

Provide access to Technical Documentation through the technical documentation center.

(ff) Structural and Power Systems Engineering Services.

Analysis and design of poles, concrete or metal mounts, pedestals, blast covers, structural supports, cable trays, conduit and special power exterior to maintained facilities.

(gg) Aircraft for Aerial Photography/Videography

The Government shall provide the aircraft necessary for aerial photography/videography.

(hh) Ships for Sea Photography/Videography

The Government shall provide the ships necessary for sea photography/vidoegraphy.

(ii) Base and Range Shop Support.

Government support will be provided in the areas of timing camera sequencing services, COMSEC, searchlights, ablative coating and nitrogen purge for camera boxes.

(jj) Portable Pressure Vessel Maintenance and Repair Services

Maintenance and testing of portable pressure vessels (K-bottles) and regulators

(kk) Electromagnetic Measurement and Analysis as required to meet contract requirements

(ll) Roads and Grounds Services

(mm) Sandblast Shop

Blasting and coating services are provided using a variety of blasting media by certified personnel. The Contractor will deliver and pick up items to the sandblasting shop for service.

(nn) Maintenance and Shops Support Services

Fabrication of all cables that connect to the 9099 interface, fabrication and refurbishment of camera window assemblies, welding, pedestal and mount fabrication and repair, Timing and Photo systems cable maintenance and repair, conduit installation, painting, corrosion control, application of ablatives and fabrication of metal tags for use with, or attached to SFOC or successor maintained facilities.

In the event that the Government is unable to provide the items specified in paragraphs a though (nn) above, or in the event the items are not available in a timely manner through Government resources, such items as are required in the performance of this contract may be procured by the Contractor with the prior written approval of the Contracting Officer.

The Contractor agrees to make every reasonable effort to anticipate and make known to the Government what its requirements are sufficiently in advance to permit the Government to fulfill them in a timely manner in order to minimize Contractor procurement.

Items generally considered "Fixtures" (e.g., becomes a part of the premises when installed, such as water coolers, air-conditioners, partitions) shall not be purchased by the Contractor under the authority of this clause. Additionally, items of a capital nature shall not be purchased under the authority of this clause without the prior written approval of the Contracting Officer.

[END OF SECTION]

SECTION H

SPECIAL CONTRACT REQUIREMENTS

H.1 CLAUSES INCORPORATED BY REFERENCE

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the contracting officer will make their full text available. Also, the full text of a clause may be accessed electronically at this address: http://nais.msfc.nasa.gov/msfc/nasa_ref.html

NASA FAR SUPPLEMENT (48 CFR CHAPTER 18) CLAUSES:

CLAUSE NUMBER	DATE	TITLE
1852.204-74	MAY 2002	CENTRAL CONTRACTOR REGISTRATION
1852.208-81	OCT 2001	RESTRICTIONS ON PRINTING AND DUPLICATING
1852.223-70	APR 2002	SAFETY AND HEALTH

H.2 SECURITY CONTROLS AT KSC (KSC 52.204-90)(NOV 2000)

A. Identification of Employees

The contractor shall require each employee engaged on the work site to display NASA-furnished identification badges and special access badges at all times. The contractor shall obtain and submit badging request forms for each person employed or to be employed by the contractor under this contract. The contractor shall designate its own security and badging officials to act as points-of-contact for the KSC Security Office. Prior to proceeding with onsite performance, the contractor shall submit the following information to the Protective Services Branch, Code TA-E2, Kennedy Space Center:

a. Contract number and location of work site(s)
b. Contract commencement and completion dates
c. Status as prime or subcontractor
d. Names of designated security and badging officials

Identification and badging of employees shall be accomplished as soon as practicable after award of the contract. During performance of the contract, the contractor shall, upon termination of an employee, immediately deliver badges and/or passes issued to the employee to the NASA Security Office. It is agreed and understood that all NASA identification badges/passes remain the property of NASA, and the Government reserves the right to invalidate such badges/passes at any time.

B. Access to Controlled Areas within KSC

1. Certain areas within KSC have been designated as Controlled Areas. These are normally surrounded by fencing and have an entrance gate monitored by a guard or monitoring device. Access into such areas is classified into "escorted" or "unescorted" access. For each employee for which the contractor desires to have unescorted access, the prescribed forms must be submitted to the NASA Security Office. Due to the time required to process requests for unescorted access, the contractor is advised to complete and submit the required forms as soon as practicable after contract award. Within 14 working days after the receipt of the forms, the NASA Security Office will determine whether the person is eligible for unescorted access.

2. The prime contractor is responsible for providing escort services for any of his employees and/or any subcontractor employees who are not eligible for unescorted access.

3. All requests for unescorted access by subcontractors will be submitted through the prime contractor for forwarding to the NASA Security Office.

H.3 SECURITY CONTROLS FOR DOD

A. Security Requirements. The contractor shall comply with CCAFS, and PAFB security requirements. The contractor shall submit to the contracting officer the name and address of each employee working under this contract ten (10) days prior to the start of work, and fill out questionnaires or other forms as may be required for security purposes, as required by the National Industrial Security Program Operating Manual, (DoD 5220.22-M), Personnel Security Program (DOD 5200.2-R), Personnel Security Program Management (AFI 31.501), or as directed by the contracting officer.

The contractor shall require each employee engaged on the work site to display government furnished identification badges and special access badges at all times. The contractor shall upon termination of an employee, immediately deliver badges and/or passes issued to the employee to the issuing Pass and Identification Control Center

B. Access to Secure Areas. Portions of the work under the contract are performed in secure areas, needing specific access requirements. These secure controlled/restricted areas are normally surrounded by fencing and have an entrance gate monitored by a guard or

monitoring device. Access into such areas is classified into "escorted" and "unescorted" access. All persons requiring unescorted access to a secure area shall be the subject of a favorable security investigation (security clearance) required for access to that area or, in most cases, will be escorted by an approved escort official. The contractor is responsible for providing escort services for any of his employees and/or any subcontractor employees who are not eligible for unescorted access.

Personnel requiring access to Air Force restricted areas but not classified information will be granted access based upon a favorable Trustworthy National Agency Check (NAC) submitted by the Air Force. The contractor shall submit a Standard Form (SF) 85P to the 45th Security Force Squadron, Personnel Security Office, PAFB (45 SFS/SFAP) for processing. Upon favorable check the contractor shall request a security badge using AF Form 2586. Personnel requiring access to areas containing classified information or material shall have the appropriate security clearance as approved by Defense Investigative Security Clearance Office.

C. Interfaces. The contractor shall comply with controlled/restricted area procedures and instructions, to include proper security clearances and certification under NASA's Personnel Reliability Program (PRP). Contractor personnel working in controlled/restricted areas, such as payload processing facilities, launch areas, and computer rooms, may be required to sign in and out, state the nature of business at the entrance desk, and display a unique user provided badge. All work in controlled/restricted areas shall be coordinated with the respective unit or organization in accordance with local agency security procedures.

AF contractor personnel who are currently NASA PRP certified and hired under KICS contract will remain in their original reinvestigation cycle. Additionally, current AF contractor personnel hired for the KICS contract who now have an AF Restricted Area Badge will be "Grandfathered" into the NASA PRP Program and granted PRP certification. These employees will be placed in a normal reinvestigation cycle and will be requested to complete KSC Form 90 every two and a half to five years, or for cause. PRP is not a general screening requirement for all contractor employees. It is only required for persons requiring unescorted access to Mission Critical Space Systems Areas, persons in Mission Critical positions, and persons performing certain Information Security (IS) functions.

H.4 MOTOR VEHICLE MANAGEMENT (KSC 52.208-90) (APR 2001)

The contractor shall acquire and manage motor vehicles necessary to support the performance of the contract. Such needed vehicles are to be acquired and managed in the manner most efficient and economic to the Government. Vehicles may be obtained from the GSA Interagency Motor Pool, commercial sources, or other sources. Costs related to motor vehicles shall be borne by the contractor and reimbursed by the Government to the extent allowable in accordance with the terms of the contract relating to the reimbursement of costs.

The contractor will use KSC Form 7-490 (KSC Vehicle Use Record) to record vehicle utilization for all GSA and commercial rental vehicles. These records will be maintained and made available at the request of the Contracting Officer for a period of 18 months. Two copies of the

monthly billings, both GSA and commercial, for motor vehicle services will be forwarded to the Contracting Officer each month with a copy to the KSC Transportation Office, Code TA-E1. The contractor shall assure that all vehicle operators are appropriately licensed in the state. The contractor will furnish GSA a copy of their third party automobile insurance policy if acquiring GSA motor vehicles.

The contractor shall prepare and submit a Vehicle Utilization Plan (DRD H-1) semiannually. One copy of the form shall be forwarded to the Contracting Officer, with a copy to KSC Transportation Office, Code TA-E1. This plan shall, as a minimum, demonstrate the economic and efficient management of vehicles and fuel. It shall forecast the vehicle requirements for 2 years allowing at least 6 months advance notice for additional requirements. It shall demonstrate the techniques utilized by the contractor to assure that vehicles are used for official purposes only.

H.5 TASK ORDERING PROCEDURE (NFS 1852.216-80)(OCT 1996)

(a) Only the Contracting Officer may issue Task Orders to the Contractor, providing specific authorization or direction to perform work within the scope of the contract and as specified in the schedule. The Contractor may incur costs under this contract in performance of Task Orders and Task Order modifications issued in accordance with this clause. No other costs are authorized unless otherwise specified in the contract or expressly authorized by the Contracting Officer.

(b) Prior to issuing a Task Order, the Contracting Officer shall provide the Contractor with the following data:

(1) A functional description of the work identifying the objectives or results desired from the contemplated Task Order.
(2) Proposed performance standards to be used as criteria for determining whether the work requirements have been met.
(3) A request for a task plan from the Contractor to include the technical approach, period of performance, appropriate cost information, and any other information required to determine the reasonableness of the Contractor's proposal.

(c) Within 15 working days after receipt of the Contracting Officer's request, the Contractor shall submit a task plan conforming to the request.

(d) After review and any necessary discussions, the Contracting Officer may issue a Task Order to the Contractor containing, as a minimum, the following:

(1) Date of the order.
(2) Contract number and order number.
(3) Functional description of the work identifying the objectives or results desired from the Task Order, including special instructions or other information necessary for performance of the task.
(4) Performance standards, and where appropriate, quality assurance standards.
(5) Maximum dollar amount authorized (cost and fees). This includes allocation of award fee to non-labor cost among award fee periods, if applicable.
(6) Any other resources (travel, materials, equipment, facilities, etc.) authorized.
(7) Delivery/performance schedule including start and end dates.

(8) If contract funding is by individual Task Order, accounting and appropriation data.

(e) The Contractor shall provide acknowledgment of receipt to the Contracting Officer within 3 working days after receipt of the Task Order.

(f) If time constraints do not permit issuance of a fully defined Task Order in accordance with the procedures described in paragraphs (a) through (d), a Task Order which includes a ceiling price may be issued.

(g) The Contracting Officer may amend tasks in the same manner in which they were issued.

(h) In the event of a conflict between the requirements of the Task Order and the Contractor's approved task plan, the Task Order shall prevail.

H.6 DELIVERY ORDER PROCEDURES FOR DOD REQUIREMENTS

a. Only the Contracting Officer may issue a delivery order to the contractor, providing specific authorization or direction to perform work within the scope of the contract and as specified in the schedule. The contractor may incur costs under this contract in performance of delivery orders and delivery order modifications issued in accordance with this clause. No other costs are allowable against the delivery order unless otherwise authorized by the Contracting Officer. DOD customers may order additional products and services using established commercial billing methods.

b. The delivery order may contain, as a minimum:

(1) Effective date of the order.
(2) Contract number and delivery order number.
(3) Functional description of the work identifying the objective or results desired from the delivery order, including special instructions or other information necessary for performance of the delivery.
(4) Maximum dollar amount authorized against applicable subCLINs.
(5) Delivery schedule, including start and end dates.
(6) Accounting and appropriation data.

c. The contractor shall provide acknowledgement of receipt to the DOD contracting officer within two working days after receipt of the delivery order.

d. Upon receipt of the delivery order from the Contracting Officer, the contractor will coordinate with the DOD customer technical representative in developing the Photographic Acquisition Distribution Document (PADD). No other support against the delivery order may be initiated prior to government approval of the PADD.

e. The Contracting Officer may amend delivery orders in the same manner in which they were issued.

f. In the event of a conflict between the requirements of the delivery order and the PADD, the delivery order shall prevail.

H.7 MINIMUM INSURANCE COVERAGE (NASA 1852.228-75) (OCT 1988)

The Contractor shall obtain and maintain insurance coverage as follows for the performance of this contract:

(a) Worker's compensation and employer's liability insurance as required by applicable Federal and state workers' compensation and occupational disease statutes. If occupational diseases are not compensable under those statutes, they shall be covered under the employer's liability section of the insurance policy, except when contract operations are so commingled with the Contractor's commercial operations that it would not be practical. The employer's liability coverage shall be at least $100,000, except in States with exclusive or monopolistic funds that do not permit workers' compensation to be written by private carriers.

(b) Comprehensive general (bodily injury) liability insurance of at least $500,000 per occurrence.

(c) Motor vehicle liability insurance written on the comprehensive form of policy, which provides for bodily injury and property damage liability covering the operation of all motor vehicles used in connection with performing the contract. Policies covering motor vehicles operated in the United States shall provide coverage of at least $200,000 per person and $500,000 per occurrence for bodily injury liability and $20,000 per occurrence for property damage. The amount of liability coverage on other policies shall be commensurate with any legal requirements of the locality and sufficient to meet normal and customary claims.

(d) Comprehensive general and motor vehicle liability policies shall contain a provision worded as follows:

"The insurance company waives any right of subrogation against the United States of America which may arise by reason of any payment under the policy."

(e) When aircraft are used in connection with performing the contract, aircraft public and passenger liability insurance of at least $200,000 per person and $500,000 per occurrence for bodily injury, other than passenger liability, and $200,000 per occurrence for property damage. Coverage for passenger liability bodily injury shall be at least $200,000 multiplied by the number of seats or passengers, whichever is greater.

H.8 EMERGENCY MEDICAL TREATMENT (KSC 52.223-105) (JUL 2000)

The contractor shall immediately call (see below for applicable telephone numbers) for assistance with personnel injury or illness for any incident requiring emergency medical treatment for contractor or subcontractor personnel, or invitees on KSC, or if any person on the job site is rendered unconscious. The contractor shall require the victim to sign an appropriate "refusal of treatment" form, if medical evaluation/treatment is offered and refused.

From KSC or CCAFS property: 911

From a KSC issued cellular telephone: 867-7911

From other than a KSC issued cellular telephone: 321-867-7911

Commercial telephone users on KSC or CCAFS property: 911

H.9 ASBESTOS-CONTAINING BUILDING MATERIALS (KSC 52.223-119) (JUN 2002)

(a) Asbestos-Containing Building Materials (ACBM) are known to be present in facilities assigned under the scope of this contract. The Government will provide information regarding the location and quantity of known ACBM in NASA/KSC facilities to the facility tenant organizations through the JBOSC Environmental Health office.

(b) Special requirements, coordination, and precautions will apply to any work taking place under contracts that involves disturbance of ACBM. Contractors whose contracts require work involving ACBM are required to provide a written program for such work as part of its health and safety plan which is consistent with the requirements of 29 CFR 1926.1101 and address the NESHAPS requirements under 40 CFR 61 Subpart M. The contractor shall coordinate any such work involving ACBM with JBOSC Environmental Health, SGS Fire Services, and any other resident government or contractor organization whose employees may have access to the work location.

H.10 OCCUPATIONAL HEALTH (KSC 52.223-93) (NOV 2000)

1. Occupational Health Services

The medical services set forth in KMI 1810.1I entitled KSC Occupational Medicine Program, will be provided to the contractor by the Government to the extent that there will not be any restriction of the employees' rights under applicable Workmen's Compensation statutory provisions.

Information from records generated as a result of rendition of these medical services may be obtained from the Chief, Aerospace Medicine and Occupational Health Branch, Code TA-C2, upon written request.

2. Health Examinations and Physical Requirements Standards

The contractor shall provide the following data to the Chief, Aerospace Medicine and Occupational Health Branch, Code TA-C2:

a. A breakdown of the various health examinations required in support of this contract; providing type, frequency, and a roster of personnel affected.

b. The applicable physical requirements standards for personnel certification, if the contractor has physical requirements standards which are stricter than the applicable KSC

(Federal) standards; otherwise the KSC (Federal) physical requirements standards are applicable to this contract.

H.11 HAZARD COMMUNICATION (KSC 52.223-94) (JUL 2002)

In order to comply with Federal, OSHA, and State Regulations, the Contractor shall participate in the KSC Chemical Hazard Communication Program as implemented by KNPD 1800.2, KSC Hazard Communication Program.

The Contractor shall coordinate submission of hazardous material safety data, to the NASA/KSC Materials Safety Data Sheet (MSDS) Archive, with the Joint Base Operations Support Contract MSDS Program Administrator.

H.12 PENSION PORTABILITY (NASA 1852.237-71)(JAN 1997)

(a) In order for pension costs attributable to employees assigned to this contract to be allowable costs under this contract, the plans covering such employees must:

(1) Comply with all applicable Government laws and regulations;

(2) Be a defined contribution plan, or a multiparty defined benefit plan operated under a collective bargaining agreement. In either case, the plan must be portable, i.e., the plan follows the employee, not the employer;

(3) Provide for 100 percent employee vesting at the earlier of one year of continuous employee service or contract termination; and

(4) Not be modified, terminated, or a new plan adopted without the prior written approval of the cognizant NASA Contracting Officer.

(b) The Contractor shall include paragraph (a) of this clause in subcontracts for continuing services under a service contract if:

(1) The prime contract requires pension portability;

H.13 CONFINED SPACE WORK REQUIREMENTS (KSC 52.223-101) (JAN 2001) (MODIFIED)

A. Special requirements, coordination, and precautions will apply to any contract work taking place in confined spaces. Each contractor contracted to perform work in confined spaces is required to provide a written program for such work as part of its health and safety plan which is consistent with the requirements of 29 CFR 1910.146. For work in telecommunications manholes, provisions of 29 CFR 1910.268(o) are also applicable. The contractor shall coordinate any such work in confined spaces with SGS Environmental Health, SGS Fire Services, and any other resident government or contractor organization whose employees may have access to the work location. The provision of Environmental Health services by the government does not prohibit the contractor from providing their own atmospheric testing. Government provided services include environmental health monitoring and consultation support for testing of atmospheres in confined spaces as well as fire rescue and emergency medical services.

B. Entry into and work in confined spaces shall be in accordance with the requirements of KHB 1820.4, "KSC Respiratory Protection Program," KNPG 1840.19, "KSC Industrial Hygiene Programs," and all other applicable clauses of this contract.

C. Confined spaces, which contain water, shall be pumped out by the contractor prior to scheduling a confined space entry check.

D. In addition to the requirements set forth above, the Contractor shall notify and obtain approval from the Power Coordinator, telephone 321-867-7300, and/or from Communications Control, telephone 321-867-4141, respectively, prior to performing work in electrical and/or communications manholes.

H.14 REQUEST FOR INFORMATION/CLARIFICATION (KSC 52.242-92) (OCT 2000)

The Contractor shall promptly report to the Contracting Officer all problems or conflicting technical information encountered during the contract performance so that the Government may provide solutions or appropriate direction. Such problems shall be reported on KSC Form No. 8-268, "Request for Information/Clarification," to be provided by the Government. A copy of each RFIC will be provided to the Contract Technical Representative concurrently with the transmittal to the Contracting Officer. The Contractor shall log and control each Request for Information/Clarification (RFIC), including those generated by subcontractors.

H.15 CENTERWIDE MANPOWER REPORTS (KSC 52.242-93) (NOV 2000)

The Contractor shall submit, on a quarterly basis, a manpower report delineating information about its workforce. The report shall include: the contract number, the contractor's total on-site workforce, total on-site union represented employees by bargaining unit, total on-site non-union represented employees, and total off-site workforce performing on the contract. The Contractor shall provide this information no later than 10 days after the close of each reporting period, which end March 31st, June 30th, September 30th, and December 31st. The report shall be submitted to the Contracting Officer with copies to Workforce Planning and Analysis Office, (Code BA-D) and Industrial Labor Relations Office (Code QA-A).

H.16 AUTHORIZED CHANGES

NASA/KSC or Air Force 45th Space Wing contracting officers are authorized to issue orders and sign modifications to the contract and perform all actions consistent with FAR 1.602. Performance of the work under this contract is subject to the written technical direction of the NASA contracting officer's technical representative or 45th Space Wing program manager.

H.17 MANAGEMENT OF NASA-OWNED/CONTRACTOR-HELD RECORDS (KSC 52.245-90) (NOV 1998)

(a) NASA-owned/Contractor-held records shall be maintained by the Contractor in accordance with the instructions set forth in the latest editions of NPG 1440.6, NASA Records Management Program, NPG 1441.1, NASA Records Retention Schedules, and KMI 1440.1, KSC Records Management and Vital Records Programs. As directed by the Contracting

Officer, the Contractor shall obtain prior approval from the Contracting Officer to destroy or remove records subject to this clause.

(b) NASA-owned/Contractor-held records shall consist of documentation of Contractor activities and functions necessary for the performance of this contract, including, but not limited to, documentation of those day-to-day operating procedures that are essential to carrying out the statement of work and those actions, organizational structure, policies, decisions, operations, and activities necessary to perform or continue the work performed under the contract. NASA-owned/Contractor-held records shall not include those Contractor records that relate exclusively to the Contractor's internal business or are of a general nature not specifically related to the performance of work under the contract. The Contractor's general policies, procedures, etc., that apply to the general conduct of its business do not fall under the purview of this clause. When in doubt, the Contractor shall seek the Contracting Officer's determination as to which records are subject to this clause.

(c) The Contractor shall ensure that NASA-owned/Contractor-held records are segregated from company-owned records and from non-record materials. This clause operates independently from and is not intended to affect, or be effected by, the Contractor records provisions contained in FAR Subpart 4.7 and the clauses referenced therein.

(d) The Contractor, through the Contracting Officer, shall coordinate with the KSC Records Manager, on matters requiring advice, such as marking and segregating such records, or technical assistance in all areas of management pertaining to such records.

H.18 GOVERNMENT-FURNISHED PROPERTY AND SERVICES (KSC 52.245-96) (AUG 1991)

Pursuant to NFS 1852.245-76, the property listed therein is an exclusive list of property to be provided and no other property will be Government-furnished. No documents, which form a part of this contract are intended to indicate any property will be furnished by the Government unless that indication is verified in the list provided. All property to be used in the performance of this contract and not listed shall be furnished by the Contractor. No services will be provided by the Government except those utility or escort services (if any) specifically set forth in Section G, Clause G.11, List of Installation-Provided Property and Services.

Request for Government-furnished property shall be made in writing to the Contracting Officer no later than 15 days prior to the Contractor's need date for that item.
The Contractor shall verify the quantity and condition of such Government-furnished property upon receipt and acknowledge receipt thereof in writing to the Contracting Officer. In case of damage or shortage of such property the Contractor shall within twenty-four (24) hours report in writing such damage or shortage to the Contracting Officer. The Contractor shall be responsible for storage of all delivered Government-furnished property in such a manner as to protect the Government-furnished property from deterioration.

H.19 PHASE IN PERIOD

The Contractor shall assume contract responsibility for performing all the requirements of this contract on January 01, 2004. During the phase in period first quarter of fiscal year 2004, not to exceed 90 days, under a not-to-exceed cost of $0, the Contractor shall accomplish phase-in and training of Contractor personnel as required for the assumption of full contract responsibility. The Contractor shall not charge the Government nor be reimbursed for costs in excess of this not-to-exceed amount incurred for phase-in and training during said phase-in period.

H.20 NASA'S TECHNOLOGY TRANSFER PROGRAM

(a) The contractor shall support, and participate in, NASA's Technology Transfer/Commercialization Program by assisting the transfer of technology developed under government contract to the private sector. The contractor's participation may include a number of different activities including the following:

1. Dual use development of cutting edge technology having applications both within and outside the aerospace community.
2. Collaborative efforts with third parties for the purpose of transferring technology.
3. Government sponsored technology outreach and industry assistance programs that further the transfer of technology.
4. Applications engineering work for the purpose of adapting the developed technology to a specific use.

(b) All projects and associated agreements will be coordinated with the COTR, IT&C Directorate, and directed in writing by the contracting officer. Agreements will state funding requirements, project description, scope of project, reporting requirements, and responsible NASA and contractor personnel. Ownership of rights to the technology developed under these collaborative and partnership activities shall be addressed in the individual agreements. Projects utilizing government funds will be approved by the contracting officer.

(c) Contractor commitment to technology transfer/commercialization can be demonstrated by the development of internal programs aimed at:

1. Education and training its workforce in technology transfer activities.
2. Motivating its employees to report new technology as required by FAR 52.227-12.
3. Assisting its subcontractor with technology transfer activities.

H.21 CAPITALIZATION OF CONTRACTOR OWNED EQUIPMENT

(a) Introduction. The contractor may purchase equipment for the purpose of performing the work described in the PWS. Any property potentially subject to this clause shall be approved by the Contracting Officer prior to purchase. The capital equipment will be capitalized and depreciated in accordance with the contractor's established cost accounting practices and procedures, as follows:

Equipment Type	Cost	Minimum Useful Life	Depreciation Method
TBD			

(b) Contractor Records. The contractor agrees to maintain complete records of capital equipment that is subject to this clause, including date of purchase, estimated service life, purchase price, depreciation base, method and schedule, and amount of depreciation recorded to date.

(c) Right to Purchase. If upon expiration or termination of this contract the government does not thereafter contract with the contractor for the performance of the same, or substantially the same services contemplated by this contract, the contractor shall, upon request by the successor contractor(s), transfer title to any prime contractor dedicated equipment identified in the records referenced above, to the successor contractor(s) at net book value, subject to reasonable terms and conditions regarding payment and other matters to be agreed upon by the contractor and successor contractors.

(d) Contract Closeout. The gain or loss on sale of fixed assets will be charged or credited to the contract upon completion of the contract, for a period not exceeding 120 calendar days after completion of the contract. This will include capitalized equipment, software, and termination expense on equipment leases. This applies only to contractor replacement of government furnished property, and is effective for property replaced. The contractor shall be responsible for the disposal of any property not transferred to a successor contractor under paragraph (c) above. Allowability of costs under this clause is subject to proper record keeping as required by paragraph (b) above.

H.22 PERMITS AND LICENSES

The contractor shall comply with all applicable laws, regulations or ordinances. The contractor shall procure and keep effective all necessary permits and licenses required by the federal, state, or local government or subdivision thereof, or of any other duly constructed public authority in performance of the work unless otherwise directed by the contracting officer.

Any permit involving environmental coordination shall be submitted through the Environmental Program Branch (TA-C3) at KSC or the 45 CES/CEV (MS 9125) at CCAFS.

H.23 AMERICANS WITH DISABILITIES ACT, SECTION 508 POLICY

The Contractor shall comply with accessibility requirements for electronic and information technology access as defined in Section 508 of the Rehabilitation Act (29 U.S.C. 794d). Detailed requirements for accessibility have been established by the Architectural and Transportation Barriers Compliance Board (Access Board) at 36 CFR Part 1194.

H.24 PROTECTION AND SAFEGUARDING OF INFORMATION AND DATA

(a) Except as specifically authorized by this contract, or as otherwise approved in writing by the contracting officer, all information and data developed, acquired, or furnished by or to the contractor in the performance of this contract, shall be used only in connection with the work under this contract, and shall be protected by the contractor from unauthorized use, release, duplication, or disclosures.

(b) The contractor shall take appropriate measures to assure that its personnel, who have or might reasonably have access to such information and data referred to in paragraph (a) above, agree to honor the contractor's commitment and safeguard such information and data.

(c) It is further anticipated that in performance of this contract the contractor may also have access to, be furnished, use, or generate the following types of data (recorded information):

1. Data of third parties bearing limited rights or restricted rights notices submitted either to the government or directly to the contractor;

2. Other data of third parties which the government has agreed to handle under protective arrangements; or

3. Data, generated by the government or the contractor for third parties, for which the government intends to control the use and dissemination until delivered to the third parties.

(d) In order to protect the interests of the government, the owners, and the intended recipients of the data described in paragraph (c), the contractor further agrees, with respect to such data described in subparagraph (c)1 and, when so identified by the contracting officer or designated representative, with respect to data described in subparagraphs (c)2 and (c)3, to:

1. Use and disclose such data only to the extent necessary to perform the work required under this contract, with particular emphasis on restricting the data to employees having a "need to know";

2. Preclude disclosure of such data outside contractor's organization performing work under this contract without written consent of the contracting officer; and

3. Return or dispose of such data as directed by the contracting officer or designated representative when such data is no longer needed for contract performance.

(e) Nothing contained in this special contract requirement or elsewhere in this contract shall be construed as altering the definition of "technical data" for the purpose of applying the requirement(s) of the clause herein entitled FAR 52.227-14, "Rights in Data—General."

H.25 ADMINISTRATIVE ASSET TRANSITION

The contractor agrees that the administrative telephone instruments and associated services provided under this contract are essential to the Government and shall be continued without interruption. The transition of these assets (e.g., hardware and software) from the incumbent to a successor Contractor (or the Government in the event of no successor), shall be accomplished in accordance with the following:

Transition of Assets: All existing assets shall remain installed and usable by the Government through the transition of assets or their replacement by the successor contractor. The assets will be provided on an "as is/where is" basis. In the event that the successor contractor chooses not to use the existing assets, it will coordinate removing those assets with the predecessor contractor who has responsibility to dispose of those assets. The contractor shall ensure that all purchase

and leasing arrangements, both for hardware and software, includes provisions to transfer to a successor in interest.

Continuity of Services: All Administrative Telephone assets and services shall transition with no degradation to service. The contractor is obligated to transfer these assets to a successor in interest if the successor elects to acquire them at the Asset Transition Charge, described below. The contractor shall not remove, reassign, or otherwise dispose of these assets once a successor in interest indicates the desire to accept transfer of the assets.

Asset Transition Value Methodology: Upon notification by the Government, at least 120 days before the end of the KICS contract, a Transition Value of the contractors' administrative telephone assets on the date of transition will be calculated and provided to the Government. The Transition Value shall be the net book value of the assets at the time of transition. Any costs to move the assets from their current locations or to modify their current configuration shall not be included. All applicable remaining warranties shall be provided to the successor in interest. The Asset Transition Value shall not include any Government-furnished or institutionally provided property or equipment.

H.26 DATA RIGHTS NOTICE

(a) Any proposal submitted during the course of contract performance must expressly identify any computer software or technical data that is to be provided with less than unlimited rights. The Contractor shall notify the Contracting Officer in writing prior to incorporating any item, component, subcomponent, process, or software, wherein the related technical data or computer software qualifies as limited rights data or restricted computer software in accordance with Alternate II and III of Federal Acquisition Regulations (FAR) 52.227-14 and NASA FAR Supplement (NFS) 1852.227-86. This notification does not apply to commercial off-the-shelf (shrink-wrapped) computer software, and corresponding documentation, that has a standard commercial license unless the software is to be incorporated as a subcomponent in a developmental effort.

(b) Technical data and computer software delivered shall not be marked with restrictive legends unless the Contracting Officer has given prior written consent.

(c) All license agreements shall be compliant with Federal laws, regulations and the terms and conditions of this contract and shall be transferable to the Government upon completion of the contract without any additional cost to the Government. One copy of the final negotiated license agreement shall be forwarded to the Contracting Officer within thirty (30) calendar days of agreement to ensure compliance.

H.27 LIMITED RIGHTS DATA NOTICE

(a) Notwithstanding any other terms and conditions of this contract, the Government shall have the right to disclose technical data marked as limited rights data outside the Government, without obtaining permission from the Contractor, under the following circumstances:

1. Use (except for manufacture) by support service contractors.
2. Evaluation by non-governmental evaluators.
3. Use (except for manufacture) by other contractors participating in the Government's program of which the specific contract is a part, for information and use in connection with the work performed under each contract.
4. Emergency repair or overhaul work.
5. Release to a foreign government, or instrumentality thereof, as the interests of the United States Government may require, for information or evaluation, or emergency repair or overhaul by such Government.

(b) Prior to disclosure, except in emergency circumstances as identified in Paragraphs 4 and 5 above, the Government shall require the recipient to sign an agreement, provided by and acceptable to the Contractor, to protect the data from unauthorized use and disclosure. The Contractor shall provide a copy of the acceptable nondisclosure agreement to the Contracting Officer no later than thirty (30) calendar days after contract award.

H.28 INFORMATION INCIDENTAL TO CONTRACT ADMINISTRATION

(a) With the exception of financial information, the Government shall have unlimited rights to use and distribute to third parties any administrative or management information developed by the Contractor or a Subcontractor at any tier in whole or in part or the performance of the contract or first produced in the performance of the contract, whether or not said information is specified as a contract deliverable, if created in whole or in part at Governmental expense. The Contracting Officer may, at any time during the contract performance or within a period of three (3) years after acceptance of all items to be delivered under this contract, order any administrative or management information developed by the Contractor or a subcontractor at any tier in whole or in part for the performance of the contract or first produced in the performance of the contract.

(b) The Contracting Officer may release the Contractor from the requirements of this clause for specifically identified information at any time during the three (3) year period set forth in Paragraph (a) of this clause.

H.29 AUTONOMOUS CONTRACTOR OPERATION

The contractor shall appoint a representative at the work site with full authority to receive and execute, on behalf of the contractor, such contract modifications, notices, policy directives, etc., as may be issued pursuant to the terms of this contract.

H.30 CONTROLS APPLICABLE TO CONTRACTOR'S ACTIVITIES (KSC 52.242-90)(AUG 2002)

The below listed Kennedy Space Center publications and subsequent revisions thereof are applicable to this contract and are incorporated herein by reference. These publications prescribe regulatory procedural criteria, which are applicable to the contractor. The contractor, upon receipt of notice of noncompliance with any provisions of the below listed publications from the Contracting Officer or his representatives, shall promptly take corrective action. Additional requirements reside in the PWS and Attachment J-1, Appendix 3.

JHB 2000	Consolidated Comprehensive Emergency Management Plan
KHB 1200.1	Facilities, Systems, And Equipment Management Handbook
KHB 1610.1	KSC Security Handbook
KHB 1710.2	Kennedy Space Center Safety Practices Handbook
KNDP 8700.0	Safety and Mission Assurance Policy Direction
KNPD 1800.2	Hazard Communication Program
KMI 1810.1	KSC Occupational Medicine Program **On-site Contractors shall comply with Attachment D, KSC Skin Cancer Prevention Program**
KMI 1860.1	KSC Radiation Protection Program
KHB 1870.1	KSC Sanitation Handbook
KHB 2570.1	KSC Radio Frequency Spectrum Management Handbook
KHB 4000.1	Supply Support System Manual, Part 5, Equipment Management
KHB 8800.6	KSC Environmental Control Handbook
KHB 8800.7	Waste Management Handbook
KMI 8800.8	KSC Environmental Management

H. 31 ADDITIONAL DATA REQUIREMENTS (52.227-16)(June 1987)

(a) In addition to the data (as defined in the clause at 52.227-14, Rights in Data-General clause or other equivalent included in this contract) specified elsewhere in this contract to be delivered, the Contracting Officer may, at any time during contract performance or within a period of 3 years after acceptance of all items to be delivered under this contract, order any data first produced or specifically used in the performance of this contract.

(b) The Rights in Data-General clause or other equivalent included in this contract is applicable to all data ordered under this Additional Data Requirements clause. Nothing contained in this clause shall require the Contractor to deliver any data

the withholding of which is authorized by the Rights in Data-General or other equivalent clause of this contract, or data which are specifically identified in this contract as not subject to this clause.

(c) When data are to be delivered under this clause, the Contractor will be compensated for converting the data into the prescribed form, for reproduction, and for delivery.

(d) The Contracting Officer may release the Contractor from the requirements of this clause for specifically identified data items at any time during the 3-year period set forth in paragraph (a) of this clause.

[END OF SECTION]

PART II - CONTRACT CLAUSES

SECTION I

CONTRACT CLAUSES

I.1 LISTING OF CLAUSES INCORPORATED BY REFERENCE

NOTICE: The following contract clauses pertinent to this section are hereby incorporated by reference:

I. FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1)

CLAUSE NUMBER	DATE	TITLE
52.202-1	DEC 2001	DEFINITIONS
52.203-3	APR 1984	GRATUITIES
52.203-5	APR 1984	COVENANT AGAINST CONTINGENT FEES
52.203-6	JUL 1995	RESTRICTIONS ON SUBCONTRACTOR SALES TO THE GOVERNMENT
52.203-7	JUL 1995	ANTI-KICKBACK PROCEDURES
52.203-8	JAN 1997	CANCELLATION, RESCISSION AND RECOVERY OF FUNDS FOR ILLEGAL OR IMPROPER ACTIVITY
52.203-10	JAN 1997	PRICE OR FEE ADJUSTMENT FOR ILLEGAL OR IMPROPER ACTIVITY
52.203-12	JUN 1997	LIMITATION ON PAYMENTS TO INFLUENCE CERTAIN FEDERAL TRANSACTIONS
52.204-2	AUG 1996	SECURITY REQUIREMENTS
52.204-4	AUG 2000	PRINTED OR COPIED DOUBLE-SIDED ON RECYCLED PAPER
52.209-6	JUL 1995	PROTECTING THE GOVERNMENT'S INTEREST WHEN SUBCONTRACTING WITH CONTRACTORS DEBARRED, SUSPENDED, OR PROPOSED FOR DEBARMENT
52.211-15	SEP 1990	DEFENSE PRIORITY AND ALLOCATION REQUIREMENTS
52.215-2	JUN 1999	AUDIT AND RECORDS--NEGOTIATION
52.215-8	OCT 1997	ORDER OF PRECEDENCE - UNIFORM CONTRACT FORMAT
52.215-11	OCT 1997	PRICE REDUCTION FOR DEFECTIVE COST OR PRICING DATA-- MODIFICATIONS
52.215-13	OCT 1997	SUBCONTRACTOR COST OR PRICING DATA - MODIFICATIONS
52.215-14	OCT 1997	INTEGRITY OF UNIT PRICES
52.215-15	DEC 1998	PENSION ADJUSTMENTS AND ASSET

		REVERSIONS
52.215-18	OCT 1997	REVERSION OR ADJUSTMENT OF PLANS FOR POSTRETIREMENT BENEFITS (PRB) OTHER THAN PENSIONS
52.215-21	OCT 1997	REQUIREMENTS FOR COST OR PRICING DATA OR INFORMATION OTHER THAN COST OR PRICING DATA -- MODIFICATIONS
52.216-7	FEB 2002	ALLOWABLE COST AND PAYMENT (a) (3) 30th
52.216-11	APR 1984	COST CONTRACT – NO FEE (Applies only to CLIN 0001)
52.216-18	OCT 1995	ORDERING Insert "1/1/04" through "9/30/08" in paragraph (a).
52.216-19	OCT 1995	ORDER LIMITATIONS Insert "$1,000", "$4,000,000, "$20,000,000", "60" and "3" in paragraphs (a), (b)(1), (b)(2), (b)(3) and (d), respectively.
52.216-22	OCT 1995	INDEFINITE QUANTITY Insert "9/30/08" in paragraph (d).
52.217-8	NOV 1999	OPTION TO EXTEND SERVICES
52.219-6	JUL 1996	NOTICE OF TOTAL SMALL BUSINESS SET-ASIDE
52.219-8	OCT 2000	UTILIZATION OF SMALL BUSINESS CONCERNS
52.219-14	DEC 1996	LIMITATION ON SUBCONTRACTING
52.222-1	FEB 1997	NOTICE TO THE GOVERNMENT OF LABOR DISPUTES
52.222-2	JUL 1990	PAYMENT FOR OVERTIME PREMIUMS Insert "Zero" in paragraph (a).
52.222-3	AUG 1996	CONVICT LABOR
52.222-4	SEP 2000	CONTRACT WORK HOURS AND SAFETY STANDARDS ACT - OVERTIME COMPENSATION
52.222-20	DEC 1996	WALSH-HEALEY PUBLIC CONTRACTS ACT
52.222-21	FEB 1999	PROHIBITION OF SEGREGATED FACILITIES
52.222-26	APR 2002	EQUAL OPPORTUNITY
52.222-35	DEC 2001	EQUAL OPPORTUNITY FOR SPECIAL DISABLED VETERANS, VETERANS OF THE VIETNAM ERA, AND OTHER ELIGIBLE VETERANS
52.222-36	JUN 1998	AFFIRMATIVE ACTION FOR WORKERS WITH DISABILITIES
52.222-37	DEC 2001	EMPLOYMENT REPORTS ON SPECIAL DISABLED VETERANS, VETERANS OF THE

		VIETNAM ERA, AND OTHER ELIGIBLE VETERANS
52.222-41	MAY 1989	SERVICE CONTRACT ACT OF 1965, AS AMENDED
52.222-42	MAY 1989	STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES
52.222-43	MAY 1989	FAIR LABOR STANDARDS ACT AND SERVICE CONTRACT
52.222-47	MAY 1989	SERVICE CONTRACT ACT (SCA) MINIMUM WAGES AND FRINGE BENEFITS. Command Technologies, Inc. is the incumbent Contractor. International Brotherhood of Electrical Workers Local is the labor union. Space Mark, Inc is the incumbent Contractor. International Brotherhood of Electrical Workers Local is the Labor union. Johnson Controls World Services, Inc. is the incumbent Contractor. Motion Picture and Video Tape Laboratory Technicians, Allied Crafts and Government Employees and International Cinematographers Guild is the labor union.
52.223-3	JAN 1997	HAZARDOUS MATERIAL IDENTIFICATION AND MATERIAL SAFETY DATA (ALTERNATE I) (JUL 1995) Insert "NONE" in paragraph (b).
52.223-5	APR 1998	POLLUTION PREVENTION AND RIGHT-TO-KNOW INFORMATION
52.223-6	MAY 2001	DRUG-FREE WORKPLACE
52.223-10	AUG 2000	WASTE REDUCTION PROGRAM
52.223-14	OCT 2000	TOXIC CHEMICAL RELEASE REPORTING
52.225-1	MAY 2002	BUY AMERICAN ACT--SUPPLIES
52.225-13	JUL 2000	RESTRICTIONS ON CERTAIN FOREIGN PURCHASES
52.227-1	JUL 1995	AUTHORIZATION AND CONSENT
52.227-2	AUG 1996	NOTICE AND ASSISTANCE REGARDING PATENT AND COPYRIGHT INFRINGEMENT
52.227-14	JUN 1987	RIGHTS IN DATA--GENERAL As modified by 1852.227-14 NASA FAR Supplement (OCT 1995)
52.227-17	JUN 1987	RIGHTS IN DATA – SPECIAL WORKS
52.228-7	MAR 1996	INSURANCE--LIABILITY TO THIRD PERSONS
52.230-2	APR 1998	COST ACCOUNTING STANDARDS
52.230-6	NOV 1999	ADMINISTRATION OF COST ACCOUNTING STANDARDS
52.232-1	APR 1984	PAYMENTS
52.232-7	DEC 2002	PAYMENTS UNDER TIME AND MATERIALS AND LABOR HOUR CONTRACTS
ALTERNATE II	FEB 2002

1852.243-71	MAR 1997	SHARED SAVINGS

(End Of Clause)

I.2 CLAUSES INCORPORATED BY REFERENCE (FAR 52.252-2) (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

http://www.arnet.gov/far/

http://www.hq.nasa.gov/office/procurement/regs/nfstoc.htm

(End of clause)

I.3 AUTHORIZED DEVIATIONS IN CLAUSES (FAR 52.252-6) (APR 1984)

(a) The use in this solicitation or contract of any Federal Acquisition Regulation (48 CFR Chapter 1) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the date of the clause.

(b) The use in this solicitation or contract of any NASA FAR Supplement Regulation (48 CFR 18) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the name of the regulation.

(End Of Clause)

I.4 OMBUDSMAN (NFS 1852.215-84) (JUN 2000)

(a) An ombudsman has been appointed to hear and facilitate the resolution of concerns from offerors, potential offerors, and contractors during the preaward and postaward phases of this acquisition. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman is not to diminish the authority of the contracting officer, the Source Evaluation Board, or the selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of formal contract disputes. Therefore, before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution.

(c) If resolution cannot be made by the contracting officer, interested parties may contact the installation ombudsman,

James W. Kennedy
Kennedy Space Center
Code: AA-A
Kennedy Space Center, FL 32899
Voice: (321) 867-2355
Fax: (321) 867-7787
Email: james.w.kennedy@nasa.gov

Concerns, issues, disagreements, and recommendations which cannot be resolved at the installation may be referred to the NASA ombudsman, the Director of the Contract Management Division, at 202-358-0422, facsimile 202-358-3083, e-mail sthomps1@hq.nasa.gov. Please do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the contracting officer or as specified elsewhere in this document.

Performance Work Statement

For

Kennedy Space Center Integrated Communications Services (KICS)

1.0 CONTRACT OVERVIEW

Kennedy Space Center (KSC) Communications Vision:

The Kennedy Space Center desires to acquire world-class support for existing systems and services, modernize its communications infrastructure, increase communication services customer satisfaction, develop a service-based communication support model, and use this model to meet future communications needs.

The desired end state, after modernization, is analogous to service levels and standards of the telecommunications industry (i.e. shared, high capacity infrastructure, 99.999% availability, coherent access to large quantities of dissimilar information including: voice, video, telemetry, audio, and data). KSC seeks establishment of relationships and/or affiliations with the communications industry and related technology providers. The primary role of these relationship(s) will be to infuse knowledge, advanced technologies, and operational methodologies into KSC's communications systems in order to achieve KSC's modernization goals of increasing services, reducing cost and meeting PWS requirements. Candidate areas for application of this expertise/knowledge include: WAN/MAN design; development and implementation; emerging communications technology implementation; and large scale deployments (premise wiring, infrastructure upgrades, LAN/MAN/WAN). "Affiliate," as used in this PWS, means a party obtained via subcontract or other legally binding agreement that will support design, implementation, and operations activities associated with this KSC Vision.

A wide range of customers will be serviced under this contract, including multiple NASA programs, DOD, contractors, academia, other government agencies and varied space related industry entities. The contract scope includes a wide spectrum of services and capabilities that are categorized as "communications" and vary from well-defined delivery order type items to efforts that involve the discovery and development of the future.

The contractor shall perform contract Phase-In and operational support activities so as to assure a seamless transition to and implementation of the new contract without any impact to existing communications infrastructure or mission operations.

The contractor shall perform communications and IT system design, development, operations, planning, maintenance, modernization, engineering, and life cycle management for the Kennedy Space Center and NASA Initiatives. The goals associated with this effort include increased responsiveness to customer needs, increased levels of customer service and satisfaction, and operational support for multiple concurrent users.

The contractor shall implement, maintain and utilize IT security hardware and software techniques, upgrades, plans and tools to ensure the highest integrity and security of KSC IT communication systems and services.

The contractor shall perform its responsibilities in the most cost-effective and efficient manner while supporting the government's top priorities for safety, security, mission success, customer satisfaction and infrastructure stewardship. These responsibilities include the following: program management; design, engineering, operation and maintenance of assigned facilities, ground systems; information technology; logistics; and institutional support.

The contractor shall perform all necessary program management including technical and business functions to plan, implement, track, report, and deliver the required products and services described in this Performance Work Statement (PWS). The contractor shall provide all personnel and other resources, except as otherwise specified in the contract, necessary to accomplish these functions. The contractor shall execute these management functions while maintaining flexibility and responsiveness to changing requirements.

The contractor shall implement a comprehensive safety and mission assurance program that emphasizes safety, health, and environmental stewardship in accordance with the NASA Safety Hierarchy described below in Section 3.0.

Under this contract, the contractor shall have broad mission and day-to-day responsibilities of increasing customer satisfaction, performing communications system and IT development, providing operations and modernization for the government and designees. Therefore, the general scope of the contract covers any communications or IT services or related activities arising from the PWS in support of human exploration and development of space, earth and space science exploration, or related enabling functions.

This contract will require the contractor to maintain and operate KSC's communications infrastructure to support KSC communications needs while migrating towards a service based model over the life of the contract. Implementation of this vision will require the contractor to collapse existing systems and their supporting infrastructure into a common communications infrastructure without negatively impacting operational support levels. As this process progresses, the capabilities provided by these systems will move away from a "Cost Plus" model and toward a priced-service model. Key outcomes desired from this migration include improved flexibility of communications systems and infrastructure and improved responsiveness.

2.0 BUSINESS MANAGEMENT

The contractor shall perform all business functions necessary to execute and administer the Kennedy Integrated Communication Services (KICS) contract under the guidelines of the center's safety, health, and environmental policies.

The contractor shall manage and control intra-company, subcontractor, and vendor activities required to fulfill the contract. The contractor shall be accountable for the quality and timeliness of the goods, services, and Indefinite Delivery/Indefinite Quantity (ID/IQ) efforts under this contract. The contractor shall provide visibility for the government into all aspects of intra-company, subcontractors, and vendor activities.

The contractor shall provide the government with a quarterly KICS contract review, which includes, but is not limited to: financial status, indirect rate reviews and contract cost forecast (with estimate to complete), cost savings and cost avoidance initiatives, systems status, on-going projects, completed projects, planned or proposed projects, risk management status and risk mitigation planning/status, and safety and health data.

The contractor shall provide monthly status reviews and develop, maintain and report performance-based metrics associated with cost, schedule, and quality performance. The contractor shall define and implement project controls for managing changes to the overall contract cost and schedule.

The contractor shall perform to the communication service standards as shown in the Surveillance Plan, Attachment J-5, Table 1, and deliver communication services in accordance with Attachment J-5, Table 2.

The contractor shall implement KICS requirements and further KSC's goals in reaching the KSC business management objectives of:

- Providing safety, health, and environmental stewardship
- Providing quality communication systems with no impacts to operational activities
- Providing flexible communication resources to meet customer requirements
- Providing personnel and processes that are timely and responsive to customer needs
- Providing expertise in communication systems
- Modernizing KSC communication systems infrastructure
- Delivering communication services within contract value
- Providing state of the art technology in communication systems
- Beginning and finishing projects on schedule and within budget
- Providing communications infrastructure stewardship
- Managing costs, including labor rates and indirect cost growth

2.1 Phase-In Plan

The contractor shall develop and implement a Phase-In Plan, which defines the contractor's approach to and estimated costs of phasing communication services from the incumbent contractor while minimizing operational impacts to various center customers. The Phase-In shall be complete within 90 days of contract start to include migration of all existing work control communication services data and records to the new KICS work control system. The work control system shall be fully operational by completion of the Phase-In period. The Phase-In Plan will address partnering with the incumbents and provide a time estimate for implementation. The contractor shall provide a Phase-In status to the government at a minimum of once per week.

2.2 Financial Management

The contractor shall develop, implement, and maintain an integrated financial management system for planning, tracking, compiling, and reporting contract costs. The contractor shall provide all other necessary financial support required by the government to meet the budgeting, cost reporting, billing, and disclosure requirements of the contract. The contractor shall develop and submit reports to the government per the Work Breakdown Structure (WBS) provided in Appendix 6. The contractor shall provide financial systems that support NASA's transition to full cost accounting.

The contractor shall provide financial reports in accordance with the requirements of the Financial Report (DRD M-1), and NF533. The contractor shall complete selected portions of NPD 9501.3A, Earned Value Management as directed by the Information Technology and Communications (IT&C) representative.

The contractor shall develop and implement a rolling five-year Technical and Cost Plan (DRD M-2) to define planned work and estimate the cost of work to be performed or planned during the subsequent five years. This plan shall be revised and updated every year. The contractor shall support the government's development of yearly operating plans with respect to cost and workforce assessment of KICS related responsibilities. The contractor shall support cost impact assessment of requirements changes, hardware modifications or upgrades, special studies, and Indefinite Delivery/Indefinite Quantity (ID/IQ) support. Requests involving ID/IQ cost estimates shall be addressed and provided to the government within 14 calendar days.

The contractor shall conduct a Monthly Financial Review meeting within 14 calendar days after the close of the reporting month to provide the government Contracting Officer's Technical Representative (COTR) insight into contract cost and workforce utilization. The contractor shall provide accurate expenditures and forecasts of labor and material costs and workforce utilization. The contractor shall develop and propose cost and workforce utilization metrics, including trend analysis, to the government for revision and agreement. The proposed metrics will reflect sustaining engineering, operations and maintenance activities, and ID/IQ support.

2.3 Technical Management

The contractor shall implement the contract requirements in a manner that ensures all activities required by this PWS are properly accomplished and recorded. The contractor shall implement a sustaining engineering and maintenance program. The contractor shall manage contract resources to account for surge, non-standard, and recovery requirements in addition to collecting, tracking and enforcing warranties provided for services, maintenance, or equipment related to communication services covered in the contract. The contractor shall recommend, develop, and implement innovative approaches consistent with government regulations that improve services and customer satisfaction provided under this contract.

After contract award, the contractor shall recommend, procure, incorporate, and operate commercially available systems as replacements for all obsolete Government Furnished Property (GFP) as delineated in Appendix 5. The contractor shall develop and identify components and systems requiring replacement or upgrade. The contractor's assessment of GFP to be replaced, or subsequently identified as obsolete, requiring upgrades, will be part of the Technical and Cost Plan. The government will approve any upgrade or replacement of GFP.

The contractor shall provide the government unrestricted on-line access to all data generated in the performance of this contract and utilize web-based interfaces whenever possible. Contract deliverables shall be made available to the government using automated, on-line systems, and may utilize existing KSC systems (e.g. TechDoc).

The contractor shall participate in weekly status (configuration and availability) meetings with associated communications systems government organizations.

2.3.1 Work Control

The contractor shall implement a work control process. This process must plan, schedule, execute, monitor, document and improve KICS-provided communication services. This process shall include In-Family and Out-of-Family (see Section 4.0) services and developmental activities, and shall exhibit sufficient flexibility to adapt to future contract requirements. The contractor shall utilize MAXIMO® as the KICS work control system. The government shall provide the software license to implement MAXIMO® for the current communications support services operating environment.

The contractor's work control system and business processes shall track and predict personnel and system resource usage and shall incorporate and utilize a resource leveling function across operations and maintenance, sustaining engineering, program support and ID/IQ. The contractor's work control system shall have the capability to provide online reports to identified government and customer users. The contractor's work control system shall provide and the contractor shall implement work control data migration to the KICS successor contractor.

The contractor shall provide an integration function for all communication services under contract. The integration function shall provide status to the government on all scheduled work, outages, and other items pertinent to the contractor's provision of communication services.

The contractor shall ensure critical communication services (e.g. security, fire alarms, OIS-D, paging and area warning, OTV, and other critical systems identified in Attachment J-1, Section 4.0) are available and operational 24 hours per day, 7 days per week. The contractor shall staff an existing communications control center 24 hours per day, 7 days a week to document customer requests for service. The communications control center shall initiate remediation activities by the appropriate KICS contractor organization or transfer the request to the appropriate KSC contractor for remediation.

For administrative communication services (e.g. phones, voice mail, video conferencing), the contractor shall respond to customer requests for service and correct service deficiencies from 6:00 a.m. Eastern to 8:00 p.m. Eastern, Monday through Friday except when specifically approved by the government.

The contractor shall support pre-planned program customer requirements and operational processing up to 24 hours per day, 7 days a week. In response to unplanned outages, schedule disruptions or to declared contingencies, the contractor shall support up to 24 hours per day, 7 days a week. The contractor shall perform outages and execute maintenance actions during non-mission critical and off-shift timeframes in order to minimize risk to program operations and to limit impacts to center wide processes (reference Section 2.3.5, Outage Management).

The contractor shall provide a weekly work schedule, with associated resource usage, for each system. The work schedules shall contain all work with the exception of In-Family and Task Order work items. The work schedules shall show all planned work for the current fiscal year as well as the previous week. All completed work shown on the schedules shall be indicated as such. The contractor shall also integrate all KICS system work schedules and provide, on a weekly basis (or less frequently, as determined by the IT&C government representative), an integrated master KICS work schedule.

The contractor shall provide a technical status report to the government on a weekly basis. The report shall address, but is not limited to, project status, significant maintenance actions, system anomalies, customer support issues, near-term outages, issues and concerns, and planning status of future work. The contractor shall provide minutes and track and maintain an action item log through completion of corrective action.

The contractor shall schedule activities to include the following minimum information:

1. Work orders to be executed
2. Task duration, including start and end times

3. Identification of hazardous operations and associated control area requirements
4. Task leader and phone number
5. Personnel resources, by function, required for each activity
6. Parts required to implement the task
7. Related system outages and impact times

The contractor shall provide schedule activities information to the government during the weekly status meetings. Scheduling information shall also be incorporated into the weekly work schedule described above.

2.3.2 Requirements

The contractor shall develop and maintain a process for collecting and documenting customer requirements. The contractor shall be responsible for the entirety of communication systems from data source to delivery at the customer interface point. The contractor shall assist KICS customers in development of communication system requirements and documentation of requirements in official databases.

The contractor shall respond to requirements in the Program Requirements Document (PRD) using the Automated Support Requirements System (ASRS) in accordance with KSC GP60-3, Automated Support Requirements System Handbook. The contractor shall provide a closed-loop, tracking mechanism to ensure requirements are documented in work control procedures, implemented, and verified within the database.

The contractor shall develop and implement a web-based tool for KICS customers to document and track communication support requirements and obtain work schedules to be operational 6 months after contract award.

For program mission support or major institutional customer requirements that cannot or will not be met, the contractor shall prepare, process, and provide justification for approval by the IT&C government representative.

On an as-requested basis, the contractor shall provide the government with status of completed and open requirements to include estimated hours and/or cost to complete.

2.3.3 Reviews

The contractor shall provide support and technical input with respect to communication systems at various reviews. These reviews include, but are not limited to, those listed in Table 2.1.

FUNCTION	REVIEW
STS	Flight Hardware Move/Mate Readiness Review
	S0017, Terminal Count Demonstration Test (TCDT) Pre-Test Briefing

Table 2.1: Reviews

2.3.4 Meetings

The contractor shall provide support and technical input with respect to communication systems at various program and institutional meetings at KSC. These meetings include, but are not limited to, those listed in Table 2.2. The contractor shall respond to action items identified at meetings.

FUNCTION	MEETING
STS	Launch Countdown Working Group (LCWG)
	Launch Commit Criteria Working Group

ISS/Payloads	Ground Operations Working Group (GOWG)
	Technical Interchange Meeting (TIM)
	ICS Status Meeting

LSPO	Ground Operations Working Group (GOWG)
	Technical Interchange Meeting (TIM)
	Communication and Telemetry Requirements Meeting
Institutional	Outage Planning Meetings
	Major Moves
	Weekly Systems Status Meeting
	IT&C Prelaunch & Postlaunch Photo Review

Table 2.2: Meetings

2.3.5 Outage Management

The contractor shall plan and implement communication system and facility outages at KICS supported facilities. To ensure outages have been properly coordinated and approved by KSC customers prior to implementation, the contractor shall develop an outage identification, review and customer approval process, and participate in other contractor's outage planning sessions and reviews. The contractor shall ensure outages are scheduled, initiated and recovered during periods of non-critical program or center processing and shall ensure communication systems maintenance, update, test, checkout and repair are completed as defined by requirements in the PRD and Section 4.0. The contractor shall recover from unplanned outages in a manner that limits impacts to critical center or mission processing operations. For each outage, the contractor shall maintain a list of impacted systems and approving organizations. The KICS outage task leader shall ensure all affected parties are notified when planned outages exceed planned timelines or when unplanned outages occur.

2.3.6 Training

The contractor shall provide a reliable work force that is trained and competent, certified and licensed as required, and experienced and knowledgeable about the work to be accomplished, so as to meet all responsibilities under the contract throughout the life of the contract. The contractor shall manage training and certification to be cost-effective, and to ensure that the appropriate skills, experience, and knowledge are available when and where they are needed. The contractor will further manage training and certification to ensure that current skills and knowledge are maintained as technology advances and infrastructure modernization progresses. The contractor shall plan and implement training and certification as described here and in Section 8.0 of this Performance Work Statement.

The contractor shall maintain a technical reference library to support contractor personnel and for customer education and use. The contents of the library shall be cataloged to facilitate library use. The library shall contain documents not released through the

Engineering Data Center (EDC) process, or made available via the CMDS or Tech Doc systems, such as Commercial Off-The-Shelf (COTS) equipment and software manuals, vendor drawings, KICS-developed documents, and other documentation and publications and software that apply to the products and services utilized or delivered by the KICS contract.

2.3.7 Configuration Management

The contractor shall perform configuration management on all assigned hardware and software. The contractor shall provide configuration documentation for all communication systems and components operated under this contract such as, but not limited to: engineering drawings, circuit path routing, and access control, (DRD M-3). The contractor shall maintain the documentation of assigned systems to the "as-built" configuration. The contractor shall maintain the existing Operations, Maintenance and Engineering Matrix (OMEM), which delineates equipment configuration designation. The contactor shall appoint an administrator responsible for maintenance and updates to the Configuration Management Data System (CMDS). The appointed individual for CMDS will need to be trained and certified to perform the administrator's functions. The contractor shall make configuration management data and information available to the government as requested.

The contractor shall provide a configuration control board and implement a configuration control process to receive, evaluate, prioritize, track and implement configuration control for communications systems.

2.3.8 Security Management

The contractor shall operate a security program in accordance with governing Agency, Department of Defense (DOD), Department of Homeland Security, and KSC directives as revised. The contractor shall develop, update and implement a Security Plan (DRD-M-4), which provides security planning for all personnel, facilities, equipment, and communications systems to assure compliance with, but not limited to, the following: NFS 1852.204-76, Security Requirements for Unclassified Technology Information Resources, FAR 52.204-2, Security Requirements, NFS 1852.223-75, Major Breach of Safety or Security, NPG 1620.1, Security Procedures and Guidelines; KHB 1610.1, KSC Security Handbook; NPG 2810.1, Security of Information Technology, and KSC Chief Information Officer (CIO) policies. The contractor shall submit IT Security Plans for review and approval by KSC's IT Security Manager. The contractor shall implement IT specific security in accordance with the requirements of the PWS, Sections 4.0 and 6.0.

The contractor shall ensure personnel have the required Personnel Reliability Program (PRP) and security clearances for access to controlled facilities and systems at Kennedy Space Center.

2.3.9 Emergency Management

The contractor shall develop, update and implement an Emergency Preparedness Plan (DRD M-5) in compliance with JHB 2000, Consolidated Comprehensive Emergency Management Plan and JDP-KSC-P-3014, Generic Emergency Procedures Document. The plan shall include the contractor's assigned communication systems, hardware, software, infrastructure, equipment, data storage and operations. The contractor shall plan for and participate in drills and implement the Emergency Preparedness Plan for declared institutional and customer emergencies.

The contractor shall ensure that the Emergency Preparedness Plan includes plans to respond to significant loss of capability due to accident or incident, equipment or infrastructure failures, attacks against computer systems and networks, loss of capability due to natural disaster, and other center-level emergency situations, and include plans to conduct timely recovery.

Under Center-declared or program-declared emergency conditions, the contractor shall respond and implement real-time identified requirements at the direction of the CO, COTR or IT&C government representative.

The contractor shall designate a KICS Emergency Coordinator responsible for supporting emergency preparedness planning and implementation.

2.3.10 Data Management

The contractor shall develop, update and implement a data management program, which provides for the management, preparation, publication, control, and distribution of data generated during the performance of this contract in compliance with NPD 1440.6, NASA Records Management. The contractor shall develop and maintain data repositories to support contract requirements including Data Requirements Document (DRD)/Data Requirements List (DRL) related products. The contractor shall provide for the handling and control of customer and proprietary data and software. The contractor shall provide a Data Accession List of documents produced and maintained for this contract.

The contractor shall identify an export control focal point to represent the contractor at the KSC Export Control Working Group (ECWG).

The contractor shall maintain the documentation baseline and ensure all new data storage (hardcopy and electronic) and KICS work control information. The contractor shall maintain compatibility with work control management systems of Shuttle, ISS, Institutional, and Launch Services Program Office contractors. The contractor shall maintain and integrate all legacy and historical system documentation data into any new documentation and workflow process.

The contractor shall maintain existing documentation and all documentation developed as part of the contract. The contractor shall provide the library functions to catalog, store

(electronic format), and maintain data. Existing hardcopy documentation, which cannot be converted to electronic format, may remain in hardcopy only with the approval of the Information Technology and Communications directorate. The contractor shall make the data available to the government as requested.

The contractor shall maintain and operate a repository for engineering documentation that includes a formal release process. The contractor shall update and revise documents, and purge outdated documents, as required. The contractor's repository and release system shall utilize existing EDC and CMDS engineering documentation systems and shall include basic engineering drawings and all released revisions, for contractor drawings, vendor drawings, shop drawings and work orders.

The contractor shall create and provide to the government unrestricted, on-line access to data stored and produced under this contract. All data made available to the government under this contract shall be retrievable, editable, and compatible with government hardware and software systems as identified in the requirements listed in Section 6.0, Contract Level Information Technology. This on-line access capability shall first be made available at the completion of the phase-in period and then maintained throughout the duration of the contract.

The contractor shall create, submit for government approval and implement the communication systems Data Impoundment Plan (DRD M-6) by the completion of the phase-in period. The plan shall address data associated with communication systems that control data access, capture communication system configuration, and restrict data release to specified organizations.

2.4 Quality Management

The contractor shall ensure the communication systems processes and procedures provide quality services and products to the government, continuously improve these products and services, ensure the safety of its personnel and assets, provide a healthy work environment for its personnel, provide environmental stewardship with respect to the KSC communication systems and other assigned sites under this contract, and ensure customer satisfaction.

The contractor shall develop, maintain, and implement a Quality Management Plan (DRD M-7).

2.4.1 Customer Satisfaction

The contractor shall provide the communication services defined and described in this PWS so as to ensure the satisfaction of Space Shuttle, International Space Station (ISS), Launch Services Program Office (LSPO), Institutional, and future KSC customers while

utilizing continuous improvement methods (Section 2.4.4) to succeed in the dynamic KSC work environment.

The contractor shall provide customer management support to the government for all program customers to include: Shuttle, ISS, LSPO, Institutional customers, and potential future KSC projects and programs. The support includes, but is not limited to: participating in internal KSC planning meetings, assisting Center customers in defining site and program processing requirements, and documenting site requirements.

2.4.2 Quality Assurance

The contractor shall establish, certify and maintain a Quality Management System (QMS) that, as a minimum, certifies and adheres to the requirements of ANSI/ISOASQ 9001-2000 American National Standard Quality Management Systems – Requirements, and revisions, throughout the contract duration. The contractor's initial QMS shall become registered by a Registration Accreditation Board (RAB)-certified third party registration body within 12 months of the effective date of the contract. The contractor's full, certified version of the QMS shall be registered within 18 months after contract award by a Registration Accreditation Board (RAB)-certified third party registration body. The registration scope shall be the contractor's quality system scope as defined in the contractor's quality manual. The QMS procedures, planning, and all other documentation and data that comprise the QMS shall be made available to NASA for review on an as-requested basis. Existing quality documents that meet the requirements of this contract may continue to be used. NASA may perform any necessary inspections, verifications, and evaluations, to ascertain compliance to requirements and the adequacy of the implementing procedures. In addition, the contractor's QMS shall make provisions for the following supplements to the 9001-2000 elements:

1. Customer Verification of Subcontracted Product - The contractor shall submit procurement documents to the designated NASA representative for determination of the need for Government Source Inspection (GSI) prior to release of the procurement.
2. Procurements, which require GSI, shall include the following statement, "The Government has the right to inspect any or all of the work included in this order at the supplier's plant."

The contractor shall collect and compile evidence derived from empirical data including, but not limited to: test results, analysis reports, inspection records, and delivery logs to establish that the products and services delivered to the government are in compliance with the requirements and specifications of the KICS contract.

The contractor shall develop, implement and update a process to control and improve the quality of products and services provided under this contract. The contractor shall develop a set of parameters with government concurrence, to be monitored by contractor quality personnel for the measurement and verification of critical processes that control key product characteristics. The measurements shall include, but not be limited to, data

on product and service quality, workmanship errors and rework. The process shall be auditable by the government and documented by the contractor.

The contractor shall participate in the Government/Industry Data Exchange Program (GIDEP) and NASA advisory reporting systems in accordance with NPG 8735.1, Procedure for Exchanging Parts, Materials, and Safety Problem Data Utilizing the Government-Industry Data Exchange Program and NASA Advisories.

The contractor shall notify the government of mission critical hardware/software anomalies and make available all trouble tickets on said hardware/software. The contractor shall provide the government status on such problem reports and notification of anomaly correction in a timely manner.

In the event of a program or center incident or contingency, the contractor shall support any government investigation and make available all pertinent documentation.

2.4.3 Reliability and Maintainability

Within one year of contract start, the contractor shall develop and implement a reliability and maintainability program that meets the requirements of NPD 8720.1, NASA Reliability and Maintainability Program Policy, and NASA-STD-8729.1, Planning, Developing, and Managing an Effective Reliability and Maintainability (R&M) Program. The contractor shall develop and implement a process that ensures the reliability and maintainability throughout the lifecycle of the communication systems and equipment for which the contractor is responsible. The process shall include assessments of reliability and maintainability performance against baseline allocations; preparation of reliability and safety analysis assessments and trend analyses; and participation in failure reviews.

2.4.4 Continuous Improvement

The contractor shall develop, update, and implement a continuous improvement program in accordance with ANSI/ISOASQ 9001-2000 American National Standard Quality Management Systems – Requirements.

The contractor shall initiate action, including requesting government approval, to change requirements that are indicated, by trending and data analysis, to be unreasonable or unnecessary, and to improve processes that result in products or services that fail to meet requirements.

2.4.5 Work Documentation and Authorization

By completion of the phase-in period, the contractor shall develop and implement a work order process that documents, controls, authorizes, schedules, executes, and reviews all work performed on communication system hardware, software, and facilities. The contractor's process shall perform configuration control of work orders, to include work order publication, revision, and release. The contractor shall ensure work orders provide

detailed instructions for all activities, identify hazardous activities and associated control areas, track as-built configuration, and verify approved requirements are satisfied.

2.4.6 Foreign Object Debris (FOD) Prevention

The contractor shall ensure its personnel adhere to the KSC FOD prevention program in accordance with KHB 5310.1D, Reliability, Maintainability and Quality Assurance Handbook, General Operating Policy 5-4.

2.4.7 Energy Conservation

The contractor shall develop and implement an energy conservation program. The contractor shall, on an as-requested basis, report to the government on measures taken to reduce energy consumption and provide quantified or estimated cost savings data. Energy conservation shall not be applied at the expense of quality and customer support. All new equipment, where applicable, shall have a high-energy efficiency rating.

2.4.8 Performance Metrics

The KICS contractor will develop, maintain, analyze and report performance for contract requirements and provide quarterly management reviews. The KICS contractor shall provide clear quantifiable metrics, which incorporate any contractually defined metrics in partnership with the IT&C Directorate. The contractor shall prepare a written document defining the agreed upon performance metrics which shall be approved by the Contracting Officer prior to implementation. The contractor will report existing or potential problem areas and identify corresponding trends. The report will also provide recommended solutions with estimated costs and completion times. The contractor shall submit a consolidated quarterly electronic Contract Performance Metrics Report to the Contracting Officer. The contractor shall also provide supporting data to substantiate compliance with the identified metrics. The contractor shall provide on-line access to the Contract Performance Metrics Report and supporting data to NASA-KSC personnel and other government personnel approved by the Contracting Officer. The Contract Performance Metrics Report will be developed in accordance with DRD M-8.

2.5 Risk Management

The Contractor shall develop and implement management approaches, including the criteria, methods, and procedures for identifying, analyzing, planning, tracking, controlling, communicating, and documenting KICS-related risks associated with:

- Contract Transition/Phase-In
- Contract Administration
- Performance of PWS Requirements

- Contract Financial Management

The contractor shall develop, implement, and update a Risk Management Plan (DRD M-9) in accordance with NPG 7120.5, NASA Program and Project Management Processes and Requirements (Section 4.3, Risk Management) and NPG 8000.4, Risk Management Procedures and Guidelines. The Risk Management Plan shall provide an organized, systematic decision making process that efficiently manages risks associated with the KICS at KSC.

The contractor shall identify and discuss risk factors and issues, for the areas delineated above, which are relevant with the performance of assigned duties during various management meetings and contract reviews. The discussion shall include methods to mitigate/manage identified risks, including presentation of risk mitigation status at periodic meetings and reviews.

3.0 SAFETY, HEALTH, AND ENVIRONMENTAL STEWARDSHIP

NASA has established its safety priorities as follows:

(1) **Safety for the Public**

(2) **Safety for Astronauts and Pilots**

(3) **Safety for the NASA and Contractor Workforce**

(4) **Safety for High-Value Equipment and Property**

The contractor shall assist KSC in reaching its safety goals by ensuring freedom from those conditions that can cause death, injury, occupational illness, damage to or loss of equipment or property, or damage to the environment.

3.1 Safety and Occupational Health

The contractor shall develop, implement, and maintain a comprehensive safety and occupational health program, which ensures the protection of personnel, property, equipment, and the environment. The contractor shall submit a Safety and Occupational Health Plan (DRD SHE-1), which describes its approach to maintaining the health and welfare of its employees and assets.

The contractor shall comply with KHB 1710.2, KSC Safety Handbook and all applicable federal, state, and local government safety laws, regulations, and policies.

The contractor shall comply with all safety and mission assurance ground operations requirements of the STS, ISS, and LSPO programs.

The contractor shall comply with the maximum work time rules in accordance with Section 3.4 of KHB 1710.2, KSC Safety Practices Handbook. The contractor shall maintain a list of critical positions and make this list available to the government as requested.

The contractor shall take, or cause to be taken, any other safety, and occupational health measures the government may reasonably direct.

The contractor shall investigate all work-related incidents, accidents, and close calls, to the extent necessary to determine their causes and furnish the government a report in a timely fashion, in such form as the government may require, of the investigative findings and proposed or completed corrective actions.

The contractor shall implement any corrective actions directed by the government.

The contractor shall assist authorized government representatives in examination of sites or areas where work under this contract is being performed in order to determine the adequacy of the contractor's safety and occupational health measures.

The contractor shall obtain safety approval on all hazardous procedures prior to execution.

The contractor shall institute a risk management process for assuring personnel and property will be protected from injury or harm as a result of exposure to hazards in accordance with Agency and KSC guidelines, policies and directives reflected in this section. The risk management process shall be implemented at contract start and shall provide prompt and thorough investigation and reporting of accidents or "near misses" and shall incorporate methods for review, deviations and approvals of operating procedures.

The contractor shall support, participate and incorporate KSC Super Safety and Health Day into workforce education, operational planning, system availability while ensuring contract requirements are met.

3.1.1 Voluntary Protection Program

The contractor shall have a robust safety and health program that could be certified to the most recent OSHA Voluntary Protection Program (VPP) Star certification requirements within 24 months after contract start. The contractor shall demonstrate to the government compliance with OSHA Star certification requirements in the same format required for the OSHA Star certification application within 18 months after contract start. The contractor shall document its progress toward and maintenance of compliance with VPP Star certification requirements in quarterly Safety Statistics Report (DRD SHE-2). If the contractor obtains OSHA VPP Star certification, the contractor shall provide the government with a copy of all reports submitted to OSHA for the purpose of maintaining Star certification.

3.1.2 Systems Safety

The contractor shall develop and implement a process at contract start, as documented for the identification, mitigation and control of hazards throughout the complete life cycle (design, development, manufacture, test, operations, maintenance, and disposal) of the facilities, equipment and processes for which the contractor is responsible. The process shall include quantitative or qualitative risk assessments, hazard analyses, and other analytical methods. The contractor shall select the type of assessment based on the identified level of risk. The contractor shall make all system safety assessments available for review.

3.1.3 Operations Safety

The contractor shall develop and implement a process in which testing, operations, and maintenance activities are assessed for hazards. The process shall identify how personnel and property will be protected from injury or harm as a result of exposure to these hazards. The process shall identify how personnel and property will be protected from injury or harm as a result of exposure to these hazards. The process shall provide for hazardous operation surveillance, hazardous procedure review, and risk assessments associated with deviations from procedures or safety and health requirements. The contractor shall document the assessments and make the assessments available for government review as requested.

3.1.4 Mishap Investigating and Reporting

The contractor shall investigate and report mishaps, in accordance with NPG 8621.1, NASA Procedures and Guidelines for Mishap Reporting, Investigating, and Record keeping, NPD 8621.1, NASA Mishap and Close-Call Reporting, Investigating, and Record Keeping, and KHB 1710.2, Kennedy Space Center Safety Practices Handbook. All mishaps and close calls shall be entered into the NASA Incident Reporting Information System (IRIS) database. The contractor shall conduct human factors analysis of all mishaps and close calls. This will include performing root cause analysis and implementing remedial/corrective actions for all mishaps and close calls. All root causes shall be identified and mitigated with the goal of recurrence prevention.

When arising out of work performed under this contract, the contractor shall immediately notify and promptly report to the government any accident, incident, or exposure resulting in fatality, lost-time occupational injury, occupational disease, contamination of property beyond any stated acceptable limits set forth in the contract schedule; any property loss of $25,000 or more; or any close call (a situation or occurrence with no injury, no damage or only minor damage (less than $1,000) but possesses the potential to cause any type mishap, or any injury, damage, or negative mission impact, that may be of immediate interest to NASA. The contractor shall provide quarterly reports specifying lost-time frequency rate, number of lost-time injuries, exposure, and accident/incident dollar losses as specified in the contract schedule for work conducted on premises owned or controlled by the government.

The contractor shall develop and implement a call tree with government contacts for the reporting of a mishap, a close call incident, an equipment problem or a system going out of specification. The contractor shall report incidents and problems within four hours of the occurrence.

The contractor shall provide summary data on mishaps, incidents or close calls (DRD SHE-3).

3.1.5 Lessons Learned

The contractor shall develop, update and implement a process to capture, disseminate, and implement safety and occupational health lessons learned in accordance with NPG 8621.1, NASA Procedures and Guidelines for Mishap Reporting, Investigating, and Recordkeeping, and NPG 7120.5, NASA Program and Project Management Processes and Requirements. The contractor shall enter the lessons learned into the government provided Lessons Learned Information System operated by the Goddard Space Flight Center (GSFC).

3.1.6 Industrial Hygiene

The contractor shall develop, update and implement an industrial hygiene process in accordance with the requirements of NPG 1820.1, Hearing Conservation, KHB 1840.1, Industrial Hygiene Handbook, KHB 1820.3, KSC Hearing Loss Prevention Program, and KHB 1820.4, KSC Respiratory Protection Program.

3.2 Environmental Stewardship

The contractor shall develop and implement an environmental protection program to ensure the welfare of the KSC environment and of other locations where work is performed in support of this contract in accordance with KMI 8800.8, KSC Environmental Management and KHB 8800.6, KSC Environmental Control Handbook. The contractor shall comply with all applicable federal, state, and local government environmental laws and regulations. The contractor shall prepare and submit, to the appropriate regulatory agency, any and all documentation required in support of this contract.

The contractor shall support KSC recycling and remediation initiatives.

The contractor shall apply for and maintain all necessary permits required by Federal, state or local rules and regulations. Permits shall be submitted through the NASA/KSC Environmental Program Office.

The contractor shall handle all waste streams generated by their processes in accordance with KHB 8800.7, Waste Management Handbook.

4.0 COMMUNICATIONS SYSTEM SERVICES

The contractor shall provide Communications System Services, which include, but are not limited to System Operations, Sustaining Engineering, Customer Requirements Tracking, Communications Control, Maintenance, and Analysis and Assessment. The communication services provided under this PWS support operational and institutional communications system customers at KSC and NASA occupied facilities that are provided in the bidders library.

The operational communication systems provide communication capabilities for ground processing, testing, launch, and landing (including contingency landing sites), and expendable launch vehicle activities. The institutional center-wide communications systems provide services for all KSC users, including KSC and NASA occupied facilities on CCAFS, CONUS and TAL.

The contractor shall provide communication system services up to customer end-equipment interfaces, Customer Owned and Maintained (COAM) interfaces, and external and other service provider demarcation points (Attachment J-2). The contractor shall maintain, operate, configure, de-configure, integrate, de-integrate, implement modifications to, refurbish communications, decommission, and dispose of obsolete system hardware and software listed in Attachment J-1 Appendix 5.

The contractor shall provide end-to-end traceability for all communication system requirements and related work. The contractor shall provide system status on communication system tasks including but not limited to trouble tickets, in-family work, out-of-family work, missions and upgrade project tasks. The contractor shall prepare, update, and provide performance-to-plan and open item status reports for pre-launch briefings and post-launch and landing reviews.

The contractor shall coordinate and obtain all necessary support from other contractors and government organizations providing services at KSC and NASA occupied facilities on CCAFS, CONUS and TAL. The contractor shall track all support requests, both internal and those forwarded to other contractors or government organizations, for all assigned communication systems related work.

4.1 Communications Systems and Services Activities

The contractor shall provide operations, maintenance, sustaining engineering, communications control, customer requirements support, engineering analysis and assessment, and documentation for all KICS systems.

The contractor shall provide readiness status of KICS systems to activity review boards that are responsible for mission readiness. KSC Ground Support Readiness Review

meetings are held approximately 10 days prior to launch countdown Call-to-Stations. The readiness status shall include, but not be limited to testing results and status of training, certification, hardware/software and procedures. The contractor shall report the operations readiness for KSC Ground Support communications systems to support launch and landing functions, including nominal and contingency/emergency. The KCS Communications Operational Readiness Review shall describe the operational readiness of all facilities, personnel, procedures, hardware, firmware, software and documentation required to support a specific launch. The KSC Communications Operational Readiness Review shall contain all information required to document the operational readiness of all facilities, hardware, firmware, software, personnel, and documentation to support KSC launch and landing services. KSC Communications Operational Readiness Review shall contain status of: Operator Training and Certification, System Validation Results, Discrepancy Reports, Open Work, Corrective Actions, IT Security, Physical Security, and Facility readiness.

4.1.1 Operations

The contractor shall ensure that all KICS communications systems are operationally ready for scheduled customer and contractor processing activities. The contractor shall provide end-to-end communications configuration, validation, and support. The contractor shall schedule communication services to accomplish KICS requirements and avoid impact to operations and administrative activities.

The contractor shall perform and implement out-of-family work for assigned systems. Out-of-family work includes changes that affect the system baseline design and/or system architecture and adds, moves and changes that require major configuration change or engineering. An architecture change is the addition of new capability, change in system topology, system modification, or system software change. Out-of-family work requires a NASA signature on the work plan, work order, the work order resubmission number, etc. The contractor shall accept NASA direction from an Integrated Data System (IDS) communications Technical Review Panel (TRP) consisting of department manager and a NASA branch chief (if required) and or their designees who review and disposition change request and assessments. The contractor shall activate and validate out-of-family modifications or new capabilities at the end of installation and prior to hardware and system operations. The contractor shall coordinate with the user organization during final activation and validation.

The contractor shall support in-family work that provides services based on the as-designed system or fits within established capacities. NASA signature is not required. The contractor shall coordinate with the user organization during final activation and validation.

The contractor shall complete communications systems installations in new facilities including make-it-work modifications during joint occupancy and assume maintenance

responsiblity following acceptance of the facility. The contractor shall perform integrated testing, if required, after the installation of non-KICS equipment and systems.

The contractor shall coordinate and obtain authorization for all new contractor and new customer equipment radio frequency transmissions from the KSC Frequency Control Officer Spectrum Manager per the requirements of KHB 2570.1, KSC Radio Frequency Spectrum Management Handbook. The contractor shall ensure that all newly procured equipment is issued a Radio Frequency Authorization (RFA) by the KSC Frequency Control Officer Spectrum Manager. The contractor shall ensure that any contractor assigned equipment replacement item is within the spectrum bandwidth previously approved for contractor or customer use by the KSC Frequency Control Officer Spectrum Manager.

4.1.2 Maintenance

The contractor shall implement a maintenance program for all communication system hardware, software, and contractor managed support equipment. The level of maintenance provided shall ensure the reliability, cost effectiveness, serviceability, and longevity of the assigned systems. The contractor shall develop and maintain a Five Year Maintenance plan (DRD-T-2) to describe planned maintenance activities and resources required.

The contractor shall maintain the historical communication systems maintenance and repair data for trending purposes utilizing the work control process.

The contractor shall maintain warranty guarantee and maintenance contract records for assigned communication systems for any warranty, guarantee or maintenance contract period. The contractor shall investigate the failure of any covered hardware or software, and report findings to the government during the established reviews. The contractor shall notify the government of actions that void a warranty, guarantee, or maintenance contract during the established reviews.

4.1.3 Sustaining Engineering

The contractor shall provide overall communications systems engineering and integration services. The contractor shall also support and coordinate advanced technology development as per 4.1.3.3. The contractor shall perform sustaining engineering for all communications systems including software and firmware identified in attachment J-1 appendix 5 to meet the original design intent (i.e., form, fit and function). The contractor shall document their overall approach for these tasks in the Sustaining Engineering Plan (DRD-T-1). The contractor shall perform engineering and task level support to upgrade systems and equipment performance and to improve safety, reliability, maintainability, functionality, and cost effectiveness.

The contractor shall provide systems engineering, development integration, and advanced technology development support for all assigned communications systems to the demarcation point (Attachment J-2) with systems and equipment under the responsibility of other KSC contractors. The contractor shall ensure that no change on the contractor's side of the interface causes an overall system outage or degradation on the other side of the interface. The contractor maintained and updated technical data shall include those documents that identify each part and its configuration at any level of assembly required to support KSC activity.

4.1.3.1 Systems Engineering

The contractor shall provide end-to-end communications systems engineering and service integration. The contractor shall manage and document the configuration of the current architecture and planned architecture changes utilizing procedures and processes developed in the Sustaining Engineering Plan (DRD-T-1).

Typical systems engineering functions include:

- Safety and mission assurance activities
- Coordination of activities that pertain to KSC communication system interfaces with non-KICS systems
- End-to-end system requirement integration
- Requirements management, analysis and requirements/design trade studies
- Establishing systems engineering processes
- Operations and development systems standards support, coordination, and control
- Integrated architecture baseline configuration management and planning, including schedule and change control
- Design analyses, architecture trade-off, and Make or Buy assessments
- System-level functional designs development
- Engineering strategies development
- Service capacity, performance, and life cycle cost forecasting
- External interface negotiation and design
- Facilitate and coordinate the commercialization and consolidation of services across the contract, consistent with the strategic architecture
- Evaluating and testing commercial off-the-shelf (COTS) software and hardware products including development and engineering tools
- Operations concept development
- Proactive end-to-end risk analysis management and abatement
- Conduct design reviews and maintain records for communications system projects and out-of-family tasks.
- Support design reviews for existing and new facilities on KSC and NASA occupied areas as assigned.
- Preliminary and final engineering assessments

4.1.3.2 Development Integration

The contractor shall provide end-to-end technical integration for communication assets into the KICS architecture and services infrastructure. These assets may or may not have been developed by the KICS contractor.

Typical integration functions include:

- System-level integration
- System-level verification
- System-level acceptance testing
- End-to-end testing

4.1.3.3 Advanced Technology Development

The contractor shall support advanced research and technology development for potential application in future communications systems. .

Typical advanced technology development products include:

- Technology insertion recommendations
- Technology projects assessments
- Market research and trade studies
- Monitor industry forums, trade shows and standards development

4.1.4 KICS Communication Control

The contractor shall provide Communication Control functions in support of KICS communication systems and services. The contractor shall provide a single customer point of contact for all KICS communication systems and services. Communication control is the KSC interface to external communication providers. Communication control responsibilities include but are not limited to screening, logging, triage, assigning-routing, resolution, and customer feedback. The contractor shall provide Communications Control services 24 hours per day, 7 days per week.

The contractor shall serve as the focal point for communications scheduling, access to communications facilities and assets, outage coordination, customer trouble ticket processing and reporting, coordination with other KSC/CCAFS/ER helpdesks and consoles.

The contractor shall provide communication support services in support of all operational and institutional communications at KSC including the KSC LC39, Payloads Area and Industrial Area. Communication support services at KSC shall support CCAFS, CONUS, Transatlantic Abort Landing (TAL) sites and Eastern Range (ER) tests as required.

The contractor shall provide non-KICS KSC Help Desks with information that identifies supported systems and a point of contact including contact information for each system. The contractor shall provide support to the KSC IT providers in facilitating problem resolution.

Communications Control services shall meet or exceed performance standards as listed in Attachment J-5, Table J5-1.

4.1.5 Customer Requirements

The contractor shall provide communication system services up to customer end-equipment interfaces, Customer Owned and Maintained (COAM) interfaces, and external and other service provider demarcation points (Attachment J-2). The communication contractor customers include but are not limited to resident NASA and contractor users, other government agency users and transient users.

The contractor shall respond to Customer Service Requests (CSR), Program Requirements Documents (PRD), NISN Service Requests (NSR), Telephone Service Requests (TSR), and Automated Support Requirements System (ASRS) requirements and verify the accuracy of the requirements. Requirements accuracy includes: first need date, mission related requirements and technical content. The contractor shall coordinate requirements to ensure requested service delivery by User Need Date (UND) in advance of mission contingent arrival.

The contractor shall provide end-to-end tracking and status of all communication system requirements. The contractor shall provide feedback to customer on communication system requirements including but not limited to system status on trouble tickets, in-family work, out-of-family work, missions and upgrade project tasks. The contractor shall prepare, update, and provide performance-to-plan and open item status reports for pre-launch briefings and post-launch and landing reviews.

The contractor shall provide a uniform requirements acceptance process. The contractor shall ensure multiple customer requirements integration to deliver timely responses for all work-in-process.

The customer satisfaction metric in Attachment J-5, Table J5-1 covers time performance and customer satisfaction for these processes.

4.1.6 Analysis and Assessment

The contractor shall perform engineering analyses and assess communications system impacts to safety, reliability, operability, scheduling, documentation and logistics for new requirements and capabilities.

At a minimum,the contractor shall include the following in the analyses and assessments:

- Implementation strategy
- Proposed coordination with other contractors
- Effects of proposed design, implementation, and operations on other contractors systems and operations
- Cost estimate
- Installation and testing requirements
- Environmental analyses
- Documentation per existing federal and state regulations
- Any necessary trade studies

4.2 Communications Systems

The contractor shall be responsible for operating, maintaining, and sustaining an array of communications systems at KSC. These systems interface with various onsite and offsite contractors, government organizations, educational institutions, commercial businesses, vehicle, and payload customers. The contractor shall adhere to the "clear frame" practice during critical operations. The "clear frame" practice freezes configuration of all operational communications for periods of up to 72 hours for Shuttle operations and 24 hours for LSPO operations. The contractor shall propose methods over the life of the contract to minimize the impact of the "clear frame" practice. The following systems utilize a wide range of government and industry standards to deliver services to the KSC user community:

- Voice Communications
- Visual Imaging and Timing Communication services
- Transmission Systems
- Cable Systems
- Administrative Telephone System
- Institutional Computer Networks
- Network IT Security

The contractor shall provide competent staffing to comply with all of the requirements described in the "Support Requirement" section for each of the respective services areas delineated below.

The contractor shall integrate the systems listed above with other external systems based at or affiliated with KSC to meet the Center's communication requirements. A listing of GFP for KSC Communications is located in Attachment J-1 Appendix 5.

All communications services listed above shall meet or exceed the performance standards listed in Attachment J-5, Table J5-1.

4.2.1 Voice Communications

The contractor shall provide voice communications services and support end-to-end configuration and validation to meet operational and institutional requirements at KSC and the NASA occupied facilities at the CCAFS, CONUS, and TAL.

The contractor shall also provide voice communications services to the KSC News Facility and various locations throughout KSC, including, but not limited to: Point-to-point telephones, commercial audio communications, conference and Mission Briefing Room audio, Shuttle forward link and NISN network tail circuits at KSC.

The contractor shall provide voice communications services for Shuttle launch and landing at contingency landing sites in the continental US sites and transatlantic sites. The contractor shall also provide voice communications services at the Shuttle Processing Area (SPA) at the Dryden Flight Research Facility.

The systems associated with these services include, but are not limited to the following:

4.2.1.1 Operational Intercommunication System (OIS-D)

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC) and Building K6-900 (LCC)
SUPPORT REQUIREMENT:	24 hours x 5 days/week on-site; Weekend call-in. On-site 24 hours x 7 days/week during major tests, launch, and landings.

FUNCTIONAL DESCRIPTION:
The Digital Operational Intercommunications System (OIS-D) is a fully digital, multi-channel, voice conferencing communication system. It consists of two system centers, one in the LC39 area and one in the Industrial area, with a common channel interface to allow intercommunication. It supports all KSC test and launch operations facilities. The major hardware components are the Group Processor Assembly (GPA), Data Transmission Equipment (DTE), Central Summing Network (CSN), End Instrument (EI), Technical Control (TC), Record and Playback Subsystem (RPS) and Offnet Processor Subsystem (OPS).
Brief descriptions of all hardware components follow:
Group Processor Assembly (GPA) Rack - The GPA is the principle rack assembly, it provides the interface between the user End Instruments (EI) and the Central Summing Network (CSN). Each GPA can support up to 119 EIs, they are installed at each major operational KSC facility, and they provide the first level of audio summation.
Data Transmission Equipment (DTE) Rack - The DTE racks are used to support transmission on fiber between the GPA and CSN for distances over 50 feet. The equipment converts an electrical T3 to an optical signal and back to an electrical T3.

Central Summing Network (CSN) - The CSN performs the second level voice conferencing, summing all voice contributions from the GPAs. Each system center has its own CSN. The CSN creates a global sum of digital audio traffic by successively adding pairs of 512 channel DS3 inputs until a 512 channel global sum is produced.
End Instruments (EI) - The EI is an operator controlled, multichannel, microprocessor-based device that provides the interface to the GPA. They communicate with the GPA over 19-AWG twisted pair at 130 kbps bipolar bit stream. Descriptions of the six types of instruments are provided below.
(1) 51D - The 51D EI is a multimonitor, 19-inch rack mounted, single user-8 channel /dual user-4 channel unit for controlled environment (indoor) use.
(2) 52D - The 52D EI is a multimonitor, 19-inch rack mounted, single user-4 channel /dual user-2 channel unit for controlled environment (indoor) use.
(3) 53D - The 53D EI is functionally equivalent to the 52D, however, it is contained in a sealed, able to be purged, deep-drawn aluminum housing for use in hazardous environments. The unit is designed to be wall mounted or mounted on a portable cart.
(4) 55D – The 55D is a desktop unit with 4 channels and a speaker for controlled environment (indoor) use.
(5) 57D - The 57D is a rack mounted speaker monitor that can be used with a 51D or 52D unit. The unit is muted when the EI user is transmitting.
(6) 58D - The 58D is a wall mounted speaker monitor that can be used with a 53D unit, but not in outdoor locations or hazardous environments.
(7) 59D - The 59D is a desk-mounted speaker monitor for use in office areas.
Technical Control Workstations (Tech Control) - Tech Control provides overall monitoring and control capability for the OIS-D system operators. The Intel-based workstations are running UNIX System V with X Windows as the windowing environment. The machines are linked together over an Ethernet to the CSNs and OPS.
Record and Playback Subsystem (RPS) - RPS provides continuous recording of all channels in OIS-D by combining inputs from both the LC39 and Industrial Area CSN. Three digital recording units with two digital recorders in each unit will allow for recording of 1000 channels with 100% redundancy. Analog tape dubbing is provided through a separate playback recorder and analog cassette decks.
Offnet Processor Subsystem (OPS) - OPS is a redundant T1/T3 conferencing voice switch that provides both T1 interfaces out of OIS-D and individual audio channel interfaces through channel banks. This provides for off-center communications through both NISN and Transmission Management System (TMS). The interface is also used to bring radio-nets into OIS-D. OPS has a T3 interface with the two system center CSNs and has an input and output capability of 92 T1 links. Currently 26 channels banks and 38 T1s are being used to provide the off-site and audio interfaces.
OIS-D consists of approximately 3500 EIs, 57 GPAs, 49 DTE racks, 19 racks of CSN, 10 racks of OPS, 8 racks of RPS, 14 channel banks, 65 chargers, 72 battery banks and 3 UPS systems.
Test facilities – OIS-D has two test facilities. The Off-line Test Set located in the shops (M6-791 Rm 110B) and the CIF lab system (M6-342 RM 247). Each test site is equipped with GPA's, CSN and OPS racks used for testing new software and recreating and trouble shooting field problems.

OIS-D is a KSC designed system utilizing both custom and COTS hardware. Software for the system was written in a mixture of 'C' and multiple assembly languages, and is in excess of a million lines of code.

UNIQUE REQUIREMENTS:
OIS-D is a criticality 1S rated system meaning that failure of OIS-D to operate properly during the presence of a hazardous condition could cause loss of life and or vehicle.

FACILITY DESCRIPTION:
The primary OIS-D facilities are located in Building M6-138 (CD&SC) and Building K6-900 (LCC) that serves as system centers. GPAs and DTE equipment are housed in communications rooms located at the LCC, VAB, OPFs, Pads, PCC, CD&SC, VPF, MPPF, PHSF, HSB, O&C, and SSPF. EIs, in addition to being located in facilities occupied by GPAs, are also located at and in CX-J, CX-D, CCF, VABR, OSB, Security Patrol Headquarters, KSCNF, Ammonia Boiler Facility, MLPs, EML, CIF, CRF, HP Gas Facility, M6-961, M7-361, M7-1212, M7-1059, ARF, K6-1298, LSE, LETF, TCF, SAEF-2, MOSB, HMF, plus various boxcars and trailers.

4.2.1.2 Quintron Operational Intercommunication System (OIS-Q)

ADDRESS/LOCATION:	KSC Building J6-2313 (LACB), SLF facilities Crawler/Transporter 1 and 2, Convoy Command Vehicle, Dryden Shuttle Processing Area (DFRC SPA)
SUPPORT REQUIREMENT:	24 hours x 5 days/week; Weekend call-in 24 x 7 during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The Quintron Digital Operational Intercommunications System (OIS-Q) is a commercial off the shelf provided by Quintron Systems Incorporated using their DICES III equipment. OIS-Q is used in locations that have minimal or unique communication requirements. Each system consists of a centrally located redundant microprocessor controlled digital switch and the user instruments are fed by twisted pair cable or multi-mode fiber optic cable at T1 data rates. OIS-Q has the ability to integrate telephones, both conventional and point-to-point, paging, radio nets, and voice conferences.
There are three systems in place at KSC. They are located at the KSC Shuttle Landing Facility (SLF), Crawler Transporter I and II and two sub mux's with 10 units on the Convoy Command Vehicle. The systems consist of 3 system controllers, five 40-channel communication units, thirty-five 10-channel communication units, and eight T1 channel bank assemblies. A test equipment rack for Quintron is located in the CD&SC (M6-138 RM 131)

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION:
KSC Building J6-2313 (LACB), SLF facilities, Crawler/Transporter 1 and 2, Dryden Shuttle Processing Area (DFRC SPA)

4.2.1.3 Paging and Area Warning System (PAWS)

ADDRESS/LOCATION: KSC Building M6-138 (CD&SC), Building K6-900 (LCC)

SUPPORT REQUIREMENT: 24 hours x 5 days/week; Weekend call-in
24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
Paging and Area Warning System (PAWS) - The Kennedy Space Center Paging and Area Warning System is a center wide system designed to provide emergency, operational and administrative announcements to KSC Personnel. The system also provides a series of warning signals for various emergency conditions. The Area Warning signal is used to precede evacuation instructions and/or emergency directives. The Weather Warning Signal precedes weather status announcements. Along with the audio announcements, the PAWS provides flashing beacon and strobe lights in high noise areas.
The PAWS is controlled from two identical control systems, one located in the LCC and the other in the CD&SC. Each serves its respective area. Paging panels are located throughout the LCC and other control areas throughout KSC. All panels are wired to their associated control system. Each control system feeds the paging zones in its respective area. The LCC system feeds all of the LC-39 area, while the CD&SC System feeds the KSC Industrial Area. The two systems are linked together to facilitate all area paging. PAWS has one Bytex matrix switch to deliver T-1's to VDMS.
Each paging area (building/facility) has a subsystem for its own audio distribution and warning lights (if equipped). The associated PAWS Control System interfaces to these local audio distribution subsystems through a standardized PAWS interface called a Control Tray. The audio distribution system takes audio and control signals from the control tray, and distributes them to the speaker networks with one or more power amplifiers. The control tray offers audio feedback and control status back to the control system.
The hazardous operational areas of KSC are required to have redundant PAWS systems. Such areas will have identical redundant paging networks. Some of these areas have reserve power systems as well. The system consists of 50 warning beacons, over 300 power amplifiers, and over 3000 speakers located throughout KSC. PAWS is a KSC designed system utilizing both custom and COTS hardware. Software for the system was written in a mixture of 'C' and Assembly language.

UNIQUE REQUIREMENTS: PAWS is a criticality 1S rated system meaning that failure of PAWS to operate properly during the presence of a hazardous condition could cause loss of life and or vehicle.

FACILITY DESCRIPTION:

The primary Paging facilities are the LCC and CD&SC which house the redundant digital switches PAWS is in approximately 225 buildings and facilities across KSC, PDL, and SERPL.

4.2.1.4 Radio Systems

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC), 500' Weather Tower, SLF, Margo, CM&S
SUPPORT REQUIREMENT:	24 hours x 5 days/week; Weekend call-in 24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The KSC Radio Systems are composed of handheld and mobile transceivers with associated fixed base stations and remote control units. There are two different systems in place, an analog conventional system and a digital trunked system. The contractor shall operate, maintain, and sustain both systems.
The following describes the conventional system: There are 20 networks used in support of specific operational tasks associated with Shuttle and Payload processing, another 8 special networks for SLF Air Ground, Ground Control, and Crawler Transporter operations. Additionally, there are 27 support networks to provide for such functions as security, fire, medical, safety, and base support and maintenance operations.
The operational networks consists of transmitters located at 500 foot weather tower north of VAB and receivers located on 300 foot weather tower at building M6-791, approximately 8 miles south. In addition, the majority of these networks have additional receivers located at the VAB and connect to the network via Spectra-TAC combiners. All networks are interconnected via wire lines and audio bridges and are accessed through tone remote control units and are interfaced to the OIS systems through tone interfaces. Engineering, operations and repair of all base stations and audio interfaces are the responsibility of this contract.
The contractor shall operate and maintain the communications equipment on the convoy vehicle and provide a CDL licensed driver for the vehicle. The contractor shall install and maintain light bars and sirens on emergency vehicles.
Overall the system consists of 43 Base stations, 270 remotes, and approximately 2500 mobiles and portables.
The following describes the trunked system:
The system is a Motorola Smartzone 3.0 system with both a simulcast site and four non-simulcast sites. The simulcast site consists of two-transceivers at Kennedy Space Center, one on the 500 ft weather tower in the LC-39 area, and one on the radio shop tower in the Industrial Area. The non-simulcast sites are at Malibar, Shilo, and at PAFB, and CCAFS. The Air Force also has consoles, radios, base stations, and audio interfaces.
In addition to the equipment associated with a typical trunked system, KSC has 16 interfaces to allow audio cross-patching between conventional radio nets and trunked talk groups (using Base Interface Modules (BIM)), and 56 interfaces to allow audio cross patching between OIS channels and trunked talk groups. Each OIS-to-talkgroup interface is achieved in part via a Radio Control Panel (RCP.) This arrangement appears to the

trunked radio system as if there is a console for every OIS-to-talkgroup patch, and makes KSC very atypical among users of trunked radio systems.
There are two locations on KSC that contain consoles: the LCC contains 6 consoles; the CD&SC contains one console, and a systems manager terminal in the CIF.
There are approximately 1600 portables, 500 mobiles, and 25 base station radios that the contractor must track, program, and maintain.
While the Air Force maintains the equipment at PAFB and CCAFS, this contractor shall maintain the KSC equipment and the shared equipment, and serve as integrator and system engineer of the entire system.

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION:
KSC Building M6-138 (CD&SC), 500' Weather Tower, SLF, Margo, CM&S and Shilo

4.2.1.5 Audio Distribution System

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC), Building K6-900 (LCC), VABR, KSC News Facility, and Banana River Repeater
SUPPORT REQUIREMENT:	24 hours x 5 days/week; Weekend call-in 24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
This system consists of 4-wire / 2-wire audio bridges used to distribute mostly non-OIS-D circuits to required operator locations, line conditioning equipment (amplifiers, attenuators, filters, transformers, etc.) and signaling and supervision equipment (direct line service units) for point-to-point telephones.
The audio system also includes a T3C carrier equipped with one M13 multiplexer with a capability of up to 28 T1 circuits between the LCC and the CD&SC. The 12 T1s in use support individual audio circuits.

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION:
KSC Building M6-138 (CD&SC), Building K6-900 (LCC), VABR, KSC News Facility, and Banana River Repeater

4.2.1.6 Voice Distribution Management System (VDMS)

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC), Building K6-900 (LCC), Building K6-1193 (VABR), MILA, Building M7-355 (O&C), Building M6-342 (CIF), SLF, Building (VAB), CCAFS XY, ROCC, PDL, 500' Weather

Tower, JSC, MSFC, Huntington Beach CA, Building 60680 Hangar AE and Hangar L

SUPPORT REQUIREMENT: 24 hours x 5 days/week; Weekend call-in
24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The Voice Distribution Management System (VDMS) is a multinodal, multiaggregate multiplexer system for local routing of communication signals in the KSC vicinity. The system routes over 300 operational voice and data circuits within the various sites at KSC, CCAFS, MILA and other locations. The VDMS is the primary interface between the KSC OIS-D System and the NISN Interface which routes KSC circuits to the various other NASA Centers.
The System is comprised of General DataComm (GDC) Megamux Transport Management System Multiplexers and ADC Fibermux Magnum 100 Mbit per second fiber optic multiplexers. The system is located at the CD&SC, with multiplexers throughout the primary communications locations at KSC and CCAFS. The VDMS is monitored by system control computers, which automatically monitor system performance. These computers also control the system. The TMS and Magnum systems are designed to be highly reliable, and will automatically reroute circuits around system failures to the full extent possible. This auto routing feature is essential due to the critical nature of the VDMS function. The network consists of approximately 37 GDC multiplexers fed by 23 Fibermux nodes on five100 Mbit/sec backbone rings.

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION:
CD&SC, LCC, VABR, MILA, O&C, CIF, SLF, VAB, CCAFS XY, Hangar AE and Hangar L

4.2.1.7 Astrocomm System

ADDRESS/LOCATION: Building K6-900 (LCC), CD&SC

SUPPORT REQUIREMENT: Staffed as required; Weekend call-in
24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The Shuttle Astrocomm system provides interconnection of five Orbiter on-board voice circuits to the LCC control room consoles and OIS-D. Two independent intercommunication circuits are tied directly from the LCC to the Orbiter via umbilical cables. Two independent air-to-ground (A/G) full-duplex, S-band radio circuits are via the MILA Unified S-Band (USB) Spaceflight and Tracking and Data Network (STDN)

Station, and one A/G half-duplex, ultra-high frequency (UHF) radio circuit is via the MILA USB STDN Station.

UNIQUE REQUIREMENTS:
Astrocomm is a criticality 1S rated system meaning that failure of Astrocomm system to operate properly during the presence of a hazardous condition could cause loss of life and or vehicle.

FACILITY DESCRIPTION:
LCC, CD&SC, Pad A, Pad B, OPF 1, 2, 3

4.2.1.8 Voice Recording System

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC),
SUPPORT REQUIREMENT:	24 hours x 5 days/week; Weekend call-in 24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
Record and Playback system (RPS) records all 1024 OIS-D channels through redundant Ampex recorders. Two Dictaphone 9000's are capable of recording 240 channels and are utilized for radio nets, paging circuits and certain telephones. A Dictaphone Freedom system with 12 T-1 recorders and three 16 channel analog recorders is also used. Voice duplications are made on cassette tapes for operational analysis. In addition there are 3 20-channel recorders and 1 20-channel recorder to support the 2 crawler transporters and the Transportable Communication System (TCS).

UNIQUE REQUIREMENTS:	None
FACILITY DESCRIPTION:	KSC Building M6-138 (CD&SC)

4.2.1.9 Public Affairs Audio Systems

ADDRESS/LOCATION:	KSC News Facility
SUPPORT REQUIREMENT:	8 hours x 5 days/week and as required for special events

FUNCTIONAL DESCRIPTION:
Audio support, consisting of audio signal amplification, transmission, conditioning, switching, and distribution is provided by fixed equipment in the KSC news facility and from portable systems. Audio support is provided for events such as Shuttle launches, landings, and rollouts; astronaut arrivals; unmanned launches; Air Force launches; press briefings; NASA briefings; and other special events.

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION:
Banana Creek VIP area, West Causeway area, East Causeway area, Static Test Road, North Kennedy Parkway, Banana Creek Astronaut Dependents area, and the Mid-field Park Site.

4.2.2 Visual Imaging and Timing Communications Services

The contractor shall provide visual imaging and timing communications services and support end-to-end configuration and validation to meet operational and institutional requirements at KSC and the NASA occupied facilities at the CCAFS.

The systems associated with these services include but are not limited to the following:

4.2.2.1 Operational Television (OTV)

ADDRESS/LOCATION: LC-39, LC-39 Pads A & B, Industrial Area

SUPPORT REQUIREMENT: 24 hours x 5 days/week, Weekend call-in during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The Operational Television system provides general closed circuit television support to NASA operations on KSC. The system includes visual surveillance support to Shuttle, Payloads/ISS and Security operations and has equipment located in the LC-39 and Industrial areas.

4.2.2.1.1 Launch Complex 39 Shuttle Operations Television

ADDRESS/LOCATION: Operational Television Control Center; LCC, Bldg. K-6-900, Room 1P2. End Items: Launch Control Rooms 1-4, LC-39 Pads 39 A and B. Vehicle Assembly Bldg, K6-848, and OPF 1, 2, and 3

SUPPORT REQUIREMENT: 24 hours x 5 days/week, Weekend call-in during major tests, launch and landings

FUNCTIONAL DESCRIPTION:
Video cameras mounted in protective housings on pan and tilt units throughout the LC-39 Pad sites, VAB and OPF's are remotely operated from Television Control Center (TCC) in the LCC. An analog video switch and control system in the TCC allows for the input of 192 cameras to be sent out to any (or all) of 512 output destinations. The switch may also be controlled from individual console locations located in the Launch Control Rooms 1-4 and associated management areas. Additionally, there are remote controls for

the video switch assigned outputs located in the KSC Industrial Area and at JSC and MSFC. Also in the TCC is the video recording system for original recordings, duplication and dubbing. The OTV system provides recording formats in both digital broadcast quality and commercial analog quality depending on the identified requirement. Timing equipment for time registration on the live and recorded video is also located in the TCC. Approximately 75 Video Cameras and their associated pan and tilt apparatus are connected per pad to the Pad Terminal Connection Room (PTCR) via the NASA designed TV-39 cables. In the PTCR, the Camera Control Unit dissects the TV-39 signals, separating control from video. Baseband video signals are multiplexed (via WDM) onto fiber optic cables for transmission back to the television control center. In the LCC, the video is demodulated from the carrier frequencies, amplified and fed into a 192 X 512 Grass Valley Video Switch, and directly transmitted to over 500 monitors and test locations. Approximately five channels of the switcher output are fed to BCDS for general distribution.
Additional surveillance cameras include 9 color cameras located in the transfer isles of the VAB and 9 color cameras, 3 in each the three OPF Highbays.
The LC-39 OTV system is currently being upgraded to a digital system through the OTV-Digital (OTV-D) project. This project provides for the transition of the current analog camera, routing and control system to a Unified Control System (UCS) for the implementation of a Serial Digital Interface (SDI) closed circuit surveillance system. The digital transition schedule requires that the new digital system and the current analog system co-exist for a number of years. Currently, the OTV system has the Digital Switch, the Video Processing and Distribution system and the digital unified control system installed and operational. The OTV-D implementation schedule calls for the replacement of analog cameras with SDI cameras in groups of approximately 30 per year for the next several years. The analog OTV system will be totally decommissioned by 2007.

UNIQUE REQUIREMENTS:
The LC-39 Shuttle Operations Television system cameras are required to be environmentally housed for long-term exposure to the Florida climate. Cameras mounted on the Pad structure are also required to withstand conditions associated with Shuttle engine and booster exhaust.

FACILITY DESCRIPTION:
LCC, Bldg. K-6-900, Rm. 1P2; Launch Control Rooms 1-4; LC-39 Pads 39 A and B; Vehicle Assembly Bldg, K6-848; and OPF 1, 2, and 3.

4.2.2.1.2 Industrial Area Operational Television

ADDRESS/LOCATION:	Operations Control, O&C, M7-355: End Item Surveillance Systems; VPF, M7-1469, SAEF II, M7-1210 and PHSF, M7-1354
SUPPORT REQUIREMENT:	Regular 1st Shift operations, exceptions during major Shuttle and Payloads Processing and Mission events

FUNCTIONAL DESCRIPTION:
The Industrial Area CCTV System provides visual information distribution between the several payloads handling facilities including (but are not limited to), the Operations and Check-out (O&C) Bldg, the Vertical Processing Facility (VPF), the Payload Handling and Safeing Facility (PHSF), the Spacecraft Assembly and Encapsulation Facility II (SAEF II) and the Space Station Processing Facility (SSPF). The Industrial Area system is designed to provide for a central routing center (O&C) which will distribute video information from the various facilities to various user groups, safety, and security personnel, located throughout KSC. Applicable functional subsystems are: approximately 150 Black and White and color Cameras and remote controlled Pan and Tilt units located throughout ISS and Payloads facilities, 500 Monitors, O&C and SSPF Routing Switch's, Distribution, and Synchronization, Video Recording, duplication and dubbing equipment.
The O&C is Television Control Center is the operations center for the Industrial Area Operational Video Sub-systems. The heart of the O&C video system is a 128 x 400, XY routing switch. This system interfaces directly with outputs from the SSPF switch (96 x200) and the LC-39 OTV switch (192 x 512). This system provides different payload test conductors and service personnel visual information from major operational areas at different stages of in-process testing and mission milestones and to more than one payload customer at one time.

UNIQUE REQUIREMENTS:
None

FACILITY DESCRIPTION:
O&C, M7-355; VPF, M7-1469; SAEFII, M7-1210; PHSF, M7-1354; SSPF, M7-360

4.2.2.2 KSC Public Affairs Television (KSCTV)

ADDRESS/LOCATION:	KSC Press Site, Television Control Facility, Bldg. K7-1205
SUPPORT REQUIREMENT:	Regular 1st Shift operations, exceptions during major events

FUNCTIONAL DESCRIPTION:
During NASA missions, KSCTV produces live, continuous broadcast quality, audio and video coverage of launch and landing, Shuttle downlink video, news conferences, and other events as available, in response to the documentary, engineering, and Shuttle and LSPO television requirements for public release. The system at the Press Site provides technical operations for both broadcast quality audio and video programming.
During launch and landing, Engineering News Gathering (ENG) teams are sent to required sites around KSC to provide primary video sources used to create NASA TV programming. These isolated video feeds are individually distributed live to the media for creating independent programming. Unedited Tracking views from each camera are replayed on NASA TV shortly after the event. For major mission milestones and special

events NASA TV originates at KSC, and is transmitted to other NASA Centers and disseminated to the public through the use of the KSC video uplink capability, either as real time or near real time delayed broadcasts.
KSCTV also provides original programming development, postproduction editing and original broadcast quality recordings of identified PAO requirements. KSCTV also produces both broadcast and commercial quality videotape and DVD formatted duplications and dubs.
KSCTV provides technical support to operational requirements on the KSC Press Mound. The Mound provides a centralized location for media personnel to assemble and interface with the KSCTV system. The Mound has provisions for direct video feed distribution of the NASA remote cameras to the News Media. There are 19 distribution boxes located around the Press Mound with 24 isolated video outputs and 1 RF feed which includes the local broadcast channels.
In addition to these feeds there are also, 4 small stump boxes, each providing 5 NASA TV baseband feeds and 5 RF feeds. Eighteen positions in the grandstands have feeds of baseband NASA TV, RF signals and NASA TV Audio. A total of 52 RF cable drops are provided in the stump boxes.

UNIQUE REQUIREMENTS:
Contractor support personnel for PAO are required to be accomplished in their assigned areas of support and able to provide creative and technically proficient products with a minimum of NASA direction and oversight. The contractor shall provide personnel to support Landing Convoy operations.

FACILITY DESCRIPTION:
KSC Press Site, Television Control Facility Bldg. K7-1205; Various UCS and field tracking sites around KSC

4.2.2.3 Broadband Communications Distribution System (BCDS)

ADDRESS/LOCATION:	LCC, Bldg. K6-900, Head End, CIF Bldg. M6-342, Antenna farm, all major NASA facilities on KSC
SUPPORT REQUIREMENT:	Regular 1st Shift operations, exceptions during major events

FUNCTIONAL DESCRIPTION:
Broadband Communications Distribution System (BCDS) is a hybrid fiber/coaxial cable television distribution system. The system consists of both digital and analog channels. The basic function of the broadband system is to provide local KSC origination and off-air television channels to various users at KSC and CCAFS.
The KSC BCDS is a Mid-Split Cable Television Broadband system that provides distribution of Television to most of the major KSC facilities and acts as a headend feed for cable TV distribution at CCAFS. The BCDS is comprised of a consolidated headend, delivering signals to the cable distribution system in the Industrial Area, the cable distribution system in the LC-39 Area, and to CCAFS. The system is capable of

providing 63, 6 MHz cable TV channels. Program sources include; Local KSC operational video from both the Payloads and Shuttle Operational areas, Off-Air Commercial Channels, C-Band and KU-Band Satellite feeds, video taped training material. The system currently services approximately 12,000 TV drops.
Origination sources include local off-air antennas, satellite dishes, and outputs from a Grass Valley video switch located in the LCC and the Payloads/SSPF switch located in the O&C and SSPF. Baseband signals from the video sources are modulated, processed and distributed using COTS television equipment.

UNIQUE REQUIREMENTS:
None

FACILITY DESCRIPTION
LCC, Bldg. K6-900; CIF Bldg, M6-342; CCAFS, XY Bldg; All major facilities in the both the Industrial and LC 39 areas of KSC.

4.2.2.4 Timing & Countdown (T&CD)

ADDRESS/LOCATION:	Throughout KSC
SUPPORT REQUIREMENT:	Regular 1st Shift operations, exceptions during Shuttle events

FUNCTIONAL DESCRIPTION:
Timing and Count Down (T&CD) signals are generated and distributed from two Central Timing Stations in the LCC and CIF to all areas of KSC and systems as needed (LPS, OTV, Photo, Transmission Systems, etc). Timing reference signals are distributed on a continuous basis while Count Down signals are provided as needed for Launches and system testing including payload checkout.
Each Central Timing Station consists of 16 equipment racks, operational consoles with timing management computers, test equipment and bench repair stations. Additional distribution/signal conditioning equipment is found throughout KSC in Communication rooms. Also, over 400 T&CD displays are distributed over KSC. The T&CD systems are operated and maintained through a Joint Services Contracts (F08650-94-C-001) with the United States Air Force, however, the contractor shall be responsible for sustaining engineering for KSC facilities.

UNIQUE REQUIREMENTS:
None

FACILITY DESCRIPTION:
Major operational and administrative facilities on KSC

4.2.2.5 Photo Services

The performance period for this section begins October 1, 2004.

The contractor shall provide motion picture, still photographic, digital and video products and services for NASA, Commercial ELV and DOD customers at both KSC and CCAFS. This includes support to institutional (as requested) and engineering requirements. The contractor shall develop and maintain the Photographic Acquisition Distribution Document (PADD) that documents how the contractor will support each photographic Program requirement. The contractor shall develop and provide a copy of the PADD to NASA for Terminal Countdown and Demonstration Tests (TCDT), Launch and End Of Mission (EOM) and any other mission test that requires photographic support per DRD-T-6. The contractor shall develop and deliver to NASA on a monthly basis a list of products and cost on a work order basis per DRD-T-5. The contractor shall develop and provide to NASA, as described in DRD-T-4, post mission operational evaluations which identify which requirements were met and which were not, the cause of the failure to meet the requirement and the proposed corrective action. All launch images are considered potentially critical for anomaly investigation as well as useful in validating nominal launch performance and, therefore, should be as sharp and properly exposed as technically possible. Chemical photo processing shall be performed external to government property. One technical representative shall be present in the Range Operations Control Center (ROCC) during launch operations for coordinating with all photographers. All launch multi-media package images are considered potentially critical for anomaly investigation as well as useful in validating nominal launch performance and, therefore, should be as sharp and properly exposed as technically possible.

4.2.2.5.1 KSC/Shuttle Photo Support

ADDRESS/LOCATION:	Photo Services Operations Building 1605 CCAFS, Operational Area End Items: LC-39 Pads 39 A and B; KSC Headquarters, Press Site; CCAFS, KSC, and Brevard County
SUPPORT REQUIREMENT:	8 hours x 5 days/week; Weekend call-in; Mission Prep and set-ups; L-5 hrs through film retrieval during Launch and Landing events

FUNCTIONAL DESCRIPTION:
The contractor provides motion picture, still photographic, digital and video products and services. This includes support to institutional and engineering requirements. The contractor shall develop and maintain the Photographic Acquisition Distribution Document (PADD) that documents how the contractor will support each photographic Program requirement.
Institutional still products primarily include (but are not limited to), processing of negative film, 8x10, 11x14 and 16x20inch color prints and digital still hardcopy and video products including (but not limited to), broadcast and commercial formatted video tape recordings, duplication and dubbing, film to tape transfer, program creation and

recording, and digital video CD and DVD archiving and duplication. The services include (but are not limited to), on-call photographers and videographers, media customer service interface, digital video production programming development, distribution, duplication, dubbing and archiving, optics and photo equipment repair and maintenance, broadcast and High Definition video productions and digital still image services including scanning and digital image manipulation and CD/DVD archiving. The contractor shall maintain the official NASA KSC motion picture and still film photographic and digital products archives in the KSC HQ building. The contractor shall also maintain the PAO photo, video and digital products archives located at the Press Site. The contractor shall provide a method for customers to retrieve archived documents.

The photographic acquisition activity is a photographic motion picture and still frame recording process that provides high-resolution film records of shuttle operations. The photographic acquisition system utilizes cameras that are a mixture of Mitchell, Milliken, and Photosonic motion picture cameras. They are primarily 35 and 16mm but do include 70mm Photosonics. The still cameras are composed of 35mm and 70mm Hasselblads, Hulchers, and Nikons. The motion picture cameras operate at 3 fps for fueling cameras to 400 fps on the perimeter. The contractor shall provide sustaining and repair maintenance on the GFP film camera and associated assets.

The contractor shall provide, through government furnished property, optical tracking mount set-up, operations and maintenance. The contractor shall install required photographic camera and lens assemblies as identified in requirements documents on both optical and metric tracking assets. All launch images are considered potentially critical for anomaly investigation as well as useful in validating nominal launch performance and, therefore, should be as sharp and properly exposed as technically possible.

Metric tracking assets are defined as tracking telescopes providing azimuth and elevation information back to the Range Operations Control Center (ROCC) for inclusion in the range safety equation. The contractor is not required to provide operations or maintenance to metric tracking assets.

UNIQUE REQUIREMENTS:

The photo acquisition instruments are required to be environmentally housed for long term exposure to the elements associated with shuttle engine and booster exhaust and year round operation in the Florida climate. The contractor shall support Landing Convoy operations.

FACILITY DESCRIPTION:

CCAFS: Building 1605, Collimation Area of Building 1619, ½ Hangar G; Launch Complex 39; Pads 39 A and 39 B; SLF, KSC Headquarters Building, PCC room 3062.

4.2.2.5.1.1 Photo Optical Control Systems (POCS)

ADDRESS/LOCATION: PCC; LC-39 Pads; SLF

SUPPORT REQUIREMENT: Operational Hours during major tests, Launch, and Landings

FUNCTIONAL DESCRIPTION:
The contractor shall support engineering Shuttle requirements through the operation of the Photo Optical Control System (POCS). The POCS is a photographic motion picture and still frame event start, stop, and logging system that initiates and transmits camera control signals to film cameras.
The cameras are a mixture of Mitchell, Milliken, and Photosonic motion picture cameras. They are primarily 35 and 16mm but do include 70mm Photosonics. The still cameras are composed of 35mm and 70mm Hasselblads, Hulchers, and Nikons. The motion picture cameras operate between 3 fps and 400 fps.
A major component of the POCS is the Control and Acquisition Module (CAM). The CAM interfaces directly with the cameras and controls and monitors the cameras functions and parameters at various sites. These sites also house the electro/optical transceivers (FOTS) along with the multiplexers/demultiplexers. The CAM to FOTS interface is a Serial RS-422, with base function rate of 9600 baud. The FOTS link back to the PTCR is 1550 nm and 1300 nm. In the PTCR, there are patch panels that route the CAM signals to the Process Control Center (PCC).
There are two NASA custom designed Communications Control System's (CCS) with redundant connections to the FOTS's in the PCC. The CCS can be controlled and monitored from a number of workstations via Ethernet connections.
There are 52 cameras on the Fixed Service Structure /Mobile Launch Platform. System elements include cameras (dry closures--stills, non Automatic Exposure Control), and CAM/camera units. The POCS software supports 512 CAM/Camera units at Pad A, 512 at Pad B, and 512 RF units. Remote cameras may be started using POCS RF start signals or other approved actuation methods and devices. There are 300 operational CAMs.

UNIQUE REQUIREMENTS:
POCS requires computer operational configuration per the Photographic Acquisition Distribution Document (PADD) prior to mission support.

FACILITY DESCRIPTION:
Photo Optics Control Room is located in the PCC room 3062.

4.2.2.5.1.2 KSC/NASA Digital Photo Services Support

ADDRESS/LOCATION:	Photo Services Operations Building, 1605 CCAFS, Operational Areas; KSC HQ, Press Site
SUPPORT REQUIREMENT:	8 hours x 5 days/week; Weekend call-in, Press Site operational hours during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The contractor shall provide Digital Photo Services operations at the KSC Press Site with dedicated personnel and services to support Public Affairs requirements for the

acquisition, programming production and distribution of digital still and Webcast video to the media and general public via the Internet.
Digital Photo Services photographers and videographers provide on-call support for the covering of daily news events including in-depth coverage of launch and landing activities and events, including the documentation of VIP visitors. The contractor shall provide the support to interface with the accredited media and coordinates the distribution of both video and still imaging products. The contractor shall provide support to NASA for distribution of digital still images, photographic hardcopy prints and electronic images locally and via the Internet. Webcast technicians and producers provide support to the Webcast Studio live streaming video, original program development and encoded video clips for distribution via the Internet as a feature of NASA services.
Digital still and video services, for KSC organizations other than Public Affairs, are provided by the Digital Photo Services contractor, in a separate digital imaging facility, located in the KSC Headquarters building.

UNIQUE REQUIREMENTS:
Contractor support personnel for PAO are required to be accomplished in their assigned areas of support and able to provide creative and technically proficient products with a minimum of NASA direction and oversight. The contractor shall provide Digital Photo Services at the Press Site to support the operational hours that the Press Site is open to the media and all directed coverage of NASA designated news worthy events.

FACILITY DESCRIPTION:
KSC Press Site, News Facility, Webcast Studio, KSC Headquarters.

4.2.2.5.2 Commercial ELV Photo Support

ADDRESS/LOCATION:	Photo Services Operations Building 1605 CCAFS, Operational Area End Items: Launch Complexes; 17 A and B, 36 A and B, 40 and 41.
SUPPORT REQUIREMENT:	Mission prep and set-ups; Weekend call-in L-5 hrs through film retrieval during major tests and Launches

FUNCTIONAL DESCRIPTION:
The contractor shall provide motion picture, still photographic and video products and services. This includes support to institutional (as requested) and engineering requirements. The contractor shall develop and maintain the Photographic Acquisition Distribution Document (PADD) that documents how the contractor will support each item of the commercial launch photographic requirements package.
Institutional products will be available as requested and primarily include (but are not limited to); processing of negative film, 8x10, 11x14 and 16x20 inch color prints and digital photographic still products. The services include (but are not limited to); on-call photographers and videographers, optics and photo equipment repair and maintenance, video presentation productions and digital image services including scanning and digital image manipulation and photo CD recording. The contractor shall maintain a means of

accepting payment directly from the commercial customer using standard commercial methods.
The contractor shall support commercial launch requirements through operational functions of a photographic acquisition system. This is a photographic motion picture and still frame initiation and recording system that provides high-resolution film records of launch operations. The system provides camera start signals to the cameras. The PADD defines the required film type for each support.
The contractor shall provide, through government furnished property, optical tracking mount set-up, operations and maintenance. The contractor shall install required photographic camera and lens assemblies as identified in requirements documents on both optical and metric tracking assets. Metric tracking assets are defined as tracking telescopes providing azimuth and elevation information back to the Range Operations Control Center (ROCC) for inclusion in the range safety equation. The contractor is not required to provide operations or maintenance to metric tracking assets.
The cameras used are a mixture of Mitchell, Milliken, and Photosonic motion picture cameras. They are primarily 35 and 16mm but do include 70mm Photosonics. The still cameras are composed of 35mm and 70mm Hasselblads, Hulchers, and Nikons. The motion picture cameras operate between 3 fps and 400 fps. The contractor shall provide sustaining and repair maintenance on the GFP film cameras and associated assets.

UNIQUE REQUIREMENTS:
The photo system acquisition instruments are required to be environmentally housed for long term exposure to the elements associated with engine and booster exhaust and year round operation in the Florida climate. Requirements for operational support are documented in the Photographic Acquisition Distribution Document (PADD) for commercial customers.
Photographic requirements for commercial Launch customers will be priced as a package. Items over and above the package will be priced individually. Commercial customers will be able to order and pay for products and services using established commercial billing methods.

FACILITY DESCRIPTION:
CCAFS: Building 1605, Collimation Area of Building 1619, ½ Hangar G, Launch Complexes; 17 A and B, 36 A and B, 40 A and B.

4.2.2.5.3 DOD Technical Multi-Media Support

ADDRESS/LOCATION:

DOD Multi-Media Support, Building 1605, ROCC (CCAFS)
Collimation Bed: SE Area of Building 1619 (CCAFS)
Tracking Sites: Universal Camera Sites (UCS) (CCAFS and KSC) and Brevard County
Launch Complexes: 17A, 17B, 36A, 36B, 40, 41 (CCAFS)
Tracker Storage: ½ Hangar G(CCAFS)

SUPPORT REQUIREMENT: DOD Multi-Media Desk (0730-1630 workdays)
Mission preps and set-ups (as required)
Weekend call-in (as required)
L-5 hrs through film retrieval during launches

FUNCTIONAL DESCRIPTION:
The technical multi-media support contractor shall provide still photographic, motion picture film, and video products and services to DOD customers. This shall include major support to launch engineering requirements, and general support to institutional customers on a less critical basis. The contractor shall develop and maintain the DOD Multimedia Photographic Acquisition Distribution Document (PADD) that documents how the contractor will support each item in the DOD Launch Multi-Media Package. Support for the DOD Expendable Launch Vehicle (ELV) programs shall be priced as a complete set of products and services for an agreed upon set of basic requirements. Additional launch multi-media items not included in the package shall be priced individually for the DOD customer and separated in the subject PADD. The PADD shall contain only those items listed in the customer's applicable delivery order and coordinated with the DOD Program Manager (PM). All DOD customers shall be able to order and pay for all technical multi-media support products and services using established commercial billing methods.

UNIQUE REQUIREMENTS:
The cameras and supporting equipment on a launch pad or a tracker are required to be environmentally housed due to moisture, vibration, and heat associated with launch blasts and year-round operation in the Florida climate. PADD requirements shall be coordinated with other listings in Universal Documentation System (UDS) requirements for launch pad and Universal Camera Sites (UCS) support for timing, metrics, communications, and power from, or through, other Range contractors.
A launch package and all additional multi-media products and services requested in a delivery order supporting a DOD launch shall be considered complete when at least 90% of the total number of multi-media requirements (camera operations, developed films, finished media) meet industry standards for imaging, processing, and end product quality. (The contractor shall furnish the PM all follow-up documentation regarding corrective actions and/or process improvements following each launch.)

4.2.2.5.3.1 DOD Basic Launch Multi-Media Package

The contractor shall furnish all necessary services and supplies in meeting the requirements of a Basic Launch Multi-Media Package of products and services as a fixed-price item (including, but not limited to: all related management, administrative, labor, off-site film processing, operations and maintenance (O&M), repair, and technical overhead support in the "per event charge" for launch image packages). The contractor shall have the option to use any mix of available government-furnished equipment supplemented with contractor-owned equipment and accessories. Complete launch multi-media packages shall be delivered to the customer within 4 workdays after the

launch (exceptions specified elsewhere in this section), including the DOD Multimedia Performance-Production Report.

A basic launch multi-media package shall include the acquisition of an extensive number of critical launch images (still and motion media formats) that are documented from various locations and viewpoints, on and near the launch pad prior to launch and throughout the visible launch trajectory, from nearby sites on the perimeter to sites several miles away requiring the use of short, medium and long distance focal length lenses and cameras with various frame rates and exposure controls. One technical representative shall be present in the Range Operations Control Center (ROCC) during launch operations for coordinating with all photographers. All launch multi-media package images are considered potentially critical for anomaly investigation as well as useful in validating nominal launch performance and, therefore, should be as sharp and properly exposed as technically possible.

Prior to any action being taken, the contractor will coordinate with the DOD customer technical representative in developing the Photographic Acquisition Distribution Document (PADD). No other support may be initiated prior to government approval of the PADD. Prior to approval of the PADD, the contractor must present proof that all Associate Contractor Agreements (ACA's) are current, and an Emergency Call Back/Alert Photography Plan is in place. The plan shall provide for image acquisition within 30 minutes after notification to the photographer during normal duty hours, and 60 minutes after notification after normal duty hours.

Launch multi-media images acquired and processed from each motion camera or available video source (as itemized in the PADD) shall be arranged, properly oriented, color-balanced as necessary, and transferred into one digital video master (video string-out), including captions, titles and labels. Images acquired from each of the several still cameras (film and digital) listed in the PADD shall be proofed on paper, with significant images of interest posted electronically for customer review via web/LANS. Approved selections for press release and archiving, or requested as additional prints, shall also be transferred to high-resolution TIFF files onto a CD/DVD master properly labeled and indexed within 30 days following a launch, with the master placed in the DOD media file in the KSC HQ building and one copy delivered to the PM.

Basic launch multi-media packages include separate original processed film and combined images transferred from original processed film, intermediate processed film prints to preclude damaging original film during video transfers, and finished end products that depend on the successful operations per DOD launch of the following camera requirements summary:

(30) 16mm motion picture film cameras/film, 24 to 400 fps
(4) 35mm motion picture film cameras/film, 32 to 96 fps
(3) 70mm or motor-driven medium-format still film cameras with 15'of film
(2) Medium-format still film cameras/film
(2) 35mm cameras with 24-exp film or 25 images from high-resolution digital cameras

(1) Professional video camera, images recording DOD pre-launch/launch activities

Cameras and lenses used for launch imaging shall be a proper mix of handheld cameras, cameras on a tripod as appropriate, cameras mounted in fixed explosion-proof boxes, cameras mounted on contractor-operated non-metric trackers, and cameras co-mounted on metric trackers/large telescopes operated by the DOD Range Technical Services Contractor (RTSC). The contractor shall have an Associate Contractor Agreement (ACA) with the contractor operating and maintaining the metric trackers. The contractor shall have access to these video feeds (or acquire videotapes recorded at metric sites) for inclusion in the video string-out master within the basic launch multi-media package. A quick-look video clip (SVHS) of all non-film motion items, including video portions of the pre-launch activities, shall be available within 6 hours after a launch, and shall be listed in the PADD.

The contractor shall provide all required ancillary services supporting equipment preparation if not optionally available from other contractors, such as obtaining timing and making arrangements for additional lighting support and/or generator support and/or crane support. The contractor shall support F-1 day/night operations in coordination with the Range schedule, confirm proper set-ups/green lining at the proper times, purging camera boxes as necessary, replacing any damaged port glass after launches, and providing proper loads of camera films with subsequent film retrieval and equipment removal. The contractor shall provide for all required transportation, shipping, labeling, filing, developing, processing, inter-negatives, corrections, film-to-video transfers, and ultimately ensure that the string-out video and selected 8x10 prints meet professional standards of the highest quality.

In addition to all original processed films, intermediate transfers and the string-out master defined as end products in the basic launch multi-media package, the package also includes one SVHS tape and three DVDs of the complete video string-out of consolidated motion media (added to the quick-look video portion), all delivered within 4 workdays after each launch. Distribution offices for these four items shall be annotated in the preparation of the PADD in coordination with the PM. All additional copies shall be ordered and paid for outside the package.

One Public Affairs releasable quality digital still image of the DOD launch vehicle on the pad and two Public Affairs releasable quality digital images of the vehicle in flight shall be available to the DOD Public Affairs within 4 hours after each launch. Public Affairs images approved for posting on the web and LANS by the contractor shall be at least 1600x1200 pixel resolution and unlocked for downloading. These 3 digital launch images shall remain posted by the contractor on the web/LANS for 30 days after each DOD launch. The contractor shall accept additional paper print orders not in a package of posted launch images at published prices, such as higher-resolution color enlarged paper prints, from all DOD customers via web/LANS communications.

All other still images acquired for a launch multi-media package shall be proofed. All selections to be printed shall be scanned and/or downloaded to CD(s) or a DVD (raw and

corrected images as necessary) as part of the package. The basic launch multi-media package also includes three 8x10 prints of the pre-launch vehicle and three 8x10 prints of the launch vehicle in flight, with captions printed on backs of all prints within 4 workdays.

Distribution of the above mentioned six prints and digital files for 45 SW/PA and Air Force Accessioning shall be annotated in the preparation of the PADD in coordination with the PM. All other requested copies shall be ordered and paid for outside the package price. Requirements added to the basic launch multi-media package by the customer shall be clearly separated in the PADD for proper tracking, billing and reconciliation purposes.

Launch film negatives shall be sleeved, labeled and properly stored locally for at least 90 days after each launch. Launch motion picture film and video masters, still image master CDs and master DVDs shall be labeled, filed and stored locally for at least 90 days after each DOD launch, including proof sheets, indexes and data captions (except for the three approved still image selections to be sent to the Air Force Accessioning Office within 30 days after a launch.)

The DOD local media files in the KSC Headquarters building shall be purged of launch package items that have been retained longer than one year. Purged media shall be offered without charge, in turn, to the applicable DOD Launch Program Office, Eastern Range Visual Information Manager/PM, Air Force History Office, and CCAFS Museum before discarding. The only long-term storage of local DOD media in the KSC Headquarters building shall be limited to Public Affairs high-interest images or historically significant multi-media of both launch and non-launch activities.

Summary List of End Products in a DOD basic launch multi-media package (due within 4 workdays after launch, exceptions listed below and described previously in this section):

1. Quick release digital stills: at least three selections on web/LANS, within 4 hours
2. Quick release video clip: one SVHS, within 6 hours
3. Proof sheets of all still film: within 4 work days
4. All processed films, original and inter-negatives/positives: within 4 work days
5. Prints, six 8x10 color prints: within 4 work days
6. Complete motion media string-out video, one SVHS and three DVDs (additional may be required if longer than 2 hour): within 4 work days
7. CD(s) (or one DVD) of all still images selected for printing: within 30 calendar days

4.2.2.5.3.2 DOD Launch Scrub

During the Range countdown (launch minus 360 minutes), if a launch is rescheduled to another day, the contractor shall charge this amount to defray the expense of the ongoing activities that must be reaccomplished in preparation for the fixed price launch multi-media package.

4.2.2.5.3.3 DOD Launch Slip

If a change to an obligated launch date occurs with less than a 2-week notice prior to initiating the Range countdown, the contractor shall charge this amount to defray the expense of the ongoing activities that must be reaccomplished in preparation for the fixed-price launch multi-media package.

4.2.2.5.3.4 DOD Additional Camera/Film/O&M (16mm MOPIC)

An additional 16mm motion picture camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include a full load of film, cameraman and support technicians, processing, film-to-video transferring and all related O&M services and supplies, with the additional camera pointed and mounted within a fixed, explosion-proof box or mounted on a tracker or as a stand alone camera, per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD and the video string-out master in the launch multi-media package within this additional fixed-price charge. More than one additional 16mm motion picture camera shall be available to a customer at the same additional unit charge per additional same type camera.

4.2.2.5.3.5 DOD Additional Camera/Film/O&M (35mm MOPIC)

An additional 35mm motion picture camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include a full load of film, cameraman and support technicians, processing, film-to-video transferring and all related O&M services and supplies, with the additional camera pointed and mounted within a fixed, explosion-proof box or mounted on a tracker or as a stand alone camera, per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD and the video string-out master in the launch multi-media package within this additional fixed-price charge. More than one additional 35mm motion picture camera shall be available to a customer at the same additional unit charge per additional same type camera.

4.2.2.5.3.6 DOD Additional Camera/Film/O&M (70mm)

An additional 70mm or medium format still camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include 15 foot load of film, cameraman and support technicians, processing, proof prints and/or CD and all related O&M services and supplies, with the additional camera pointed or mounted or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD within this additional fixed-price charge. More than one additional 70mm or medium format camera shall be available to a

customer at the same additional unit charge per additional same type camera. Appropriate flash (including explosion-proof types as required), filters and accessories are also included.

4.2.2.5.3.7 DOD Additional Camera/Film/O&M (35mm Still)

An additional 35mm still film camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include a 24-exposure load of film, cameraman and support technicians, processing, proof prints and/or CD and all related O&M services and supplies, with the additional camera pointed or mounted or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD within this additional fixed-price charge. More than one additional 35mm still film camera shall be available to a customer at the same additional unit charge per additional same type camera. Appropriate flash (including explosion-proof types as required), filters and accessories are also included.

4.2.2.5.3.8 DOD Additional Camera/Recording/O&M (Still Digital)

An additional high-resolution digital still camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include cameraman and support technicians for up to 25 TIFF images, digital downloading and processing, proof prints and/or CD and all related O&M services and supplies, with the additional camera pointed or mounted or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD within this additional fixed-price charge. More than one additional digital camera and operations shall be available to a customer at the same additional unit charge per additional same type camera. Appropriate flash (including explosion-proof types as required), filters and accessories are also included.

4.2.2.5.3.9 DOD Additional Camera/Recording/O&M (Video)

An additional video camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include cameraman and support technicians, recording, digital processing and all related O&M services and supplies, with the additional camera pointed, mounted, or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD and the video string-out master in the launch multi-media package within this additional fixed-price charge. More than one additional video camera shall be available to a customer at the same additional unit charge per additional same type camera.

4.2.2.5.3.10 DOD Additional Camera/Recording/O&M (Infrared)

An infrared video camera and appropriate lens may be ordered and added to the basic launch multi-media package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include cameraman and support technicians, recording, digital processing and all related O&M services and supplies, with the additional camera pointed, mounted, or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD and the video string-out master in the launch multi-media package within this additional fixed-price charge. More than one additional video camera shall be available to a customer at the same additional unit charge per additional same type camera.

4.2.2.5.3.11 DOD Additional Camera/Recording/O&M (High-Definition Video)

A high-definition video camera and appropriate lens may be ordered and added to the Basic Launch Multi-Media Package by the DOD customer for an additional charge at time of delivery order issuance. This additional fixed price charge shall include cameraman and support technicians, recording, digital processing and all related O&M services and supplies, with the additional camera pointed, mounted, or tracked per the customer's additional requirement. The additional imaging requirement shall also be added to the PADD and the video string-out master in the launch multi-media package within this additional fixed-price charge. More than one additional video camera shall be available to a customer at the same additional unit charge per additional same type camera.

4.2.2.5.3.12 DOD Additional Services

Additional services shall include but are not limited to: on-call photographers and videographers (Emergency Call-Back/Alert Photography Plan), scheduled photographers and videographers, optics and photo equipment repairmen, multi-media presentation specialists, video editors, and digital image specialists.

These services will be priced per labor hour and billed to the nearest half-hour of service. This fixed price will include use of all necessary cameras or supporting equipment.

4.2.2.5.3.13 DOD Additional Products

Additional engineering products not in the basic launch multi-media package, in addition to institutional products, shall be available upon ordering separately. Additional products in general include, but are not limited to: processing of negative film, color prints of various sizes, digital photographic still products, videotapes, photo CDs, DVDs, and additional motion picture film processing/printing. Labels and/or captions are included in the standard price for all DOD additional products. This list shall also include prices for any standard size of raw stock. The contractor shall maintain a means of accepting payment directly from the DOD customer using standard commercial methods.

These products will be priced per the end product price list at ID/IQ Pricing Schedule, attachment J-6.

4.2.3 Transmission System

The contractor shall provide video, voice and data transmission services and support end-to-end configuration and validation to meet operational and institutional requirements at KSC and the NASA occupied facilities at the CCAFS. The systems associated with these services include:

4.2.3.1 T-Carrier/SONET Multiplexer System

ADDRESS/LOCATION: All Areas of KSC and CCAFS Hangars AE, AO, L, AF, and Building EO.

SUPPORT REQUIREMENT: 16 hours x 5 days/week; Weekend call-in; 24 x 7 during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The T-Carrier/SONET backbone supports both administrative and operational customers at KSC and CCAFS. The backbone utilizes SONET OC-48, SONET OC-3, and M-13 multiplexers. The system provides OC-12, OC-3, DS-3, and DS-1 connectivity between major facilities at the KSC and CCAFS. The existing Integrated Digital Network Exchange (IDNX) T1 network consists of four nodes to provide DS-0 service.
The T-carrier system consists of fiber optic multiplexers at twenty-one locations at KSC and four locations at CCAFS. Office repeaters are installed at all multiplexer locations to improve signal quality at the multiplexer. Customer Service Unit (CSU)/Data Service Units (DSU) are supplied at customer demarcation points for data conversion for V.35, RS-422 and RS-530 interfaces. The T-carrier system utilizes High-bit-rate Digital Subscriber Line (HDSL) equipment to reach selected customers in some of the outlying areas of KSC.
The SONET system consists of 8 OC-48 multiplexers and 11 OC-3 multiplexers at major facilities at KSC.
Uninterruptible Power Supplies (UPS) or battery back up is required at all M-13 and SONET multiplexer locations.
Alarm monitoring is provided via the Remote Monitor and Alarm System (RMAS). The T-Carrier/SONET management system consists of Simple Network Management Protocol (SNMP) control devices and proprietary control devices.

UNIQUE REQUIREMENTS:
None

FACILITY DESCRIPTION:
All Areas of KSC and CCAFS Hangars AE, L, AF, and Building EO.

4.2.3.2 Asynchronous Transfer Mode (ATM) Transmission System (ATXS)

ADDRESS/LOCATION: KSC Building K6-900 (LCC), Building 1193 (VABR), Building M6-138 (CD&SC), Building M7-360 (SSPF)

SUPPORT REQUIREMENT: 16 hours x 5 days/week; Weekend call-in
24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
Operational LAN users require private LANs for monitoring and control of ground systems not connected to the Internet, or needing administrative services. The Asynchronous Transfer Mode (ATM) Transmission System (ATXS) provides this service. The ATXS is a commercial off the shelf, standards based switch network consisting of four 10Gbps Cisco 8600 and four 20Gbps Cisco 8540 MSR backbone switches, two 10Gbps FORE ASX1000 and two 20Gbps Cisco 8540 MSR facility switches and over 70 edge switches consisting of Cisco 2820, 2924, 5500, Light Stream 1010 and FORE ASX200. The ATXS is a meshed connected system integrated with the SONET transmission system to take advantage of the SONET ring physical layer protection. It serves as the KSC Operational data transportation system, integrating separate operational LANs over virtual circuits. These virtual circuits utilize RFC-1483, Classical IP over ATM or direct OC-3c ATM connections.
ATXS network management is accomplished by an in-band, SNMP based platform running Hewlett Packard Open View Network Node Manager software and vendor specific management software. An out-of-band system is utilized to enhance security and maintenance, utilizing point-to-point modems.

UNIQUE REQUIREMENTS:
ATXS is a criticality 1 rated system for potentially causing corruption of data for a single path supporting LCC Shuttle Data Center analysis of Orbital Maneuverability Reactionary System (OMRS) checkout data from the Hypergolic Maintenance Facility (HMF). The criticality is referring to a human decision made for OMRS buyoff or in support of at near-real time launch countdown decisions.

FACILITY DESCRIPTION:
All major facilities in the LC39 Area, Industrial Area and CCAFS Hangar AE.

4.2.3.3 Fiber Optic Systems

ADDRESS/LOCATION: All areas of KSC

SUPPORT REQUIREMENT: 16 hours x 5 days/week; Weekend call-in
24 hours x 7 days/week during major tests, launch, and landings

FUNCTIONAL DESCRIPTION:
The KSC/CCAFS fiber optic systems use both multi-mode and single-mode fibers for system connections. The systems supported include: the wideband fiber optic

transmission system, frequency division data multiplexers, wavelength division multiplexers, the Remote Monitor and Alarm System (RMAS), high data rate transmission equipment (50 Mbps), and the Orbiter S-Band uplink monitor.
The Fiber Optic Transmission System transmits RS-170 or NTSC color video signal, an analog signal within a 12-megahertz bandwidth, or asynchronous digital data up to 8 Mb/s No Return Zero-Level (NRZ-L) depending on application. The system provides a balanced 124-ohm or unbalanced 75-ohm electrical interface for the optical transmission of video, analog, or digital data signals over a single fiber. The system processes a 1-volt input signal between 10 Hz and 12 MHz and transmits it optically at either 1300 or 1550 nanometers via Injection Laser Diodes (ILD) or Light Emitting Diodes (LED) to the receive location where the signal is restored to the original electrical input signal. ILD transmitters are used in conjunction with optical dividers to create multipoint circuits.
The frequency division data multiplexer can accommodate eight data channels (four channels from 0 to 128 Kbps and four channels from 0 to 512 Kbps). Asynchronous data, either balanced or unbalanced can be transmitted at any data rate using RS-422 voltage levels or a one-volt peak-to-peak variant. The aggregate output of the Multiplexer is transported via the fiber optic wideband transmission system.
The Wavelength Division Multiplexer (WDM) equipment doubles the capacity of the existing fiber optics cable plant. WDMs are installed at facilities throughout KSC to enhance the optical fiber's capacity. The WDMs multiplex signals at 1300 and 1500 nm. WDMs are primarily used with the wideband fiber optic transmission system.
A 32 x 32 Sigma Electronics analog matrix at the CDSC is used as the KSC off-site routing switch in support of shuttle processing, launch and landing video. The fiber optic wideband transmission system has more than 1300 transmitter/receiver pairs that service more than 35 facilities on KSC and CCAFS. At present, approximately eight facilities are equipped with frequency division data multiplexers. Two full duplex 50-Mbps data links exists between buildings (O&C and OPFs 1 and 2 and between the O&C and OPF-3). The Orbiter S-Band Uplink Monitor transmits a 2GHz analog signal between Pads A and B and the OPFs. The system utilizes single mode lasers and 2X2 optical couplers. Fiber optic transmission for short distances include RS-250-B short haul video, SDI video, and SDTI video. This also includes point-to-point variable rate telemetry circuits on KSC and CCAFS.

UNIQUE REQUIREMENTS:
1550 nm transmission on 50/125um multimode fiber

FACILITY DESCRIPTION:
All areas of KSC

4.2.3.4 Remote Monitoring and Alarm System (RMAS)

ADDRESS/LOCATION:	Building M6-138 (CD&SC)
SUPPORT REQUIREMENT:	16 hours x 5 days/week; Weekend call-in 24 hours x 7 days/week during major tests, launch, and landings

The Remote Monitoring and Alarm System (RMAS) consists of hardware and software to monitor the health of the Video Products Group PCO 5000 Fiber Optic video or 12Hhz analog transmission equipment located at the Kennedy Space Center. RMAS can monitor any equipment generating discrete contact closures and/or analog voltages. The Sun Microsystems RMAS console uses Hewlett-Packard Open View Network Node Manager to provide the RMAS user interface and reporting mechanism. The RMAS Remote Terminal Unit (RTU) is polled for alarm status utilizing a SNMP proxy agent via a Commercial-Off-The-Shelf Code Activated Switch (CAS). The RTU uses KSC designed hardware and software. The RTU software is written in the C language and is compiled to machine language in order to run on the RTU.

UNIQUE REQUIREMENTS:
None

FACILITY DESCRIPTION:
All areas of KSC

4.2.4 Cable Systems

ADDRESS/LOCATION: All areas of KSC

SUPPORT REQUIREMENT: 16 hours X 5 days/week, Additional support as required by schedule

FUNCTIONAL DESCRIPTION:
The contractor shall provide Cable System services including underground location capabilities, trenching, boring and digging, and support end-to-end configuration and validation to meet operational and institutional requirements at KSC and their interfaces to NASA occupied facilities at the CCAFS.
The contractor shall monitor all construction activities and excavations on KSC. The contractor shall attend the pre-launch excavation reviews. The contractor shall coordinate and monitor the fieldwork for the placement of new underground communications utilities. The contractor shall be trained in use and operation of underground location equipment and above ground survey equipment.
The contractor shall provide Outside Plant services in support of operational and institutional requirements at KSC. These services shall include technical and management expertise for outside plant cable: 19, 22, 24 gauge copper twisted pair, 16 gauge twinax, multimode/singlemode fiber-optic cable and BCDS hard-line coax. Also included are Unique launch pad cabling, unique systems cabling, and hard wired Launch Control Complex (LCC) to Pad vehicle safing cable systems that run from MDF to MDF through the Communications Manholes. The contractor shall be trained and certified for unassisted confined space entry into manholes. The contractor shall supply and operate calibrated air quality test equipment.

The contractor shall provide Outside Plant services in support of operational and institutional requirements at KSC. These services shall include technical and management expertise for the Communications Pathways including communications manhole and conduit systems, Repeaters, CXTs (Cross Connect Terminals), TTCs (Telephone Terminal Cabinets), MDFs (Main Distribution Frames), FOTs (Fiber Optic Terminals) and dedicated Communications cable trays at KSC.

The contractor shall provide Telecom services in support of operational and institutional requirements at KSC. These services shall include technical and management expertise for: facility premise wiring from the Frame to the Customer Face Plate (CFP), Frame cross connects, TTC cross connects, Circuit protectors, circuit design and installation. Contractor shall follow the KSC Telecommunications Premises Distribution System design standard STD-E-0021. New facilities are premise wired by the construction contractor under direction of Architect and Engineer (A&E) following STD-E-0021 using SPECSINTACT sections (16700 section). The contractor shall install all equipment including but not limited to cabling required for interfacing with the new facility premises wiring.

The contractor shall provide data base O&M and production for the Circuit Assignment Management System (CAMS). CAMS is an Oracle-based collection of data base management tools containing information about KSC communication circuits. This information includes all copper Inside and Outside plant, all fiber inside and outside plant, circuit characteristics, equipment and work order histories and status.

The Test Board is the central interface point for KSC copper communications circuits between the North area via the VABR, south area via the south repeater, CCAFS via the Banana River repeater and the industrial area. The contractor shall provide Test Board support at the CDSC during major KSC and CCAFS tests and hazardous operations; 7 day, 24 hour support is required on some tests. Test Board support is also required to support day-to-data telecom activities.

The systems associated with these services include but are not limited to the following: 500,000+ Various gauge copper twisted-pair cables, 1,000+ Various gauge twin-axial cables, 3,000+ Multi-mode and single-mode fiber optic cables, 3000+ Backbone and distribution coaxial cables, 107+ Main Distribution Frame cross connects, 1700+ Telephone Terminal Cabinet cross connects, 550+ Manholes, Handholes and associated conduit systems, 42+ Cathode Protection Rectifiers, 22+ Air Dryers, Main Distribution Frame (MDF) to MDF through the Communications Manhole System, Intermediate Distribution Frames, Launch Complex (LC)-39 pad and systems cables, Launch Control Complex (LCC) to LC-39 Vehicle Safing cables, Repeaters, Cross Connect Terminals, Telephone Terminal Cabinets, Facility cable trays (inside and outside), Main Distribution Frames, Fiber Optic Terminals, Wideband Terminals, Cable Records Management – Circuit Assignment Management System (CAMS), Facility premise wiring, Test Board, Flow Meter Panels, and Frame Lights.

UNIQUE REQUIREMENTS:
Clear Frame and safing cables

FACILITY DESCRIPTION:
All areas of KSC.

4.2.5 Administrative Telephones

The performance period for this section begins December 1, 2004.

The contractor shall provide the Operation, Administration and Maintenance (OA&M) of administrative telephone system in support of all KSC residents. There are approximately 17,500 instruments and/or ports in approximately 275 buildings associated with this service agreement.

The contractor shall provide end-to-end support for adds, moves and changes. A move is defined as de-installation, move and re-installation of system hardware requiring a physical dispatch of a technician or analyst. A virtual move is one that does not require a physical dispatch of a technician or analyst. The service provided and work performed shall be in accordance with Industry (BellCore) standards.

The switch infrastructure and local and long distance trunking will be provided by the government. The contractor shall monitor traffic usage on these trunk groups and notify the government when usage approaches levels of service degradation (P 0.01).

The contractor shall provide operator services processing international calls, collect calls, conference calls, other operator-assisted calls, maintain current directory assistance information, and log information on billable calls. The operators shall provide incoming callers with answers to routine questions not requiring Public Affairs intervention.

The contractor shall employ telephone engineering and operations personnel, adequate to support existing and future requirements, who are proficient in Voice over IP (VoIP) technology, including but not limited to, VoIP phones, associated call managers and gateway systems.

The VoIP systems interface to the KSC Institutional Network and the legacy KSC Administrative Telephone System. The contractor shall support these interfaces and provide all required programming to facilitate connectivity.

The contractor shall operate and maintain the SecureLogix system. The contractor shall review the logs and make recommendations to identified NASA telecommunications personnel and implement changes and rule based policies as directed.

The contractor shall provide current telephone data to support the KSC E911 center on a weekly basis. This data shall include the building, room, occupant/assignee, organization and mail code, and directory number/s for all active ports on KSC. This data, sorted by seat type, shall also be supplied to the COTR on a monthly basis. The contractor shall maintain the E911 switch and it's interfaces with the KSC and CCAFS phone systems.

The contractor shall provide information as requested in support of security, Office of Inspector General (OIG) or managerial investigations. This information may be required on short notice. The contractor shall supply Telephone Call Detail reports as defined in DRD-T-3.

The contractor shall provide a Help Desk for customers to report troubles, obtain information on instrument/system operations, and status on open work.

The contractor shall provide user training to assure customers receive adequate operating information on their type of instrument. The contractor shall supply operating guides which will walk users through routine operations for their instrument type, including frequently asked questions.

4.2.5.1 Phone Seat Description

Each Phone Seat will provide the service required to ensure an appropriate phone instrument and complete phone system is available as specified. This includes instruments, infrastructure, and other required services to provide telephone related connectivity within, and external to, the Center. Also included in this service is the maintenance and administration of the telephone infrastructure; basic services (operational configuration, engineering and maintenance of analog and digital telephone switching system); moves adds, changes; corrective/preventative maintenance of telephone instruments and drops.

4.2.5.1.1 PH1 Phone Description

Functionality: Provides full phone services for a standard hallway or lab phone.

Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Single	Single line phone
Line Type	Analog	Analog line
Voice Mail	None	No voice mail
Feature Set	Standard	Call forwarding, transfer, forward, camp, etc.
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.2 PH2 Phone Description

Functionality: Provides full phone services for a standard desktop or lab phone with voicemail. (Nortel 9316CW or equivalent and compatible)

Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Single	Single line phone with display
Line Type	Analog	Analog line
Voice Mail	Standard	Voice mail
Feature Set	Standard	Call forwarding, transfer, forward, camp, etc.
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.3 PH3 Phone Description

Functionality: Provides enhanced feature set phone service intended for use in a branch or division office setting (e.g., secretary phone). (Optiset 1200 or equivalent and compatible)

Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Multi-12	12 line phone with display
Line Type	Digital	Digital ISDN line
Voice Mail	Standard	Voice mail
Feature Set	Enhanced	Standard plus additional features
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.4 PH4 Phone Description

Functionality: Provides full phone services intended for use in a conference room. This system will have multiple speakers and microphones spaced at intervals for clear reception and transmission.

Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Single	Single line phone
Line Type	Analog	Analog line
Voice Mail	None	No voice mail
Feature Set	Speaker	Standard features plus speaker
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.5 PH5 Phone Description

Functionality: Provides full VoIP phone services for a standard desktop or lab phone with voicemail.

Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Single	Single line phone
Line Type	VoIP	10/100 Ethernet
Voice Mail	Standard	Voice mail
Feature Set	Standard	Call forwarding, transfer, forward, camp, etc.
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.6 PH6 Phone Description

Functionality: Provides enhanced feature set VoIP phone service intended for use in a branch or division office setting (e.g., secretary phone).
Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	Multi-12	12 line phone with display
Line Type	VoIP	10/100 Ethernet
Voice Mail	Standard	Voice mail
Feature Set	Enhanced	Standard plus additional features
Moves/Adds/Changes	Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Restore to Service	Regular	Restore to service by close of next business day

4.2.5.1.7 PRI Service Description

Functionality: Provides new or additional Primary Rate Interface (PRI) service to devices. (Example: New Video Conferencing Unit)
Standard Services:

Service Type	Service Level	Typical Service Characteristic
Instrument	None	N/A
Trunk Type	Digital	23B + D
Voice Mail	None	None
Feature Set	Enhanced	Enhanced PRI Features
Moves/Adds/Changes	Regular	Moves/adds/changes completed within 5 work days, no field visit 8 hours
Restore to Service	Critical	Restore to service within 2 contiguous hours

4.2.5.2 Phone Service

Service Description: Provides the service to ensure an appropriate phone instrument and complete phone system is available to the specified Phone Type. This includes instruments, infrastructure, and other required services to provide telephone related connectivity within, and external to, the Center. Also included in this service is the maintenance and administration of the telephone infrastructure; basic services (operational configuration, engineering and maintenance of analog and digital telephone switching system); moves, adds, changes; user training; help desk; corrective and preventative maintenance of telephone drops.

4.2.5.2.1 Instrument

Service Description: Provides for the phone instrument type.

Service Levels	Typical Service Characteristic
Single	Single line phone instrument
Dual	Dual line phone instrument
Multi-12	12 line phone instrument
Multi-24	24 line phone instrument

4.2.5.2.2 Line Type

Service Description: Provides for the desired line type.

Service Levels	Typical Service Characteristic
Analog	Analog line
Digital	Digital line
VoIP	10/100 Ethernet port

4.2.5.2.3 Voice Mail

Service Description: Provides the services required for a voice mail system with the following capabilities: recorded announcements, audio and visual indicators of messages awaiting retrieval, forwarding capability, broadcast (voice mail lists), 15 minutes of storage, auto dial voice mail caller, auto reply (send message back to voice mail caller), create, delete, retrieval of messages from any DTMF phone (internal or external to Center). Retrieval of messages external to the Center shall be accessible via a toll-free number provided by the government.

Service Levels	Typical Service Characteristic
None	No voice mail
Standard	Voice mail with above capabilities
Enhanced	Voice mail with 30 minutes of storage

4.2.5.2.4 Feature Set

Service Description: Provides for a standard set of features to be provided with the phone seat

Service Levels	Typical Service Characteristic
Standard	Call forwarding, transfer, forward, intra-Center conferencing, camp, redial, hold, call park, caller ID, call waiting, message waiting
Speaker	Standard features plus speaker phone
Enhanced	Standard features plus speaker phone, call pickup/hunt group, speed call, auto dial, caller ID, call waiting, message waiting

4.2.5.2.5 Moves/Adds/Changes

Service Description: Provides for a standard set of moves/adds/changes on one work order to be provided with the phone seat

Service Levels	Typical Service Characteristic
Regular	<= 5 moves/adds/changes completed within 2 work days, no field visit 8 hours
Enhanced	<= 5 moves/adds/changes completed within 1 work day, no field visit 4 hours

4.2.5.2.6 Restore to Service

Service Description: Provides standard maintenance services including: System diagnostics and troubleshooting; System and component maintenance; Configuration changes, tracking, and documentation. The COTR will have the right to re-prioritize the restore to service requests on a real time basis up to 1% of the total seats per month to accommodate KSC senior level staff.

Service Levels	Typical Service Characteristic
Regular	Restore to service by close of next business day
Critical	Restore to service within 2 contiguous hours

ADDRESS/LOCATION: All areas of KSC

SUPPORT REQUIREMENT: 8 hours X 5 days/week, off hour call-in, Operator service 6:00 am to 6:00pm, Additional support as required by schedule

FUNCTIONAL DESCRIPTION:
The Administrative Phone System is a Siemens EWSD Class 5 Central Office Host Switch (located in M6 138 (CD&SC) Room 128) with Remotes located in the major KSC facilities. The switch has all of the features and functionality of a Class 5 CO including CLASS, SS7 and ISDN. The system has an integrated voice mail system, a conference bridge, a SecureLogix Telephone Firewall and a Multi Port Conferencing Unit for ISDN

Video. The system integrates with an E-911 switch (O&M included in this contract) to provide PSAP (Public Safety Answering Point) services to KSC. The switch provides connectivity to outside KSC through PRI trunking to the local calling area and between NASA Centers and long distance through FTS (Federal Technology Service-GSA). The phone system provides point-to-point links to and from launch critical operations. The majority of KSC phones are single line display type phones with Caller ID speakerphone, voice mail and CLASS features. The next largest users have ISDN multi-line speakerphones with display. There are several PRI (Primary Rate Interface) spans servicing video, RAID and other data requirements.

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION: Throughout KSC

4.2.6 Institutional Computer Networks

The contractor shall provide the design, installation, operations, maintenance and sustaining engineering for the Kennedy Space Center institutional computer Network (KNET). Contractor shall meet customer data delivery requirements for institutional functions at KSC and the NASA occupied facilities at the CCAFS. Institutional requirements include data necessary for day-to-day business (for example email, internet, work control) and process sensitive elements in support of KSC missions and programs. Institutional network KNET delivers data to-and-from desktops, Local Area Network (LAN), Metro Area Network (MAN) and Wide Area Network (WAN). The contractor shall include end-to-end configuration and validation of KNET system equipment and related software.

The contractor shall provide network services per government approved standards and protocols in accordance with NASA Chief Information Officer (CIO) Executive Notices, policies, directives, procedures, guidelines and associated Security standards, including but not limited to, NPG 2810. The contractor shall follow KSC Institutional Network Connectivity Procedure (KDP-KSC-P1444) to provide a consistent customer request process for acquiring network connectivity while ensuring that mandated security requirements for personnel and equipment are satisfied.

The contractor shall install, operate, and maintain network hardware and software in support of administrative and general-purpose computing systems utilizing, but not limited to: Routers, Hubs, Switches, Network Repeaters, Wireless Access Points and DSL LAN extenders. The contractor shall operate and maintain a complete network management system including in-band primary and backup network operations centers and the out-of-band network management system. Contractor shall maintain and upgraded network systems to meet changing industry standards.

The contractor shall provide operations, maintenance and sustaining engineering of network management support infrastructure including but not limited to: Domain Name

Servers (DNS), Dynamic Host Configuration Protocol (DHCP) servers, Policy Based Routing (PBR), Virtual Local Area Networks (V-LANs), network time servers, network operations database servers, network operations web servers, network security services Remote Access Services including Virtual Private Network (VPN)) servers, authentication services Secure Socket Layer based Proxy Gateways and Plain Old Telephone System (POTS), Integrated Services Data Network (ISDN) Dial-up based services, Call Managers and Voice over IP (VoIP).

The contractor shall maintain a database of all IP addresses assigned to KSC and NASA assigned facilities at CCAFS. Database shall include a minimum set of information for each customer including, but not limited to: IP address, customer name, building number, room number, Customer Face Plate (CFP) number; hardware or machine address, operating system, switch and port number. Contractor shall provide online database access to NASA networks personnel and IT managers as required.

The contractor shall continue to upgrade and improve performance for data transmissions to-from MAN and LAN (delivery to customers). The contractor shall provide engineering and sustaining engineering to include, but not limited to, obsolescence replacement and uniform data standard level improvement (i.e. 100 Mbps desktop and 1000 Mbps Ethernet Backbone) to provide customers with ubiquitous data network infrastructure support that improves service levels across KSC and NASA occupied facilities in the CCAFS area.

ADDRESS/LOCATION:	All areas of KSC
SUPPORT REQUIREMENT:	16 hours X 5 days/week, Additional support as required by schedule or Mission support

FUNCTIONAL DESCRIPTION:
KNET provides approximately 13,000 network connections. It is estimated that this number will increase to approximately 15,000 over the next 3 to 5 years. KNET currently supports IP based protocols and is controlled using over (30) Routers, (600) Switches and Hubs to provide networking to over 240 buildings and trailers throughout KSC and NASA assigned CCAFS facilities.
The current network consists of 10/100/1000 Mbps Ethernet and associated cable for data transmission to desktop and servers (i.e. email, web, X.500, streaming audio/video, etc.). KNET is built upon and utilizes cabling and capabilities discussed in section 4.2.5 Cable Plant. KNET sustaining engineering efforts include upgrading obsolete 10base2 Ethernet connections with 10/100 Mbps switched Ethernet and Category 5e premises wiring. Several remote locations within KSC, where fiber optic cable is not available, are served by Digital Subscriber Line (DSL) equipment at lower speeds.
KNET uses PBR and VLANs to provide three segmented/logically isolated networks referred to as Private, Public, Open network (three islands) across KSC and NASA occupied facilities at CCAFS. KNET interconnects between its geographically dispersed facilities with its Kennedy Metropolitan Area Network (KMAN) a redundant, primary and secondary, 100/1000 Mbps Ethernet switched backbone.

KNET provides: Domain Name Servers (DNS), Dynamic Host Configuration Protocol (DHCP) servers, Policy Based Routing (PBR), Virtual Local Area Networks (V-LANs), network time servers, network operations database servers, network operations web servers, network security services remote access services including Virtual Private Network (VPN)) servers, authentication services Secure Socket Layer based Proxy Gateways, POTS and ISDN Dial-up based services, Call Managers and Voice over IP (VoIP).
KNET's Network Control Center (NCC) operates from a primary location at the Central Instrumentation Facility (CIF) and a backup location at the Operations and Checkout (O&C). Network system management uses software and protocols including but not limited to: HP Openview network management software, 3COM Transcend, Cisco Works and Simple Network Management Protocol (SNMP) to remotely manage and administer network systems. KNET uses premises wiring typically consisting of a minimum of one Customer Faceplate Plate per 100 square feet of area each delivering 3 data Category 5e and one fiber optic multimode cable (future use).

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION: Throughout KSC and CCAFS NASA assigned facilities.

4.2.7 Network IT Security

The contractor shall perform IT Security activities in areas of security scans, incident response, system and log monitoring, security patches and updates, and reporting. The contractor shall support NASA IT Security personnel performing IT Security functions.

The contractor shall provide technical/engineering support to the Agency Network Security Perimeter Configuration Control Board (NSP-CCB) and the Center Network Control Board (NCB).

The contractor shall provide and maintain all required IT Security plans related to the KICS supported communications systems and/or services, per the agency designated formats and guidelines.

The contractor shall meet all approved standards and protocols in accordance with NASA Chief Information Officer (CIO) Executive Notices, policies, procedures and guidelines in addition to those designated specifically by the Kennedy Space Center Office of the CIO and the KSC/NASA communications infrastructure management. The contractor shall meet all approved standards and protocols in accordance with the NASA Procedures and Guidelines, NPG 2810.1, Security of Information Technology.

The contractor shall provide support to the government for operational services for the center network based information technology (IT) security protections and

monitoring/measurement capabilities. The contractor shall provide the first line of network based monitoring and defense of IT resources, as well as provide a common shared IT Security operations capability to support the IT system environments that utilize the center networks as their primary communications transport service.

The contractor shall support the operations, maintenance, system administration, user support, and sustaining engineering of the following: the principal KSC network authentication systems, the KSC strong authentication system, the KSC IT Security/Network documentation databases, the KSC network perimeter access control systems, the KSC and Agency defined intrusion detection/monitoring systems, and all KICS managed systems related to the storage, tracking and auditing of all required Network/IT Security configuration/review/approval documentation processes and data.

The contractor shall implement government approved system rule set/configuration modifications to the network perimeter protection systems, including modifications to the firewall rule sets, editing of router based Access Control Lists (ACLs), and keep an accurate record log of all changes made to the system. The contractor shall retain electronic archival copies of the firewall traffic logs, firewall rule sets and related router/switch configurations.

The contractor shall actively review and validate the logs of management access to the network service delivery infrastructure to verify that only authorized individuals are connecting to these systems. The contractor shall assure that any modifications to the configurations of these devices are performed in accordance with government documented practices. The contractor shall review the log daily and report any unauthorized attempts to access this equipment to the IT Security management personnel for further investigation and resolution.

The contractor shall provide all relevant firewall traffic logs, intrusion detection activity reports, monitoring system data, network authentication system activity logs, strong authentication account activity data, and/or any available network data required to support an IT Security forensics investigation. The contractor shall provide engineering analysis support to aid in the interpretation of all activity log data provided.

The contractor shall maintain a comprehensive IT Security/Network documentation database containing all of the required data fields. The contractor shall ensure that the documentation data stored in this system has been verified to be accurate not less frequently than quarterly by means of the use of automated Scan tools where possible, and by monthly auditing of a randomly selected but statistically significant subset of the entries in the database for closer inspection and validation.

The contractor shall monitor all network traffic crossing the designated center ingress/egress points, as well as the instrumented internal backbone locations using the government defined and provided intrusion detection/monitoring systems. The contractor shall initiate incident response procedures by providing notification to the designated IT

Security personnel when confirmation of suspicious network traffic/protocol behavior is detected.

The contractor shall report any observed suspicious network protocol/traffic behavior for further investigation and/or the initiation of IT Security incident response actions. This will be accomplished using both the designated intrusion detection and monitoring systems, as well as any other contractor supported systems.

The contractor shall support the design, configuration, operation and data reporting of special purpose/function IT Security sensors/systems. These systems are used to detect specific events or to identify and quantify the presence of IT system vulnerabilities.

The contractor shall operate the Remote Authentication Dial In User Services (RADIUS) subsystems. RADIUS subsystems pass network specific authentication requests to the relevant user account/authentication /authorization systems managed by each of the respective IT organizations.

The Contractor shall issue and retrieve hardware tokens related to the KSC strong authentication system as directed by the government. The contractor shall utilize Communication Control to provide user telephone support. The contractor shall provide troubleshooting and problem isolation of functions related to the tokens and the user's system account, and maintain the relevant KSC strong authentication services system utility support subsystems.

The contractor shall perform IT vulnerability scans in accordance with government directives/instructions and at a frequency of at least quarterly, or when requested. The contractor shall provide special purpose IT Security vulnerabilities/assessment scans to identify/isolate a known IT Security vulnerability issue that requires immediate attention.

The contractor shall perform periodic auditing of the current KICS communications systems/architecture configurations with IT Security assessment results and recommendations. The contractor shall identify the corrective action to be taken and any additional resources required to minimize or eliminate the condition resulting in the weakness or problem area/process.

The contractor shall, in conjunction with the government, maintain a call down list process to notify appropriate IT Security personnel. The contractor shall initiate and perform an immediate IT Security incident response upon activation of the IT Security call down list per the instruction of the designated government personnel.

ADDRESS/LOCATION:	KSC Building M6-138 (CD&SC), Building M6-39 (PSCN), Building 360 (CIF), Building 60680 Hangar AE

SUPPORT REQUIREMENT: 16 hours X 5 days/week. Additional support as required by schedule and required support activities. After hour Response to Network events shall be within 1 hour.

FUNCTIONAL DESCRIPTION:
The Network IT Security systems include the following: perimeter access control, intrusion detection/monitoring, and network authentication.
The KSC perimeter access control systems are located at the two major and one minor ingress/egress points to the Kennedy Space Center. They are comprised of COTS firewall appliances running in concert with clustering/high availability solutions and interconnected with multiple routers and switches all performing a fundamentally different function. These systems are the principal means of dividing the center network environment into the major IT security zones and the interfaces to the Wide Area Networks/Internet. These systems are comprised of isolation routers and located at KSC and CCAFS.
The KSC intrusion detection/monitoring systems are a combination of COTS and open source tools based on Agency mandated product sets, KSC standard solutions, and a variety of open source alternatives to supplement these core solutions when necessary. These systems provide distributed multi-purpose and point solutions to meet a wide spectrum of IT Security monitoring/logging requirements. They are primarily co-located at the primary center ingress/egress points with the perimeter access control systems, although a number of the sensors are distributed out to a smaller number of key network traffic transit locations internal to each security zone.
The KSC IT Security analysis capabilities are a series of systems that provide both ongoing IT Security vulnerability scanning/assessment functions to the entire center and post analysis of the data collected by the intrusion detection/monitoring systems including the network infrastructure elements (via Syslog/RADIUS/Netflow data).
The KSC IT Security /IP/ Media Access Control (MAC) address registry database and perimeter access request databases reside on several small server class systems running internally developed databases based on COTS database software. These systems are located primarily in the Network Operations Center area of the CIF building.
The KSC network authentication systems are primarily a series of redundant RADIUS and TACACS+ systems providing both a basic network authentication/account activity logging service and a pass-through authentication function to more complex authentication systems that exist in the external IT organizations at KSC. These network authentication services provide intermediate authentication to a number of the KICS supported network services such as the Secure Remote Access System (VPN), Wireless LANs (both private and open), and the center dial-in services. All of these systems utilize the same basic COTS software for possible future integration.
The KSC strong authentication system is a COTS, two Factor, Hardware Token based authentication system that provides a primary source of account authentication for portions of the network infrastructure elements, several remote network access subsystems (S-RAS and Dial-In), and a number of IT environments/systems. These systems require a higher strength authentication service than can be offered in the traditional IT environments on center. Redundant nodes of this system are adjacent to the

isolation router perimeter WAN ingress/egress points and a number of the center's network infrastructure services systems (such as DNS).

UNIQUE REQUIREMENTS: None

FACILITY DESCRIPTION: Throughout KSC and CCAFS NASA assigned facilities.

5.0 INDEFINITE DELIVERY/INDEFINITE QUANTITY (ID/IQ) CATALOG OF SPECIALIZED SERVICES

The contractor shall participate in NASA-led efforts as described in this section. Types of work in this category include performing studies and analyses of communications system operations alternatives during early project definition, developing new technology for application to communication system operation, providing skills and teaming in support of government-led development projects, providing skills in support of government-led operations activities, and providing quick-reaction analyses and solutions to problems such as special program testing and/or technology demonstration requirements.

Each of the type of effort described in this section shall be initiated, managed, and performed by the contractor as described under individual task order agreements with the government.

5.1 Communication Component Design, Development, Integration, and Operational Support Services

The contractor shall provide resources to support the development of new communication and information technologies that will ultimately lead to significantly reduced operations costs.

The contractor shall provide support in the development of one-of-a-kind or next-generation communications capabilities. They range from development of a communications capability for small local customers to a Center-wide capability. These efforts have aggressive schedules and requirements and entail a high degree of risk. These efforts have significant government involvement in the definition and implementation of requirements.

These are government-led activities with frequent interaction between the government and the contractor.

This work is dynamic in nature and typically performed in a team arrangement with the government. The government defines the overall requirements of the effort and decides the respective responsibilities of each organization participating in the effort. Intermediate and final deliverable items are defined, but the nature of this work requires frequent changes to the baselines.

Future NASA-led development efforts in the area of computer network communications could include efforts to meet new requirements, migrate existing systems, and replace aging systems. Technical areas are expected to include but are not limited to server hardware, application software, communication asset management software, network systems, network hardware, and computer systems.

Future NASA-led development efforts in the areas of transmission, voice, video and still-imaging systems could include efforts to meet new requirements, migrate existing systems, and replace aging systems. Technical areas are expected to include but are not limited to fiber optics, copper, analog, digital, hard-wire, radio and microwave distribution. Also, compression and recording techniques may be addressed.

The contractor shall support the government with operational support for Information Technology and communication asset management in a control room type of environment. This type of effort is associated with the agency-wide OneNASA information technology initiatives that are being activated at the Kennedy Space Center. The type of operational support the contractor shall provide includes but is not limited to system administration, help desk administration, and network management system analysis.

5.2 ID/IQ Types of Services

The contractor shall provide cost for engineering, analysis, operations, and related services to perform design, development and operations of KSC and NASA Information Technology and Infrastructure Network Systems. The contractor shall provide not to exceed pricing for each position identified in the following brief overviews

A) System Administrators:

A System Administrator shall have experience in the configuration, management, administration and support of the assigned systems. These may be messaging systems, server systems, network systems or collaboration systems.

B) Help Desk Services:

Help Desk Services support shall have technology backgrounds and experience in the operational utilization of assigned systems, troubleshooting problems with these systems, and how the assigned systems interoperate with other NASA systems. They must understand the details of the application of the tools and applications assigned. It is expected that there will be junior and senior level Help Desk Personnel.

C) System Engineering Services:

System Engineering support services include performance of overall engineering activities to support information technology enterprise development. These duties include: design, development, sustaining engineering, operations support, troubleshooting, problem resolution and integration of assigned operational systems.

D) Sub-System Engineer Services:

Sub-System Engineer support services include performance of engineering activities on specific subsystems engineering activities to support information technology enterprise development. These duties include: design, development, operational activity support, troubleshooting and problem resolution for assigned sub-systems.

E). Technical Support Services

Technical Support Services include performing activities associated with installation and activation of communication capabilities described in attachment J-1 sections 1.0 and 4.0. These duties include new facility activation, new communication system and sub-system activation, as well as support of information technology integration projects.

6.0 CONTRACT LEVEL INFORMATION TECHNOLOGY (IT)

Section 6.0 addresses all systems associated with the KICS contract including the administrative IT. Additional specific technical requirements for the IT systems are addressed in Section 4.0.

6.1 IT Security

All the IT system(s), including desktop computers, shall comply with Management of Federal Information Resources, OMB Circular A-130; Security of Information Technology, NPG 2810.1; Defining Baseline IT Security Requirements That Have Been Left to Center Discretion, KNPG 2810.1; Vulnerability Disposition, KNPG 2810.2, and any subsequent revisions to the Center's IT policies. Systems retained by the contractor shall be in compliance at contract start date. New systems shall be compliant prior to authorization to support KICS requirements.

The contractor shall protect sensitive unclassified information including Privacy Act information, proprietary data, International Traffic in Arms Regulated data, and export controlled data. The contractor shall protect information in accordance with NPG 2810.1.

6.2 Support IT Hardware and Software

Acquisition and maintenance of the hardware and software not accounted for in the Government Furnished Property List (Attachment J-1, Appendix 5) but used to support the KICS contract shall be the responsibility of the contractor. For example, the contractor is responsible for the systems and software that host configuration management, CAD, office automation, etc.

The contractor shall manage all IT functions in support of contract requirements. The contractor's IT system shall be compatible with the standards called out in Minimum Interoperability, NASA-STD-2804 (with the exception of IFMP compatibility); Minimum Hardware Configurations, NASA-STD-2805; UNIX Interoperability, NASA-STD-2810 and any applicable subsequent revisions to the center's IT policies.

7.0 LOGISTICS

The contractor shall perform logistics functions in support of all communication services provided under this contract.

7.1 Logistics Services

The contractor shall develop, implement and update a KICS Logistics Plan (DRD L-1) to ensure that all resources identified in the PWS are operationally ready to support communication services for Shuttle, DOD, LSPO, ISS programs and center wide institutional and operational activities.

The contractor shall assume the current inventory of all hardware and software as listed in Attachment J-1, Appendix 5. The contractor shall maintain all hardware, software, tools, test equipment, fixtures, and spares per Agency and KSC guidelines, policies and directives described in DRD L-1, as revised, utilizing MAXIMO®. The contractor shall ensure equipment is repaired and returned to stock in a timely manner to ensure no impact to operations due to lack of spare parts.

The contractor shall identify and provide critical spares, bench stock, consumables and associated materials required to meet the requirements of this contract. The contractor shall procure critical spares and bench stock identified through the maintenance planning activity for assigned hardware and systems.

The contractor shall provide receiving and inspection functions including accountability, storage and warehousing support, and receipt and issuance of supplies, materials, and equipment.

The contractor shall purchase goods and services of a program-specific nature necessary to accomplish assigned work on the KICS contract, in accordance with the guidance of the Federal Acquisition Regulations (FAR), and the NASA FAR Supplement (NFS). Program purchasing is defined as support to projects and other program activities associated with the KICS communications services.

7.2 Material Management

The contractor shall provide a material management capability in support of communication activities. The contractor shall include the following functions:

- Perform material requirements planning for Mod-kits requested by NASA and customers.

- The contractor shall store the Mod-Kits in a secure area until required by the customer.

7.3 Property Management

The contractor shall provide property management of Government Furnished Property (GFP) as identified in Attachment J-1, Appendix 5.

The contractor shall receive, tag, inspect, control, record, store, issue, track, and return or excess all government furnished property. The contractor shall report on the location and condition of the assets when requested by the government and asset owner.

The contractor shall utilize the existing property tags permanently affixed to all existing assets. New tags shall be permanently affixed to newly acquired or procured equipment. Upon validating equipment received from the predecessor contractor, the contractor shall permanently affix an identification label over the predecessor logo.

The contractor shall identify excess and obsolete out-of-service assets, and initiate disposal per Agency and KSC guidelines, policies and directives described in DRD-L1, as revised. Perform all aspects of the excess function to include, but not limited to preparation of all required documentation, in-check, locate, store, and screen.

The contractor shall develop and implement an Equipment Loss Rate Plan see DRD-L-2 to include equipment surveyed, items lost during the fiscal year, found on station, and any reinstated equipment.

7.4 Inventory Management

The contractor shall provide an Inventory Management System (IMS), utilizing MAXIMO®, for the tracking of and management of equipment, spares, repair parts, supplies, and material. The contractor shall provide maintenance planning and the required research, analysis and documentation to determine the minimum initial spares, materials and repair parts required to support this contract. The contractor shall report on the quantity, location and condition of the assets when requested by the government.

The contractor shall utilize and affix identification labels per Agency and KSC guidelines, policies and directives, including revisions, described in DRD-L1.

The contractor shall review NASA, government, and industry alerts such as GIDEP per KHB 5310.1, Reliability, Maintainability, and Quality Assurance Handbook. The contractor shall identify the affected hardware within the contractor's responsibility including off-site vendors and depots, perform an analysis of the problem, provide recommendations and corrective actions to the government, implement corrective actions if required and notify the government of corrective actions taken.

7.5 Warehouse Storage Management

The contractor shall utilize government provided storage facilities for storage of all hardware, software and other associated equipment to meet the requirements of this contract. The contractor shall store all hardware, software and other associated equipment in accordance with manufacturer's storage specifications and recommendations that meets Agency and KSC guidelines, policies and directives described in DRD-L1, as revised. The contractor shall report on the location and condition of the assets when requested by the government and asset owners.

7.6 Transportation Services

The contractor shall:

- Provide transportation services to meet scheduled and unscheduled operations to include the following functions: freight receiving service including inspection of all over, short and damaged shipments.

- Prepare appropriate documentation for outbound shipments: e.g., Request for Shipping Document, KSC Form 7-248, Vendor Supplied Air bill/tag means of transportation, (i.e., FedEx air bill, Airborne prepaid label, or UPS ARS tag).

- Provide packing, crating and handling of supplies, materials, and equipment.

- Provide cargo pick-up and delivery between facilities. JBOSC or its successor will allow off loading at a JBOSC location for heavy or bulky loads (i.e., large cable reals).

- Provide transportation support of electronic and other equipment for calibration

- Perform Non-Bulk combination packaging tests, including drop test, stacking test, and vibration standard test.

- Provide security escort for non-routine, non-badged, Transportation Service Providers (TSP) from the guarded gates to KICS receiving. Transportation Service Providers with deliveries to multiple contractors on center shall formally transfer escort responsibility to subsequent contractors' receiving personnel.

- Treat effluent pumped from shallow groundwater contaminated designated manholes and/or connected duct banks, for operations and maintenance purposes, in accordance with the KSC Dewatering Policy and subsequent revisions. To comply with KSC environmental requirements, the contractor shall be responsible

for pumping water out of the contaminated manholes into a NASA-owned, JBOSC operated trailer mounted scrubber unit, which removes volatile organic contaminates.

7.7 Calibration Services

The contractor shall provide all calibration services. The calibration of test equipment shall include cleaning surfaces incidental to the calibration effort, analyzing particulates and hydrocarbons on surfaces exposed to fluid media, and making equipment repairs.

The contractor shall provide calibration services that meet Agency and KSC guidelines, policies and directives described in DRD-L1, as revised.

7.8 Confined Space Work Areas

Special requirements, coordination, and precautions shall apply to any contract work to be performed in confined spaces. The contractor preparing to perform work in a confined space is required to provide a written program for such work as part of their Safety and Health Plan, which will be consistent with the requirements of 29 CFR 1910.146. For work in telecommunication manholes, provisions of 29 CFR 1910.268(o) also apply. The contractor shall coordinate any such work in confined spaces with JBOSC Environmental Health, Fire Services and any other resident government or contractor organization whose employees may have access to the designated work location. Entry into and work in confined spaces shall be in accordance with the requirements of KHB 1820.4, "KSC Respiratory Protection Program", KNPG 1840.19 "Industrial Hygiene Programs", and all other applicable clauses of this contract.

Confined spaces, which contain water, shall have the water pumped out by the contractor prior to scheduling or performing a confined space entry check.

8.0 TRAINING AND CERTIFICATION OF PERSONNEL

The contractor shall plan, implement, and manage training and certification as described in this section and Attachment J-1, Section 2.3.6.

8.1 Training and Certification Plan

The contractor shall develop, implement, and maintain a Training and Certification Plan (DRD TR-1). The plan shall define how the contractor will ensure that all personnel performing work under this contract, including any subcontracts, are experienced and knowledgeable and meet training and certification requirements to perform assigned work as technology, equipment and software evolve. The contractor shall develop and implement this training and certification plan in compliance with KHB 3410.1, Implementing Instructions for KSC Systems, Safety, and Skills Training, and for Certification of Personnel, and KHB 1710.2, Kennedy Space Center Safety Practices Handbook, as the handbooks are revised, NPG 2810.1, Security of Information Technology, as revised, KHB 5310.1, Safety, Health and Independent Assessment Reliability, Maintainability, and Quality Assurance Handbook, as revised, and KHB 1610.1, KSC Security Handbook, as revised.

The contractor shall submit the Training and Certification Plan for approval as per DRD TR-1.

8.2 Regulatory Requirements

The contractor shall ensure and verify that all contractor and subcontractor personnel are knowledgeable of the laws, regulations, and government directives (e.g. OSHA, EPA, and Export Control Regulations, Agency policy and guidance, KSC directives) affecting them and concerning their tasks. Contractor personnel who engage in performing critical tasks, control critical processes, or engage in hazardous operations shall be trained and certified to participate in those activities. See Section 3.0 of this Performance Work Statement for additional information about regulatory requirements.

8.3 Safety and Health

The contractor shall ensure that all contractor and subcontractor personnel are knowledgeable about Agency and KSC safety and health initiatives, including the Voluntary Protection Program (VPP). See Section 3.0 of this Performance Work Statement for additional detail.

The Training and Certification Plan shall address safety and area access related training, including maximum work time requirements, described in KHB 1710.2.

8.4 Access to Restricted Work Areas

The contractor shall ensure that contractor personnel who require access to controlled work areas complete all required training and that badge requirements, including Personal Reliability Program (PRP) requirements (KHB 1610.1), are met as they are revised. The

contractor shall ensure that contractor personnel renew area access training as required to maintain access to restricted areas where work must be performed. The current list of KSC Operational Area Access Safety Training Requirements and KSC Operational Area Access Safety Training Matrix are shown in Figure 8-1 and Figure 8-2 respectively.

The contractor shall ensure that personnel required to perform work in DoD controlled work areas complete all required training and badge requirements as they are revised, and accomplish renewals as needed to maintain continuity of support in those areas.

Figure 8-2

8.5 Special Skills Certification

The contractor shall ensure that all contractor and subcontractor personnel who perform tasks requiring special skills certification complete the appropriate training and meet any certification requirements. The contractor shall ensure that contractor personnel are re-certified when required. The Training and Certification Plan shall identify the special skills to be used by the contractor and define how the contractor will ensure that training and certification are accomplished and maintained.

The Training and Certification Plan shall include, for each unique position identified in the staffing plan, a list of training and certification requirements for the position. This includes positions filled by subcontractors, and teaming or partner arrangements. The Training and Certification Plan shall define how training and certification requirements will be identified, documented, approved, and met for any positions not addressed in the staffing plan, such as short notice ID/IQ tasks that require special skills or certifications that occur between revisions of the staffing and training and certification plans.

8.6 Systems Training and On-the-Job Training (OJT)

The contractor shall ensure that contractor personnel performing work under this contract, and any subcontract, are competent and possess the necessary skills and knowledge about the systems, equipment, software, and tasks they are assigned to support. The Training and Certification Plan shall identify systems training needed to ensure the work force is competent to perform assigned tasks as technology, equipment, and software evolve.

Any OJT program shall be clearly defined in the Training and Certification Plan and ensure that competent, trained and knowledgeable personnel oversee such training.

8.7 Information Technology Security Training

The contractor shall ensure that all contractor and subcontractor personnel meet IT security-training requirements that apply to the performance of assigned work. Different levels of training will be required for employees charged with different levels of access to IT systems, as required by NPG 2810.1.

The Training and Certification Plan shall include the use of NASA SOLAR online IT security training, or provide equivalent training that is approved by the NASA-KSC Chief Information Officer (CIO).

8.8 Historical Records

The contractor shall maintain historical records to document the training and certification of contractor personnel, and of all training conducted by the contractor.

The contractor shall enter and update training data in the KSC Training and Certification Record System (TCRS) PM50 for all personnel trained by the contractor.

The contractor shall ensure that subcontractors maintain historical records to document training and certification of subcontractor personnel, and that subcontractor training is recorded in the TCRS.

The contractor shall maintain each employee's training records for at least three years after that employee's employment ends. The contractor shall provide contractor and subcontractor training records to the government upon request.

The contractor shall transition the training records, of personnel retained from the predecessor contractor, and incorporate them into the contractor's records. The contractor shall also define in the Training and Certification Plan how the contractor will transition KICS training records to any successor contractor.

8.9 Reporting and Status of Training and Certification

The contractor shall report the status of training and certification to the government as required in KHB 3410.1 and KHB 1710.2, as they are revised.

The contractor shall provide the status of training and certification at operational reviews and other meetings as directed by the government, to report readiness to support planned operations. See Sections 2.3.3 and 2.3.4 of this Performance Work Statement for specific information.

8.10 Use of Existing Training Resources

The contractor shall use existing government-funded training resources when available. This includes the use of training provided by other contractors employed by KSC, such as, but not limited to, area access, Emergency Life Support Apparatus (ELSA), and IT security training.

A list of government-funded, contractor-provided training to meet NASA KSC/CCAFS work requirements is shown in Figure 8-3. A list of government-funded, contractor provided training to meet DoD/CCAFS work requirements is shown in Figure 8-4.

8.11 Government and KSC Contractor Access to KICS Training

For KICS developed or provided training, the contractor shall provide the government access to their training schedule. The contractor shall permit attendance by government personnel and government customers in any scheduled training, on a space-available basis. KICS developed training shall be, at least, recorded in digital format.

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** DRD H-1 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** N/A

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Motor Vehicle Utilization Plan

7.0 **DESCRIPTION/USE:** To ensure proper use of all GSA and/or government vehicles and how that vehicle will be utilized.

8.0 **DISTRIBUTION:** CO (1), TA-A (1)

9.0 **INITIAL SUBMISSION:** Within 30 days of contract start

10.0 **SUBMISSION FREQUENCY:** Semiannually

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** Section H.3

13.0 **DATA PREPARATION INFORMATION:** The Motor Vehicle Utilization Plan shall address the Contractor's approach to ensure the proper utilization of GSA and/or government vehicles. This includes the monthly submittal of KSC Form 7-490 (KSC Vehicle Use Record) to the Vehicle Coordinator and the completion of proper maintenance of the vehicle.

13.1 **SCOPE:** All vehicles supplied by GSA or commercial rental vehicles

13.2 **APPLICABLE DOCUMENTS:** KSC Clause 52.208-90 Motor Vehicle Management

13.3 **CONTENTS:**

13.4 **FORMAT:** Microsoft Word

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 DRD NO.: M-2 **ISSUE:** Basic

2.0 DR LINE ITEM NO.: Section 2.2, Section 2.3

3.0 DATA TYPE: Plan

4.0 DATE REVISED: N/A

5.0 PAGE: 1/3

6.0 TITLE: KICS 5-Year Technical and Cost Plan

7.0 DESCRIPTION/USE: To define planned work and estimate the cost of work, including the basis for the estimate, to be performed under the contract during the subsequent five fiscal year period, to define an operating plan for the first/next fiscal year, and facilitate submission of the information into the Program Operating Plan (POP) process.

8.0 DISTRIBUTION: Per Contracting Officer's Letter

9.0 INITIAL SUBMISSION: July 20, 2004, or 30 days prior to scheduled POP submit, or as required to have the final plan in place to meet the POP development schedule, whichever is earlier.

10.0 SUBMISSION FREQUENCY: Annually. Submit 30 days prior to scheduled POP submit, or as required to have the final plan in place to meet the POP development schedule, whichever is earlier.

11.0 REMARKS: Approval by IT&C with concurrence from stakeholder organizations.

12.0 INTERRELATIONSHIP: Attachment J-1, Section 2.0

13.0 DATA PREPARATION INFORMATION:

13.1 SCOPE: The 5-Year Technical and Cost Plan defines all the work planned, including both in-family and out-of-family tasks, over the five government fiscal years subsequent to each annual submission. This includes O&M, sustaining engineering (including replacement of obsolete equipment/systems), ID/IQ activities, and any related support activities. Execution of out-of-family work is dependent upon budget and funding availability. The plan shall provide a text description of the work to be accomplished during each fiscal year along with cost estimates and the basis for those cost estimates. The plan shall identify the program(s) that provide funding for that work and the amounts of their contributions, and include a breakdown of O&M, sustaining engineering, and ID/IQ costs for each. The first fiscal year of the plan shall include an operating plan that provides monthly cost-phasing and a breakdown of contractor and subcontract labor, materials, and other costs. Data shall also be provided in a form that can be directly submitted to each Program's Program Operating Plan (POP) process.

13.2 APPLICABLE DOCUMENTS: N/A

1.0 **DRD NO.:** M-2 (Continued) **ISSUE:** Basic

13.3 **CONTENTS:** The plan shall contain text descriptions of planned work and cost data to support examination and prioritization of planned work. Cost data shall also be in a form readily adaptable to Program Operating Plan (POP) products. The plan shall include at least the following sections:

1. Executive Summary: including a text summary of work planned, organized by government fiscal year (GFY), and associated schedule, labor, and cost data in a format that can be directly submitted to each program's POP submit.
2. Planned Work: Including text descriptions of work planned over the next five government fiscal years including justifications for implementation, along with identified risks any potential impact to mission accomplishment, and prioritization of work. Descriptions shall be organized into government fiscal years, with functional categories within each government fiscal year (GFY) as directed by the government, including:
    a. Voice Systems
    b. Video Systems
    c. Transmission Systems
    d. Networks
    e. IT Security and Wide Area Networks
    f. Miscellaneous Communications Support

    Each functional category, described above, shall be further divided into sub-categories including:
    1. Operations and Maintenance (O&M)
    2. Sustaining Engineering
    3. ID/IQ Tasks

    Descriptions shall include cost estimates (Table form) for each task, including the basis for cost estimates, and account for cost escalation over the five government fiscal years represented by the plan.
3. Operating Plan for GFY ##: Provide an operating plan that reflects a detailed breakdown of costs for the upcoming government fiscal year, as directed by the government, including at least:
    a. Labor costs for contractor, partners, and subcontractors
    b. Materials
    c. Other direct costs
    d. Other costs

1.0 **DRD NO.:** M-2 (Continued) **ISSUE:** Basic

13.3 **CONTENTS:**

4. Cost Summaries: Including roll-up formatted data representing the planned work described in the Planned Work section (item 2, above) to support cost analysis as directed by the government, and provide the basis for the POP inputs. Cost summary data shall reflect the costs of each component of the roll-up and total them to form at least the following cost summaries:
    a. Cost by functional category for each GFY
    b. Cost by sub-category within each functional category for each GFY
    c. Program contribution by functional category for each GFY
    d. Program contribution by sub-category within each functional category for each GFY
    e. Total contribution by each program within each GFY
    f. Total cost by GFY and total contract value
5. Proposed Additional Work: A brief description of additional work proposed with estimated costs and a prioritization of the proposed tasks.

13.4 **FORMAT:** One hard copy, and electronic copy in Microsoft Office format compatible with government systems.

In such format to support the government's development of operating plans.

13.5 **MAINTENANCE:** Re-Issue Annually, with colored change pages for interim changes.

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** M-3 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** 2.3.7

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Configuration Management Plan

7.0 **DESCRIPTION/USE:** To develop, implement and maintain a Configuration Management Plan describing the contractor's approach to comply with the configuration management requirements of the contract.

8.0 **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** Final version 3 months after contract award

10.0 **SUBMISSION FREQUENCY:** Annually, with updates as required

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** PWS 2.0

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** The plan shall describe the contractor's management approach and planned implementation methods for accomplishing the configuration management requirements of the contract.

13.2 **APPLICABLE DOCUMENTS:** KNPG 8040.1 KSC Configuration Management Policy and Guidelines
KHB 8040.1 Payloads Configuration Management Handbook

13.3 **CONTENTS:** The Plan shall describe the configuration management process for hardware, software, firmware, and documentation to be implemented and methods to be used for configuration identification, interface control, hardware, software and firmware documentation control, status accounting, and configuration verification. The plan shall describe the contractor's CM organization, policies, procedures, implementation approach, and control mechanisms that are to be used to ensure compliance with all configuration management requirements.

13.4 **FORMAT:** Format chosen by Contractor, electronic format and availability as required by Contracting Officer's letter.

13.5 **MAINTENANCE:** Changes shall be incorporated by change pages or complete reissue.

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** M-4 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** 2.3.8

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Security Plan

7.0 **DESCRIPTION/USE:** To provide details of approach to maintain security of personnel, equipment, operational IT security systems, monitoring/measuring capabilities, firewall/perimeter access control systems, intrusion detection and monitoring technologies, network event analysis and authentication, and communication systems.

8.0 **DISTRIBUTION:** Per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** Final version approved prior to completion of Phase-In

10.0 **SUBMISSION FREQUENCY:** Annually

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** PWS 2.0

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** N/A

13.3 **CONTENTS:** In accordance with NPG 2810, as revised.

13.4 **FORMAT:** Format chosen by the contractor

13.5 **MAINTENANCE:** N/A

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** M-5 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** 2.3.9

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Emergency Preparedness Plan

7.0 **DESCRIPTION/USE:** To provide details of approach to maintain security of personnel, equipment, IT systems, and communication systems.

8.0 **DISTRIBUTION:** TBD

9.0 **INITIAL SUBMISSION:** Final version approved prior to completion of Phase-In

10.0 **SUBMISSION FREQUENCY:** Annually

11.0 **REMARKS:** Approved by NASA IT&C

12.0 **INTERRELATIONSHIP:** PWS 2.0

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** JHB 2000
JDP-KSC-P-3014

13.3 **CONTENTS:** At a minimum, the Emergency Preparedness Plan shall include:

A. Concept of Operations statement
B. Incident management structure
C. Threat Planning for:
   i. Communication system or facility loss
   ii. Severe weather including hurricanes, tornadoes, and high winds
   iii. Fires and explosions
   iv. Launch failure
   v. Hazardous material release or spill
D. Response and recovery processes
E. Training exercises and simulations
F. Record preservation

13.4 **FORMAT:** Format chosen by the contractor

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/2

6.0 **TITLE:** Contract Performance Metrics Report

7.0 **DESCRIPTION/USE:** To develop, maintain, analyze clear quantifiable metrics in partnership with the Information Technology and Communications Directorate. Performance Metrics shall be developed to include as a minimum; Safety & Health, Technical, Cost Performance, Management Effectiveness, Areas of Emphasis, and Customer Satisfaction.

8.0 **DISTRIBUTION:** Per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** Final version 9 months after contract award

10.0 **SUBMISSION FREQUENCY:** Quarterly

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** PWS 2.4

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** N/A

13.3 **CONTENTS:** The contents of the Performance Metrics and its associated reports should include the following

1. Safety & Health
   a. Lost Time Rates
2. Technical
   a. See Attachment J-5, Table J5-1
   b. See Attachment J-5, Tabel J5-2
3. Cost Performance
   a. Maintenance Cost
   b. Project Cost
   c. ID/IQ Cost
4. Management Effectiveness
   a. Cost
   b. Schedule
5. Customer Satisfaction
   a. Flexibility
   b. Responsiveness
6. Areas of Emphasis
   a. To be individually determined

1.0 **DRD NO.:** M-8 (Continued) **ISSUE:** Basic

13.4 **FORMAT:** Format Chosen by Contractor

13.5 **MAINTENANCE:** N/A

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** M-9 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** 2.5

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Risk Management Plan

7.0 **DESCRIPTION/USE:** The Contractor shall submit its detailed Risk Management Plan with its proposal. The plan shall be maintained throughout the life of the contract.

8.0 **DISTRIBUTION:** Per Contracting Officer letter

9.0 **INITIAL SUBMISSION:** Final version approved 30 days after contract award

10.0 **SUBMISSION FREQUENCY:** Annually

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** PWS 2.5

13.0 **DATA PREPARATION INFORMATION:** Prepare and maintain a current Risk Management Plan that delineates the tailored processes, methods, and tools for identifying/managing project risks to minimize performance issues.

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** NPG 7120.5
NPG 8000.4

13.3 **CONTENTS:** The plan shall, as a minimum, provide the following elements:

a. Introduction/Overview of Risk Management process.
b. Project organization, roles, and responsibilities.
c. Risk Management activities and practices in detail, including risk identification processes and procedures, analysis/prioritization procedures, procedures to progree from risk identification through risk mitigation; methods to measure the success of risk mitigation efforts, and procedures regarding how the Contractor will provide status to NASA of ongoing risk mitigation efforts.
d. Budget, resources, and milestones (e.g., project risk reviews, quarterly risk management reviews) for risk management activities and risk mitigation.
e. Risk management documentation (e.g., procedures for documenting risks, products provided [risk sheets, prioritized risk lists, risk tracking database, milestone review risk charts]).
f. Method to be used to train the Contractor and support personnel in risk identification and mitigation.
g. Risk management assumptions, technical considerations, constraints, and de-scope otions.

13.4 **FORMAT:** Microsoft Word

13.5 **MAINTENANCE:** N/A

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** M-10 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:**

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/1

6.0 **TITLE:** Advance Notification of Workforce Reduction

7.0 **DESCRIPTION/USE:** The Contractor shall notify in writing the Industrial Relations Officer, Code QA-A, with a copy to the Contracting Officer, at least 15 calendar days in advance of notification to employees of any planned workforce reduction of permanent, full-time, and part-time employees that exceeds 10% of the total workforce or 25 employees, whichever is less.
In addition, if Workforce Adjustment and Retraining Notification (WARN) Act notification is required, the contractor shall provide to the IRO and the Contracting Officer the information required by the WARN Act, section 639.7(c) and a listing of all organization to be notified including those required by section 639.6(a), (c), and (d), at least five (5) days prior to the issuance of the notification.

8.0 **DISTRIBUTION:** Per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** N/A

10.0 **SUBMISSION FREQUENCY:** As Required

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** N/A

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** N/A

13.3 **CONTENTS:** The notification shall include the reason for the reduction in workforce, the number of employees impacted, their labor classifications, their physical location, and their location within contract organizational structure.

The notification shall also identify the expected date of the first separation and the anticipated schedule for making separations, as well as the name and telephone number of a company official to contact for further information. The contractor is requested to provide a briefing to NASA Headquarters Office of Space Flight (Code M), Office of Legislative Affairs (Code L), and the appropriation Congressional staff/member.

Contractor form is acceptable.

13.2 **APPLICABLE DOCUMENTS:** KHB 1710.2 KSC Safety Practices Handbook

13.3 **CONTENTS:** Mishap and VPP information totals by quarter and cumulative by year.

13.4 **FORMAT:** Microsoft Word

13.5 **MAINTENANCE:** Continuous update and revision as needed

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 DRD NO.: SHE-3 **ISSUE:** Basic

2.0 DR LINE ITEM NO.: 3.1.4

3.0 DATA TYPE: N/A

4.0 DATE REVISED: N/A

5.0 PAGE: 1/1

6.0 TITLE: Mishap Data Report

7.0 DESCRIPTION/USE: Documents summary data and notification on mishaps, incidents or close calls

8.0 DISTRIBUTION: Per Contracting Officer's letter

9.0 INITIAL SUBMISSION: Final version 30 days after contract award

10.0 SUBMISSION FREQUENCY: See 13.0 Data Preparation Information

11.0 REMARKS: N/A

12.0 INTERRELATIONSHIP: PWS 3.0

13.0 DATA PREPARATION INFORMATION:

All mishaps and close calls shall be reported.
Immediate notification of all incidents with the potential for being classified as a mishap or close call shall be reported to the NASA TA-C1 Chief within four hours or prior to the end of the shift, whichever is first. For incidents occurring on evening or night shifts, the report must be received by 6:45am.

The information shall be provided using NASA Form 1627 or a contractor' approved form. A follow-up report shall be sent within three days of the initial report or within one day of mishap categorization, whichever is less.

For incidents that do not meet the definition of a mishap or close call as specified in NPG 8621.1, the follow-up report shall consist of a written assessment as to why the incident should not have been classified as a mishap or close call.

For incidents categorized as mishaps, the follow-up report shall consist of an initial NASA Mishap Report. A completed NASA Mishap Report or investigation status report shall be provided within 10 days of the initial NASA Form 1627 submittal.

Serious mishaps (Type A, Type B or Type C damage) shall be reported within one hour.

The mishap must be entered in the NASA Incident Reporting Information System (IRIS) within 24 hours and updated as required.

1.0 **DRD NO.:** SHE-3 (Continued) **ISSUE:** Basic

13.1 **SCOPE:** During support of, or on the property of KSC and off center support locations

13.2 **APPLICABLE DOCUMENTS:** KHB 1710.2 KSC Safety Practices Handbook

13.3 **CONTENTS:** See NASA Form 1627

13.4 **FORMAT:** Microsoft Word

13.5 **MAINTENANCE:** Continuous update and revision as needed

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-1 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.1.3
3. **DATA TYPE: 2**
4. **DATE REVISED:**
5. **PAGE: 1/1**
6. **TITLE:** Sustaining Engineering Plan

7. **DESCRIPTION/USE:** To describe the contractors system's sustaining engineering approach in providing configuration, operational procedures and readiness for all KSC Ground Support communications systems to support processing, launch, landing, and institutional functions, including nominal and contingency/emergency.

8. **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter.

9. **INITIAL SUBMISSION:** Draft 3 months after phase in period.

10. **SUBMISSION FREQUENCY:** Final version 6 months after phase in period, update as required.

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** The Sustaining Engineering Plan shall describe the basis for the contractor sustaining engineering approach, organization, and systems and establish processes for accomplishing and managing system engineering, integration, assessments, upgrades, maintenance and documentation for functions described in the PWS. Processes shall be documented in the sustaining engineering plan to insure that all drawings are complete and current at all times showing current system configuration and operational configurations as applicable. Processes shall be documented in the sustaining engineering plan to insure that drawing packages and operational procedures are completed and approved prior to initiating any system change or addition.

13.2 **APPLICABLE DOCUMENTS**

NSTS 08117	Certification of Flight Readiness Requirements
SSP 50108	Certification of Flight Readiness for Space Station
GP-435 Vol. 1 & 2:	Engineering Drawing Practices
G. KSC-DF-107:	DE Technical Document Style Guide

13.3 **CONTENTS:** KSC Sustaining Engineering Plan shall describe the processes of maintaining configuration of all facilities, procedures, hardware, firmware, software and documentation required to support routine activities. Sustaining Engineering processes shall include configuration and documentation containing: top level system functional block diagrams, detailed functional system configuration, firmware, software, facility configurations, physical diagrams including part numbers as applicable, and operational configurations and schedules as applicable for systems which have dynamic configurations per operational requirements.

13.4 **FORMAT:** Contractor format is acceptable; electronic format and availability as required by Contracting Officer's letter.

13.5 **MAINTENANCE:** Changes shall be incorporated by change pages or complete re-issue.

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-2 **ISSUE:** Initial
2. **DR LINE ITEM No.:** 4.1.2
3. **DATA TYPE:**
4. **DATE REVISED:**
5. **PAGE:** 1/1
6. **TITLE:** Kennedy Integrated Communication System 5-Year Maintenance Plan

7. **DESCRIPTION/USE:** To describe the current maintenance schedules, develop maintenance budget costs for KICS communication systems and equipment, describe maintenance procedures, and incorporate KICS maintenance performance metrics for all communications systems that support processing, launch, landing, and administrative functions.

8. **DISTRIBUTION:** Formatting and electronic distribution

9. **INITIAL SUBMISSION:** Draft 3 months after phase in period

10. **SUBMISSION FREQUENCY:** Final version 6 months after phase in period; updates as required.

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** The KICS Maintenance Plan defines how the contractor is going to budget, install, operate, maintain, repair, protect, and preserve the contractor and Government Furnished Property.

13.2 **APPLICABLE DOCUMENTS**

KSC-STD-E-0021 Standard for Design of KSC Telecommunication Premises Distribution Systems

13.3 **CONTENTS:** This plan shall consist of those procedures that constitute the contractor's Maintenance Plan and shall include at a minimum the following categories:

a. Five Year Maintenance Plan
b. Equipment Maintenance Procedures
c. Maintenance Performance Metrics
d. Equipment Spares
e. Maintenance Frequencies
f. Equipment calibration requirements

13.4 **FORMAT:** Contractor format is acceptable; format and availability as required by Contract requirements.

13.5 **MAINTENANCE:** Changes shall be incorporated by change pages or complete re-issue.

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-3 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.5
3. **DATA TYPE:** Reports
4. **DATE REVISED:**
5. **PAGE: 1/1**
6. **TITLE:** Reports, Telephone Call Detail

7. **DESCRIPTION/USE:** The KICS contractor shall maintain a record of the beginning and ending date and time of all Off-Center telephone calls in electronic format on CDROM. This information shall be maintained by the KICS contractor and made available to authorized personnel, in accordance with NASA and Center policy for release of such information, when requested.

8. **DISTRIBUTION:** CD-ROM per Contracting Officer's letter.

9. **INITIAL SUBMISSION:** One week after effective date of the delivery order.

10. **SUBMISSION FREQUENCY:** Weekly.

11. **REMARKS:** The Contractor shall provide all call detail records via CDROM, of all outbound calls, in support of security issues and tolls separation, verification and billing.

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** Call detail records associated with a particular call shall be maintained on-line and, depending on traffic load and capabilities of the switch, downloaded on a regular schedule to CDROM for further separation and processing. This information shall be maintained in such a way as to provide all outbound (on-site to off-site, including Local Exchange Carrier (LEC)) call details. Data file format shall be provided to authorized personnel to ensure interface compatibility with the NASA Management Information System. Call detail records shall be handled in accordance with established Privacy Act regulations. Records shall be retained in accordance with NARA General Records Schedule and NASA NPG 1441.1C and any Center-specific guidelines pertaining to release of such information

13.2 **APPLICABLE DOCUMENTS:**

13.3 **CONTENTS:** The following fields of the Call Detail Records shall be required for all outbound calls:

a) Originating phone
b) Terminating (Destination) phone number (up to 15 digits)
c) Destination number type (domestic, international, or unknown)
d) Call type – FTS/ Toll Free/Local/International/zero-plus (third party bill, credit card or collect)
e) Length of Call (hours; minutes; seconds)
f) Time of call origination (hour:minutes)
g) Month/day/year of call
h) City, State, Country Called (International Country Code, City Code, Local Number)
i) Agency/Company Name of Calling Number
j) Department/Mail Code assigned to the Calling Number
k) Building Number of Calling Number
l) Date/Time Period covered by Report
m) Billable directory number.

13.4 **FORMAT:** CD-ROM. Contractor format is acceptable.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-4 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.2.5.1
3. **DATA TYPE:** Reports
4. **DATE REVISED:**
5. **PAGE: 1/1**
6. **TITLE:** Photographic Post Operation Critique follow-up Report

7. **DESCRIPTION/USE:** The contractor provides motion picture, still photographic, digital and video products and services used in support of a Shuttle launch and landing. The contractor shall provide a post operation critique report of all Photo Support following Shuttle launch and landing support operations.

8. **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter.

9. **INITIAL SUBMISSION:** 3 Reports (T+2 working days, T+12 working days, and T+30 working days) issued in support of every launch operation.

10. **SUBMISSION FREQUENCY:** Issued in support of every Shuttle launch operation. 2 working days post launch (T+2 working days) with updated reports at 12 working days post launch (T+12 working days) and 30 working days post launch (T+30 working days).

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** The contractor shall provide a post operation critique report of Photo Support following all Shuttle launch support operations. This critique shall cover all contractor provided motion picture, still photographic, digital and video products and services used in support of a Shuttle launch.

13.2 **APPLICABLE DOCUMENTS**

13.3 **CONTENTS:** The following information shall be required as a minimum:
1. Milestone Support Events
2. Camera Coverage
3. Conduct of Operation
4. Equipment Problems/Malfunctions
5. Laboratory Support Status
6. Data Shipment Status
7. Discrepancy/Malfunction Summary
8. Console Log

13.4 **FORMAT:** PDF file format, electronically submitted.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-5 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.2.5
3. **DATA TYPE:** Reports
4. **DATE REVISED:**
5. **PAGE:** 1/1
6. **TITLE:** Photographic Product Cost Summary

7. **DESCRIPTION/USE:** A listing of products requested by authorized NASA customers and cost during a monthly period.

8. **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter.

9. **INITIAL SUBMISSION:** 30 days after full assumption of full performance for photo services

10. **SUBMISSION FREQUENCY:** Monthly.

11. **REMARKS:** This report provides control to prevent misuse of photographic services.

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** Applicable to all items ordered that requires a work order.

13.2 **APPLICABLE DOCUMENTS**

13.3 **CONTENTS:** The following fields shall be required:

a) Requester of photographic services
b) Products requested per work order
c) Per Unit Cost of items requested
d) Total Cost of each work order

i. Date of request from user
ii. Date of work completed
iii. Total cost of all work orders
iv. Work order number
v. Description of requested work

13.4 **FORMAT:** Microsoft Excel format, submitted electronically.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-6 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.2.5
3. **DATA TYPE:** Report
4. **DATE REVISED:**
5. **PAGE:** 1/1
6. **TITLE:** Shuttle Photographic Acquisition and Distribution Document (PADD)

7. **DESCRIPTION/USE:** To have the contractor describe his technical support plan in advance of a launch for each imaging item ordered by basic approved requirement in a launch photo services & products package, separating and coding all additional requirements from the basic package by product or service and identified by distinct item number.

8. **DISTRIBUTION:** Initial: electronic distribution to the applicable launch program customer (Resource Advisor/Manager) and COTR; Final: one paper file copy to the Launch customer (Resource Manager/Advisor) and one paper copy to the COTR after product distribution is closed..

9. **INITIAL SUBMISSION:** NLT 15 days before launch

10. **SUBMISSION FREQUENCY:** Per Mission event requiring certified photo support.

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.2.2.5 Photo Services

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** F-1 pre-launch imaging activities, launch camera/metric and optical tracking operations, equipment and film retrieval, image processing and finishing, and final delivery milestones/close-out.

13.2 **APPLICABLE DOCUMENTS:** Related L&L PRD, KPRD, OR's, OD's, UDS, etc.

13.3 **CONTENTS:** Spreadsheet sortable listings of each operational requirement and the technical instrumentation information (specifics: location, camera ID, lens, film/tape, settings, timing, start/stop, etc) that will acquire the proper images; to note intermediate processing and finishing information that will affect the turnaround time in meeting the end product's quantity/quality specifications on time as ordered. Product distributions to be itemized, POCs/phone numbers; date of expected delivery; closeout by adding date of actual delivery (or mailing), pickup person's name(s) (or mailer), signature(s) on official file paper copy and date added when product distribution is complete.

13.4 **FORMAT:** Contractor Spreadsheet Format (compatible with Microsoft Excel) and PDF format, electronically delivery required.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-7 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.5
3. **DATA TYPE:** Reports
4. **DATE REVISED:**
5. **PAGE: 1/1**
6. **TITLE:** Reports, Asset Transition Value (ATV)

7. **DESCRIPTION/USE:** The KICS contractor shall maintain a record of the Asset Transmission Value of the Telephone Instruments by type.

8. **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter.

9. **INITIAL SUBMISSION:** One year from date of start of telephone section of contract.

10. **SUBMISSION FREQUENCY:** Annually.

11. **REMARKS:** The Contractor shall provide the ATV for use by the government to determine the value of the instruments.

12. **INTERRELATIONSHIP:** PWS 4.0

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** The ATV shall consist of all of the contractor owned telephone instruments at KSC. The listing shall be maintained by the contractor in a manner that makes the evaluation of the value of the assets readily obtainable, easily identifiable and traceable.

13.2 **APPLICABLE DOCUMENTS**

13.3 **CONTENTS:** The following information for each instrument is required:
Seat type, aquision date, beginning value, value as of report and location of instrument

13.4 **FORMAT:** Contractor Spreadsheet Format (compatible with Microsoft Excel); on-line availability required.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-8 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.2.5.3
3. **DATA TYPE:**

5. **PAGE:** 1/1
6. **TITLE:** DOD Multi-Media Photographic Acquisition and Distribution Document (PADD)

7. **DESCRIPTION/USE:** To have the contractor describe his technical support plan in advance of a launch for each imaging item ordered by CLIN/SubCLIN in a launch multi-media package, separating and coding all additional requirements from the basic package by CLIN/SubCLIN

8. **DISTRIBUTION:** Initial: electronic distribution to the applicable DOD launch program customer (Resource Advisor/Manager) and DOD PM/ERVIM; Final: one paper file copy to the DOD Launch customer (Resource Manager/Advisor) and one paper copy to the DOD PM/ERVIM after product distribution is closed..

9. **INITIAL SUBMISSION:** NLT 15 days before launch

10. **SUBMISSION FREQUENCY:** As Required.

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.2.2.5.3 DOD Technical Multi-Media Support

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** F-1 pre-launch imaging activities, launch camera/non-metrics tracking operations, equipment and film retrieval, image processing and finishing, and final delivery milestones/close-out.

13.2 **APPLICABLE DOCUMENTS:** Related UDS (PRDs, ORs, ODs), DOD Technical Multi-Media Support Exhibit A, Associated DOD Delivery Order.

13.3 **CONTENTS:** Spreadsheet sortable listings of each operational requirement and the technical instrumentation information (specifics: location, camera ID, lens, film/tape, settings, timing, start/stop, etc) that will acquire the proper images; to note intermediate processing and finishing information that will affect the turnaround time in meeting the end product's quantity/quality specifications on time as ordered. Product distributions to be itemized, POCs/phone numbers; date of expected delivery; closeout by adding date of actual delivery (or mailing), pickup person's name(s) (or mailer), signature(s) on official file paper copy and date added when product distribution is complete.

13.4 **FORMAT:** Contractor Spreadsheet Format (compatible with Microsoft Excel); on-line availability required.

13.5 **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DRD No.:** DRD-T-9 **ISSUE:** RFP
2. **DR LINE ITEM No.:** 4.2.2.5.3.1
3. **DATA TYPE:**
4. **DATE REVISED:**
5. **PAGE:** 1/1
6. **TITLE:** DOD Multi-Media Performance-Production Report

7. **DESCRIPTION/USE:** To provide the customer/agency a post-operation critique for each imaging item and outcome (performance and end product quality) in a launch multi-media package, separating and coding all additional requirements and outcomes from the basic package statistics.

8. **DISTRIBUTION:** Electronic distribution to the applicable launch program customer (Resource Advisor/Manager) and DOD PM/ERVIM.

9. **INITIAL SUBMISSION:** Following each DOD launch NLT 2WD

10. **SUBMISSION FREQUENCY:** Launch+2WD, Launch+12WD, Close-out by Launch+30WD.

11. **REMARKS:**

12. **INTERRELATIONSHIP:** PWS 4.2.2.5.3 DOD Technical Multi-Media Support

13. **DATA PREPARATION INFORMATION:**

13.1. **SCOPE:** F-1 pre-launch imaging activities, launch camera/non-metrics tracking operations, equipment and film retrieval, image processing and finishing, and final delivery milestones/close-out.

13.2. **APPLICABLE DOCUMENTS:** Related UDS (PRDs, ORs, ODs), DOD Technical Multi-Media Support Exhibit A, Associated DOD Delivery Order.

13.3. **CONTENTS:** Provide copies of console logs with the Launch+2WD report. Provide a summary matrix of all discrepancies or malfunctions. Provide additional details and data fields identifying affected cameras by name and serial number, lenses by focal length, name and serial number, trackers by name and serial number, amount and type of damage (motion picture film in feet, stills in number of exposures, video in minutes), cause of trouble/damage, corrective actions and/or proposed process improvements with milestones as applicable in the initial report. Provide updated information, findings, and milestones for corrective actions and/or process improvements as applicable in the follow-up Launch+12WD and Launch+30WD reports. Provide individual numbers and overall metrics (unacceptable/acceptable x 100=%) for each of the 3 following categories: image acquisition phase (acceptable % of camera operations), processing phase (acceptable % of items processed/edited/manipulated/transferred), and finishing (% of acceptable items end products delivered/ordered.)

13.4. **FORMAT:** Contractor Spreadsheet Format (compatible with Microsoft Excel); on-line availability required.

13.5. **MAINTENANCE:**

DATA REQUIREMENTS DESCRIPTION (DRD)

2. **DRL INE ITEM No.:** 7.1
3. **DATA TYPE:**
4. **DATE REVISED:**
5. **PAGE: 1/2**
6. **TITLE:** Logistics Plan
7. **DESCRIPTION/USE:** To provide an approach and rationale for the Logistics Management of the KICS contract.
8. **DISTRIBUTION:** Formatting and electronic distribution per Contracting Officer's letter.
9. **INITIAL SUBMISSION:** Draft 45 days after contract award.
10. **SUBMISSION FREQUENCY:** Final version 90 days after contract award; updates as required.
11. **REMARKS:**

12. **INTERRELATIONSHIP:** **PWS 7.0**

13. **DATA PREPARATION INFORMATION:**

13.1 **SCOPE:** The KICS Logistic Plan defines how the contractor is going to use, maintain, repair, protect, and preserve the Government Furnished Property. It shall describe the contractor's approach to procuring, receiving, transporting, inspecting, tagging, tracking, handling, stocking, maintaining, protecting, and issuing Government Property.

13.2 **APPLICABLE DOCUMENTS**

NPD 4100.1	Supply Support and Material Management Policy

NPG 4300.1	NASA Personal Property Disposal Procedures and Guidelines
NPG 8735.1	Procedures for Exchanging Parts, Materials and Safety Problem Data Utilizing the Government-Industry Data Exchange Program and NASA Advisories
NPD 6000.1	Transportation Management
NPG 6000.1E	Requirements for Packaging, Handling and Transportation of Equipment and Associated Components
NPG 6200.1A	NASA Transportation and General Traffic Management
KHB 5310.1	Reliability, Maintainability, and Quality Assurance Handbook
KHB 6000.1	Transportation Support System Handbook

1. **DRD No.: L-1 (Continued)** **ISSUE:** Initial

13.3 **CONTENTS:** This plan shall consist of those procedures which constitute the contractor's Logistics Support Plan and shall include at a minimum the following categories:

a. Property Management
b. Acquisition
c. Receiving
d. Inspection
e. Inventory Management
f. Property Protection
g. Spares Management
h. Mod-Kit Preparation & Storage
i. Equipment Loss Rate Plan
j. Transportation Services
k. Calibration Services
l. Calibration Services
m. Sampling and Analysis Services
n. Reports
o. Excess and Disposal
p. Property & Associated Equipment Storage
q. Packing, crating and handling

13.4 **FORMAT:** Contractor format is acceptable; format and availability as required by Contract requirements.

13.5 **MAINTENANCE:** Changes shall be incorporated by change pages or complete re-issue.

1.0 **DRD NO.:** L-2 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** 7.3

3.0 **DATA TYPE:** N/A

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1 / 1

6.0 **TITLE:** Equipment Loss Rate Plan

7.0 **DESCRIPTION/USE:** To develop, implement and maintain an Equipment Loss Rate Plan to include equipment surveyed, items lost during the fiscal year, items found on station and any reinstated equipment.

8.0 **DISTRIBUTION:** Per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** Final version approved prior to completion of Phase-In.

10.0 **SUBMISSION FREQUENCY:** Annually

11.0 **REMARKS:** N/A

12.0 **INTERRELATIONSHIP:** PWS 7.0

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** N/A

13.2 **APPLICABLE DOCUMENTS:** N/A

13.3 **CONTENTS:** The contents of the Equipment Loss Rate Plan should include the following

1. All equipment surveyed
2. Equipment lost during thefiscal year
3. Equipment found on station
4. Equipment reinstated

13.4 **FORMAT:** Format Chosen by Contractor

13.5 **MAINTENANCE:** N/A

DATA REQUIREMENTS DESCRIPTION (DRD)

1.0 **DRD NO.:** TR-1 **ISSUE:** Basic

2.0 **DR LINE ITEM NO.:** Attachment J-1, Section 2.3.6
Attachment J-1, Section 8.1

3.0 **DATA TYPE:** Plan

4.0 **DATE REVISED:** N/A

5.0 **PAGE:** 1/2

6.0 **TITLE:** Kennedy Integrated Communications Support (KICS), Training and Certification Plan

7.0 **DESCRIPTION/USE:** To define the contractor's approach, rationale, and plan to manage training and certification of personnel

8.0 **DISTRIBUTION:** Per Contracting Officer's letter

9.0 **INITIAL SUBMISSION:** Final version approved prior to completion of Phase-In

10.0 **SUBMISSION FREQUENCY:** Revise annually

11.0 **REMARKS:** NASA IT&C shall approve plan

12.0 **INTERRELATIONSHIP:** PWS 2.0, 8.0

13.0 **DATA PREPARATION INFORMATION:** N/A

13.1 **SCOPE:** The KICS Training and Certification Plan shall Define how the contractor will organize, implement, manage, and document training and certification to meet all responsibilities under the contract throughout the life of the contract and any options or extensions, if any. The plan shall document the contractor's plan to manage training and certification to be cost-effective, and to ensure that the appropriate skills, experience, and knowledge are available when and where they are needed. The plan shall also document the contractor's plan to ensure that ensure that current skills and knowledge are maintained as technology advances and infrastructure modernization progresses. Implementation of the plan shall ensure the workforce implementing the contract is trained and competent to perform assigned work, certified and licensed as required by the government and regulatory agencies, experienced and knowledgeable about the work to be accomplished and the equipment, software and systems, knowledgeable about the work environment and related requirements, and knowledgeable about Agency and Center initiatives.

1.0 **DRD NO.:** TR-1 (Continued) **ISSUE:** Basic

13.2 **APPLICABLE DOCUMENTS:**

NPG 2810.1	Security of Information Technology, as revised
KHB 3410.1	Implementing Instructions for KSC Systems, Safety, and Skills Training, and for Certification of Personnel, as revised
KHB 1610.1	KSC Security Handbook
KHB 1710.2	Kennedy Space Center Safety Practices Handbook
KHB 5310.1	Reliability, Maintainability and Quality Assurance Handbook

KSC Operational Area Access Safety Training Requirements, as revised

KSC Operational Area Access Safety Training Matrix, as revised

13.3 **CONTENTS:** The plan shall include sections that reflect key areas or areas of emphasis in the plan and reflect the contractor's understanding of the task. Any overlap between sections shall be clearly identified and references made to appropriate sections to avoid duplication of effort. The plan shall include at least the following sections:

1. Management approach to training, including basic contract and ID/IQ activities
2. Regulatory Requirements
3. Safety and Health
4. Access to Restricted Work Areas
5. Special Skills Certification
6. Systems Training and On-the-Job-Training (OJT)
7. Information Technology Security Training
8. Historical Records
9. Reporting and Status of Training and Certification
10. Use of Existing Training Resources
11. Government and KSC Contractor Access to KICS Training

The plan shall include a revision history that reflects changes in content.

13.4 **FORMAT:** One hard copy, and electronic copy in Microsoft Office format compatible with KSC government systems.

13.5 **MAINTENANCE:** Re-issue annually, with colored change pages for interim changes

Appendix 3
Applicable KSC Policies and Procedures

For

Kennedy Space Center Integrated Communications Services (KICS)

The following policies and procedures apply only to work performed at KSC:

NASA DIRECTIVES

NPD 1040.4	NASA Continuity of Operations
NPD 1440.6	NASA Records Management
NPG 1441.1	NASA Records Retention Schedules
NPG 1620.1	Security Procedures and Guidelines
NPG 1820.1	Hearing Conservation
NPG 2810.1	Security of Information Technology
NPD 2810.1	Security of Information Technology
NPD 2820.1	NASA Software Policies
NPD 4100.1	Supply Support and Material Management Policy
NPG 4100.1	NASA Materials Inventory Management Manual
NPD 4200.1	Equipment Management
NPG 4200.1	NASA Equipment Management Manual
NPG 4200.2	Equipment Management Manual for Property Custodians
NPD 4300.1	NASA Personal Property Disposal Policy
NPG 4300.1	NASA Personal Property Disposal Procedures and Guidelines
NPD 6000.1	Transportation Management
NPG 6000.1E	Requirements for Packaging, Handling and Transportation of Equipment and Associated Components
NPG 6200.1A	NASA Transportation and General Traffic Management
NPG 7120.5	NASA Program and Project Management Processes and Requirements
NPG 8000.4	Risk Management Procedures and Guidelines
NPG 8621.1	NASA Procedures and Guidelines for Mishap Reporting, Investigating, and Recordkeeping
NPD 8621.1	NASA Mishap and Close-Call Reporting, Investigating, and Recordkeeping
NPD 8700.1	NASA Policy for Safety and Mission Success
NPD 8710.2	NASA Safety and Health Program Policy
NPG 8715.3	NASA Safety Manual
NPD 8720.1	NASA Reliability and Maintainability (R&M) Program Policy
NPG 8735.1	Procedures for Exchanging Parts, Materials, and Safety Problem Data Utilizing the Government-Industry Data Exchange Program and NASA Advisories
NPD 9501.3	Earned Value Management

NASA STANDARDS

NASA-STD-8729.1	Planning, Developing, and Managing and Effective Reliability and Maintainability (R&M) Program
NASA-STD-2804	Minimum Interoperability Software
NASA-STD-2805	Minimum Hardware Configurations

NASA-STD-2810	Unix Interoperability
NASA-STD-8719.11	NASA Safety Standard for Fire Protection

KENNEDY MANAGEMENT INSTRUCTIONS

KMI 1150.24	Boards, Committees, Working Groups, and Panels
KMI 1200.1	Management of KSC Facilities, Systems and Equipment
KMI 1216.1	Smoke-Free Workplace
KMI 1420.1	KSC Forms Management Program
KMI 1440.1	KSC Records Management and Vital Records Program
KMI 1490.2	Printing, Duplication, Micrographics and Office Copier Services
KMI 1530.1	KSC Mail Management Program and Locator Directory
KMI 1590.2	KSC Bulletin, Bulletin Boards and Hallway Displays
KMI 1800.1	Environmental Health Program
KMI 1800.2	KSC Hazard Communication Program
KMI 1810.1	KSC Occupational Medicine Program
KMI 1860.1	KSC Radiation Protection Program
KMI 3792.1	KSC Employee Assistance Program
KMI 8800.8	KSC Environmental Management
KNPD 8700.1	KSC Safety and Mission Assurance Policy Directive

KENNEDY HANDBOOKS

JHB 2000	Consolidated Comprehensive Emergency Management Plan
KHB 1200.1	Facilities, Systems and Equipment Management Handbook
KHB 1610.1	KSC Security Handbook
KHB 1710.2	Kennedy Space Center Safety Practices Handbook, Volumes 1 & 2
KHB 1820.3	KSC Hearing Conservation Program
KHB 1820.4	Respiratory Protection Program
KHB 1840.1	Industrial Hygiene Handbook
KHB 1860.1	KSC Ionizing Radiation Protection Program
KHB 1860.2	KSC Non-Ionizing Radiation Protection Program
KHB 1870.1	KSC Sanitation and Pollution Control Program
KHB 2540.1	KSC Telecommunications Services
KHB 2570.1	KSC Radio Frequency Spectrum Management Handbook
KHB 3410.1	Implementing Instructions for KSC Systems, Safety and Skills Training, and for Certification of Personnel
KHB 4000.1	Supply Support System Manual, Part 5, Equipment Management
KHB 5310.1	Reliability, Maintainability, and Quality Assurance Handbook
KHB 6000.1	Transportation Support System Handbook
KHB 8800.6	KSC Environmental Control Handbook
KHB 8800.7	Hazardous Waste Management

KENNEDY GENERAL PROCEDURES

GP-14-2	Facilities Utilization Charts, NASA Facilities at KSC, CCAF, and PAFB
GP-14-3	Facilities Space Control Document, Single Wide Trailers/Boxcars
GP-60-3	Automated Support Requirements System Handbook
GP-435 Vol. 1 & 2	Engineering Drawing Practices
JDP-KSC-P-3014	Generic Emergency Procedures Document
KNPD 1800.2	KSC Hazard Communication Program
KNPG 1840.19	Industrial Hygiene Programs
KNPG 2810.1	Defining Baseline IT Security Requirements That Have Been Left to Center Discretion
KNPG 2810.2	Vulnerability Disposition

OTHER POLICIES AND PROCEDURES

	Chief Information Officer (CIO) Executive Notices
KSC-DE-512-SM	Guide for Design Engineering of GSE
KSC-STD-E-0021	KSC Telecommunication Premises Distribution Systems, Design of, Standard for
KSC-DF-107	DE Technical Document Style Guide

RANGE OPERATING INSTRUCTIONS

ROI 01-01	Range Operating Instructions
ROI 01-01-01	Site Verification of ROI Mailing
ROI 01-02	Reacceptance Procedures for Range Instrumentation
ROI 01-03	Station Designators
ROI 01-04	ER Range Conference Nets
ROI 01-05	Operational Configuration Control Philosophy
ROI 01-06	Range Time Standardization
ROI 01-07	Minor Range Support
ROI 01-08	Downgrading Scheduling or Launch Information After DOD or NASA Release
ROI 01-10	Coordination with Range Users During Operations
ROI 01-12	Visits to Range Instrumentation Sites
ROI 01-13	Instrumentation Coverage Plans
ROI 01-14	Requesting Emergency Maintenance Assistance for Communications, Electronic, Meteorological Equipment
ROI 01-15	Processed Data Delivery Schedules
ROI 01-16	The Electronic Security System (ESS) and Resources Protection Alarm System (RPAS) - Electronic Component Subset of Physical Security Program (PSP)
ROI 01-19	Network Operating Procedures During Unmanned Space Flights
ROI 01-20	Range Scheduling Operation Notification Responsibility
ROI 01-21	System Access
ROI 01-23	Scheduling Downtime for Maintenance
ROI 01-24	Range Turnaround Time
ROI 01-25	Relaying Countdown and Operations Information
ROI 01-29	Range Control Officer (RCO) Responsibilities
ROI 01-30	Expedite Operations Requirements Processing
ROI 01-32	Range Instrumentation Systems Controller
ROI 01-33	In-flight Advisories of Vehicle Flight Performance
ROI 01-36	Network Operating Procedures During Manned Space Flights
ROI 01-39	Scheduling of Pre-launch Instrumentation Checkout and Calibration Operations
ROI 01-40	Control and Operation of Instrumentation Nets
ROI 01-44	Use of Unaccepted Equipment, Systems or Configurations
ROI 01-45	Range Reconfiguration Time for Navy Missions
ROI 02-02	Range Countdown

RANGE OPERATING INSTRUCTIONS (continued)

ROI 02-04	Operations Control Instructions
ROI 03-01-01	Operation Logs
ROI 03-01-04	Reporting Range Status During an Operation
ROI 03-01-05	Launch Instrumentation Performance Analysis
ROI 03-02-10	Preliminary Operation Report
ROI 03-03-01	Pre-Operational Instrumentation Checks
ROI 03-03-04	ER Equipment Status Reporting System
ROI 03-04	Notification of Weather Warnings and Weather Advisories
ROI 03-05	Reporting Operation Termination/Extension Status
ROI 09-01	Handling of Film Products for DOD Launch Operations Requiring Special Handling
ROI 09-02	Handling of Film Products for DOD Launch Anomalies During Classified Operations
ROI 12-01-14	Optical Tracking Central Computer Operating and Reporting Procedures
ROI 12-04-01	Manual Audit Trails for Instrumentation Computers
ROI 14-08-01	Closed-Circuit Television (CCTV) Unit Operating Procedures
ROI 14-08-02	Range Safety Video and Vertical Skyscreen Designators

The following policies and procedures are for reference when performing work at KSC:

KMI 2520.1	Operation and Maintenance, Use and Configuration Control of KSC Operational Intercommunications Systems (OIS)
KMI 6000.2	Aircraft Overflight and Helicopter Landing at Kennedy Space Center
KMI 6730.3	Examination and Licensing of KSC Special or Heavy Equipment Operators
KHB 5310.9	KSC Ground Systems Safety and Reliability Analyses
KHB 8040.2	KSC Configuration Management Policy and TM Handbook
KHB 8040.4	Payloads Configuration Handbook
KHB 8040.5	Engineering Development Configuration Management Handbook
KPD 8610.5	Security Plan for Space Shuttle Orbiter Vehicle Landing Sites/Airfields
K-STSM-14.1	Launch Site Accommodations Handbook for STS Payloads
K-STSM-14.2.1	KSC Cargo Facility Contamination Control Plan
79K09579	Organizational Level OMD Identification List for Cargo Facilities, Systems, and Equipment
NSTS 22206	Requirements for Preparation and Approval of Failure Modes and Effects Analysis and Critical Items List
NSTS 08117	Certification of Flight Readiness Requirements
SSP 50108	Certification of Flight Readiness for Space Station

The following KSC Shelf-Master SPECSINTACT specifications should be used when performing work at KSC:

16700	Basic Premise Distribution System PDS Requirements
16701	Communication/Equipment Rooms and Entrance Facilities
16702	Outside Cable Plant – Fiber
16703	Outside Cable Plant – Copper
16704	Premise Wiring System
16705	Timing and Countdown System
16725	Audio Cable Systems
16801	Paging and Area Warning System (PAWS)
16802	Broadband Communication Distribution System (BCDS)

Appendix 4
Definitions

For

Kennedy Space Center Integrated Communications Services (KICS)

Acceptance Testing - the testing of a system, subsystem, assembly or subassembly, in an operational environment, to ensure that the performance of the aggregate is not compromised by the integration of the newly developed or modified asset.

Availability - the percentage of a scheduled service delivered to the user. Availability is measured as: 100 * (number of scheduled service time in a reporting period – the time the scheduled service was not provided during a reporting period) / (number of scheduled minutes in a reporting period). This equals the percentage of scheduled service delivered to the user during a reporting period.

Brick and Mortar Services - Includes services such as maintenance of antennas; buildings; roads; grounds; water wells; sewage disposal system; special vehicles, such as cherry pickers and ambulance; airport runway and aircraft parking structure; and equipment used for power generation, power distribution, heating, ventilation, air conditioning, fire detection and suppression, water storage and distribution, hazardous material storage and disposal; internal telephone system, fiber optic and hard line intersite connections, cafeteria food storage and preparation, and machine vending services. It also includes the preparation and updating of engineering documentation, and preparation of bid packages for minor non-technical facilities construction contracts.

Certification - the process of determining and attesting to a required level of value, performance and readiness.

Chief Quality Assurance Evaluator (CQAE) - The senior government representative who, together with the contracting officer, is responsible for the overall surveillance and assessment of contractor performance on the contract.

Commercialization - The situation where NASA allows contractors to utilize government-owned facilities or equipment for commercial enterprise.

Commercial Off the Shelf (COTS) Software - software that is commercially available and maintained by a vendor. Internet software is not COTS software, unless there is an associated maintenance contract through a vendor. Custom software maintained by the government or the contractor is not COTS software.

Contracting Officer (CO) - The individual appointed by the contracting activity for procuring and/or administering a contract. The Contracting Officer is the only person authorized to direct contractor performance, execute amendments to the contract, and contractually obligate the government.

Contract Specialist - The individual within the contracting office who performs the day-to-day administration of the contract. The contract specialist may also be the contracting officer.

Coordination - This definition contains typical functions associated with the interaction with the internal and external service providers, other contractors, and the customer as necessary to meet customer service requirements. These functions include:

a) Supporting the development of customer requirements.
b) Providing service status.
c) Obtaining customer feedback.
d) Providing consultation for reporting and resolving service problems.
e) Operations coordination (e.g., airspace interference, radio-frequency interference).
f) Interagency coordination.

Countdown (Range Users) - The detailed Range User countdown is prepared by the Range User to supplement the general countdown in the Operation Requirements (OR). The countdown is used by operations support people during the operation.

Criticality Level 1S – A single failure in a safety or hazard monitoring system that could cause the system to fail to detect, combat, or operate when needed during the existence of a hazardous condition and could result in loss of life or flight hardware.

Customer - NASA enterprises, which can be divided into NASA entities and non-NASA entities. NASA entities include NASA centers and institutions, and programs and projects and their associated contractors. Non-NASA entities include other government agencies, international space partners, universities and research institutes, and commercial entities. A customer is also an organization that pays for the service that is used.

Data Requirement Description - A detailed description of a required data item, including purpose, content, format, references, maintenance requirements, submittal requirements, and other pertinent information.

Data Reduction - The functions that acquire, normalize, and merge telemetry data, perform data processing, and produce data products (e.g., database population, plots, tapes). Although the telemetry data is acquired in real-time, the data processing is performed in near-realtime.

Development - the process whereby new hardware and software capability is introduced into a system. Development encompasses those activities required to create new systems or enhance existing systems beyond their as-built capabilities and performance. It includes the functions of product design, product fabrication or programming, product specification testing and acceptance, and product integration and test.

Development Services - a service provided that results in the development of a hardware, firmware, or software product. Also includes, the integration and installation of the developed product into an existing system.

Documentation - This definition contains typical functions associated with the preparation of technical documents. This information shall be available in both a hard copy and electronic format and comply with the policies and requirements set forth by NASA. These functions include:

a) Configuration control of document changes.
b) Record and provide change processing and implementation status of services.
c) Providing technical reports and requirements documents.
d) Providing design documents.
e) Providing system configuration documents.
f) Providing technical plans and procedures.
g) Storing technical documentation.
h) Providing documentation services for Government generated documents.

Emergency request - a request for service or services by a requestor who has determined that the request warrants having expedited handling.

End-to-End - used to delineate the boundaries of a system. In the context of this contract, end-to-end means the two-way path from the spacecraft to the ground antenna through the ground systems, the communications systems, to the user system, such as a control center or payload processing facility.

End-to-End testing - the testing, in an operational environment, to ensure that data flows from each one end to the other end of a defined end-to-end system and meets documented performance and data flow and data accuracy requirements and data interface agreements.

Expectation - The level of performance which would be considered to fall in the "GOOD" range for performance evaluation purposes (Effective performance; fully responsive to contract requirements. Reportable deficiencies, but with little identifiable effect on overall performance.)

Expedite or Revision - An Expedite or Revision is prepared by the User when immediate support is required and when processing and publication of an OR would seriously delay a program. The User will follow up with an OR Revision if the change is permanent. A one-time change need not be followed up with an OR.

Facility - the location where various mission services, data services, and center unique services are performed.

First level troubleshooting - receipt of trouble calls, problem isolation and resolution of minor problems (e.g., lost password, software question), dispatch of problem reports to the proper maintenance agency, and customer follow-up.

FTS2000 - the Government Service Administration's (GSA) Federal Telecommunications System 2000 (FTS2000). FTS2000 is comprised of Network A, provided by AT&T and Network B, provided by Sprint. Both networks provide data,

voice, video, and messaging services. A government mandate is in effect directing government agencies to utilize FTS2000 services. NASA has services on both Network A and B.

Full Cost Accounting – The accounting methodology for assigning cost to the NASA program or fund source responsible for incurring the cost.

Functional Area - The organization having responsibility for the actual performance of a given service whether it is performed in-house or by contract.

Functional Area Chief (FAC or FC) - The government representative responsible for a functional area where the services are provided by a contractor.

Government Furnished Equipment (GFE) - Equipment or property in the possession of, or directly acquired by, the government and subsequently made available to the contractor. This includes all property or equipment owned by or leased to the government, acquired by the government, or acquired with government funds.

Ground System - consists of the infrastructure (i.e., facilities and tools) and the service operators required to operate the infrastructure (i.e., network monitors, facility schedulers, tape operators, system administrators, etc.).

Ground System Operations - This definition contains typical functions required to accomplish the operations of the telecommunications and computing assets used to deliver the services in the statement of work. These functions include:

a) Development and configuration management of operations processes and procedures in accordance with operations and service requirements, as well as capabilities and performance agreements.

b) Operations of equipment and services according to operations agreements, procedures, and negotiated schedules.

Higher level data - Higher level data consists of Level 1, 2, and 3 data, which are defined as:

Level 1: Calibrated instrument data giving the physical parameters actually measured by the sensors.

Level 2: Calculated parameters which use Level 1 data as an input

Level 3: Smoothed and grided Level 2 data.

In-family – NASA signature not required. Systems shown in this appendix are managed by an IDS communications TRP. Standard system provisioning is providing an as-designed system for communications services.
(Does not include first-time use of a service at a facility.) Changes can involve adding cards to a chassis (but not adding another chassis to a system). NASA signature

is not required.

a. Critical and Process-Sensitive
The following is a list of systems and what constitutes a standard service:

1. OIS-D, including, but not limited to, additions, moves, and deletions of:
   a) OIS units
   b) Speaker monitors
   c) Headset jacks
   d) Cross-connects
   e) Jack boxes

2. OIS-Q, including, but not limited to, additions, moves, and deletions of:
   a) OIS units
   b) Cross-connects
   c) Jack boxes

3. VDMS, including, but not limited to, additions, moves, and deletions of:
   a) Voice, data, and aggregate cards
   b) Data circuits

4. P/AWS, including, but not limited to, additions, moves, and deletions of:
   a) Local microphones
   b) Audio mixers and mixer extenders (not area warning)
   c) Power amplifiers (not area warning)
   d) Speakers
   e) 70-volt distribution

5. Astro-comm - None

6. Radio, including, but not limited to, additions, moves, and deletions of:
   a) Mobile and portable (including vehicle) radios
   b) Remote units
   c) Programming of mobile and portable radios

7. Wideband transmission systems (WBTSs) including, but not limited to, additions, moves, and deletions of:
   a) Circuits
   b) System equipment (not Range Safety)

8. Outside fiber-optic cable plant - None

9. FOTS, including, but not limited to, additions, moves, and deletions of equipped circuits

10. SODN, including, but not limited to, additions, moves, and deletions of:

a) CFPs
b) User circuits

11. OTV, including, but not limited to, additions, moves, and deletions of:
a) Monitors
b) Keypads

12. T-carrier/SONET/IDNX, including, but not limited to, additions, moves, and deletions
of circuits

13. ATM - None

16. BCDS, including, but not limited to, additions, moves, and deletions of drops
b. Non-critical and Non-Process-Sensitive
Note: Changes to non-critical and non-process-sensitive systems require NASA signature only when major modifications to the systems are being performed.

The following is a partial list of what is considered noncritical and non-process sensitive:
1. Point-to-point audio circuits

2. Point-to-point data circuits

3. Special audio (except for astro-comm)

4. Public Affairs Office (PAO) audio

5. PAO video (KSCTV)

6. Industrial Area television (IATV)

7. Fabrication of standard items such as:
a) Self-contained atmospheric protective ensemble (SCAPE) equipment
b) Headset cords and extenders
c) Miscellaneous cables

8. PM MWOs

9. VA MWOs

10. Inside fiber-optic and copper cable plants

11. Outside copper cable plant (except Range Safety and safing cables)

Integration -the addition of a hardware, firmware or software product to an existing system, subsystem, assembly or subassembly.

Launch Scrub - A failed launch attempt or launch delay, which occurs after the Range terminal count (launch minus 360 minutes) is initiated. The duration of the delay is not considered, one change of date is considered one scrub, regardless of the delay.

Launch Slip - A change in launch date, which occurs prior to the initiation of the Range terminal count.

Logistics - This definition contains typical functions associated with the provision of logistics support used to deliver services listed in the statement of work. These functions include:

a) Logistics planning and analysis; integrated logistics support management
b) Ordering, purchasing, tracking status, managing subcontracts for spares, supplies, materials and services
c) Physical distribution of hardware, software, media, and firmware necessary to provide services.
d) Electronic distribution of software.
e) Shipping, receiving, and recovery services.
f) Crating and packaging of material and supplies.
g) Shipping prioritization.
h) Provision of spares, consumables, test equipment, tools and fixtures.
i) Property tagging and inspection of material and supplies from the point of demarcation and reception areas.
j) Providing physical storage for materiel delivered under this contract.
k) Inventory management.
l) research and cataloging services and logistics information management

Long term data storage - Storage of data for greater than two years.

Lost service time - total time that customers requested and were granted but for which the service was not available

Maintenance - This definition contains typical functions required to accomplish the maintenance for the telecommunications and computing assets used to deliver the services in the statement of work. These functions include:

a) Maintenance and calibration of ground systems to provide capabilities and performance in accordance with as-built documentation.

b) Installation of approved changes and repairs into operational systems.

c) Renewal and consolidation of equipment/software maintenance contracts and leases.

d) Reconfiguration of ground systems and data to support on-going missions.

e) Maintenance administration, including 3rd party contracts.

Maintenance administration - a function that encompasses the administration of ground systems maintenance by providing a central, "first line" point of contact for maintenance

problems. Maintenance administration is a function of the "maintenance" standard activity.

Network interface - the point of demarcation for outbound data (e.g., telemetry data) between a tracking complex and the NASA Integrated Services Network (NISN). Also the point of demarcation for inbound data (e.g., command data) between the user and the NISN.

NSAP 1/2 - the Network Service Assurance Plan 1/2 is a service provided to NISN by FTS2000.

On-Time Launch - A launch, which takes place within the established launch window on the date published on the Range schedule.

Operations Analysis - This definition contains typical functions associated with the assessment of the current performance of the ground systems and the impacts of additional loading to those services as listed in the statement of work. These functions include:

a) End-to-end system performance monitoring, recommending appropriate changes to eliminate potential system bottlenecks and overloads; and short-term and long-term trend analysis.
b) Risk analysis and management.
c) Assessment of technical, schedule, and cost factors involved with the operation of systems.
d) Analysis and evaluation of tracking resource, spacecraft, and telecommunications parameters and recommending ground system configurations to improve link margins.
e) System operability and review of operation procedures, recommending or effecting changes to minimize data, voice, or video outages.

Operations Directive (OD) - The OD is prepared by 45 SW according to 45 SWI 99-101 and UDS Handbook and is the official support that will be provided the Range User to meet the requirements of the OR. The OD provides (1) a basis for test scheduling, (2) a commitment of Range support, (3) support operating instructions, and (4) a briefing document for supervisory persons.

Operations Directive Annex - The OD annex is prepared by the 45 SW and is the official 45 SW answer to the OR annex. The OD annex is a complete detailed description of the support that will be provided the Range User to meet the requirements in the OR annex.

Operations Requirements (OR) - The OR is prepared by the Range User as outlined in 45 SWI 99-101 and is a complete detailed description of the requirements necessary to accomplish a specific test or series of tests in the program described in the PRD. When support is required from another Range the appropriate number of copies is added to the distribution page of the OR by the Program Support Management Division.

Operations Requirements Annex - The OR annex is prepared by the Range User and is a complete detailed description of the requirements necessary to accomplish a subsystem test or a special minor test related to the overall test in the OR. Reference to the OR may be made in the annex. An annex may not refer to another annex. The OR annex may be submitted with the OR at any time subsequent to submission of the OR.

Operations Requirements Extract (ORE) - The ORE is prepared by the 45 SW and is a complete detailed description of the requirements in the OR to be supported by another national or service Range.

Out of Family – NASA signature required. Systems shown in this appendix are managed by a joint NASA and IDS communications TRP. In general, changes that affect the system baseline design and/or system architecture require NASA signature in the designated signature block located in Step 5 of the Work Plan and on MWOs, WORNs, etc. NASA has the option to indicate that they need no further involvement with the work paper (indicated in the Remarks field on the WOTRACK screen). An architecture change is the addition of new capability, change in system topology, system modification, or system software change. Changes in topology include first-time provision of a standard service to a facility.

The following is a list of systems and what constitutes an architecture or design change:

a. Operational intercommunications system - digital (OIS-D), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Group processor assemblies
2. Central summing network
3. Technical control
4. Off network processor system
5. Record and playback system
6. Power distribution
7. Data transmission equipment

b. Operational Intercommuncations system - Quintron (OIS-Q), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Central equipment
2. T1/D4 interface module
3. Channel banks
4. System administration terminal equipment

c. NASA integrated services network (NISN)/voice and data management (VDMS), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Transport management system equipment

2. Fiber multiplexer
3. Expansion shelves

d. Paging and area warning (P/AWS), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Paging panels
2. Central matrix equipment
3. Tone generators and distribution amplifiers
4. Control trays
5. Mixers and power amplifiers used for area warning

e. Astro-comm, all changes affecting the system

f. Radio, including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Crane, crawler transporter, and convoy communications equipment
2. Transmitters, receivers, and comparators
3. Trunked equipment
4. Transportable communications system (TCS)
5. Transoceanic abort landing (TAL) equipment

g. Copper wideband transmission system, including, but not limited to, modifications of system equipment (Range Safety and safing cables)

h. Outside fiber-optic cable plant, new cable installations
i. Wideband fiber-optic transmission system (FOTS), including, but not limited to, additions, removals, and modifications of:

1. Chassis
2. Multiplexers
3. New dark fiber circuit activation

j. SODN, including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Routers
2. Bridges
3. Hubs
4. Switches

k. Operational television (OTV), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. Central equipment

a) Video routing switcher
b) OTV system control units
c) Synchronizing generators and distribution
d) Video source synchronizers
e) Video test generators
f) Video measurement systems
g) Video recording systems

2. Cameras, pan and tilt

l. Fiber data distribution interface (FDDI), including, but not limited to, additions, removals,
and modifications (hardware and software) of:

1. System equipment
2. New circuit activation

m. T-carrier/synchronous optical network (SONET)/integrated digital network exchange (IDNX), including, but not limited to, additions, removals, and modifications (hardware and software) of system equipment

n. Asynchronous transfer mode (ATM), including, but not limited to, additions, removals, and modifications (hardware and software) of:

1. System equipment
2. New circuit activation

o. BCDS, including, but not limited to, additions, removals, and modifications (hardware and software) of system equipment

p. Photo-optical, including, but not limited to, additions, removals, and modifications (hardware and software) of system equipment

q. Timing, including, but not limited to, additions, removals, and modifications (hardware and software) of system equipment

Note: All LSE tasks are NASA-managed activities and require NASA signature on work paper.

Performance Work Statement (PWS) - The performance-based description of tasks or services to be performed and/or end products to be delivered by the contractor. The PWS also defines facilities, property, and support to be provided to the contractor by the government.

Photo Acquisition Disposition Document (PADD) - A plan that is generated by the contractor for each operation or minor support test. The document identifies all requirements and provides internal instructions to other DOD technical multi-media support functional technicians on how to plan, meet, and execute support.

Plant Engineering and Operations - This definition contains typical functions associated with plant engineering and operations. These functions include:

a) Maintenance and operations of plant equipment in support of scheduled activities.
b) Sustaining engineering of plant equipment.

Proficiency - the percentage of scheduled service delivered to the user. Proficiency is measured as: 100 * (scheduled service time in a reporting period – the time the scheduled service was not provided during a reporting period) / (service scheduled time during a reporting period). This equals the percentage of scheduled service delivered to the user during a reporting period.

Program Operating Plan (POP) – An annual plan developed by the government, which provides budget and workforce estimates, along with an outline of the work on which the estimates are based. Generally the plan covers the succeeding fire years with the first year having a monthly cost phasing plan and the remaining four years having only annual estimates.

Program Introduction (PI) - The statement of estimated support requirements desired by the users to be provided by the Range.

Program Requirements Document (PRD) - The PRD is prepared by the Range user, according to 45 SWI 99-101, 45 SW Mission Program Documents, and/or is a combination of more than 90 standard forms common to all national and service ranges. The PRD is a detailed description of the requirements of the total program and is used for Range support planning.

Program Support Plan (PSP) - The PSP is prepared by the 45 SW according to the UDS Handbook, Document 501-89, and 45 SWI 99-101, and is the official answer to the PRD. The PSP outlines the planned support that will be provided the Range User to meet the requirements in the PRD.

Project Manager (PM) - The government technical representative having overall responsibility for budgeting for and funding contract support, defining technical requirements, identifying priorities, and providing this information to the contracting officer. The contractor's counterpart is responsible for the overall management and coordination of the contract and acts as the central point of contact for the government.

Property Administrator (PA) - An appointed representative of the Contracting Officer authorized to administer contract provisions pertaining to government property.

Property Control Program - The contractor's written policies and procedures for controlling each type of government asset in its possession in accordance with FAR Part 45 and the provisions of the contract.

Quality Assurance - A planned and systematic pattern of all actions necessary to provide confidence that adequate technical requirements are established; products and services conform to established technical requirements; and satisfactory performance is achieved.

Quality Assurance Evaluator (QAE) - A functionally qualified government person responsible for monitoring, evaluating, and reporting a contractor's performance on a specific contract requirement. This person is a designated representative of the FAC.

Quality Control (QC) - Those actions taken by a contractor to control the production of outputs to ensure that they conform to the contract requirements of timeliness, accuracy, appearance, completeness, consistency, and conformity to appropriate standards and specifications.

Range Users - Elements of the Department of Defense (DOD), other federal agencies, or civilian organizations authorized to use Range resources.

Requirements Document - a document that specifies the requirements that are to be met.

RFS - a Request for Service initiates the NISN to provide a service that was forecasted in the PSCRD.

Scheduling - This definition contains typical functions associated with the commitment of resources. These functions include:

a) Scheduling of resources needed to provide a service.
b) Providing notification to customers of service availability and providing resolution of any conflicts.
c) Maintain schedule and resource utilization history databases.

Scheduling Efficiency - a metric for evaluating the generation and maintenance of conflict free schedules. Scheduling Efficiency is measured as (events scheduled) / (events requested) * 100. This equals the scheduling efficiency percentage for a reporting period.

Second level troubleshooting - problem isolation and resolution coordination of major problems (e.g., circuit, router, or server outage, email problem) with the proper maintenance agency

Service - the performance of all activities necessary to deliver customer products.

Standards and Limits - a file containing the upper and lower bounds of the system configuration and system performance parameters.

Standard of Excellence - The level of performance, which would be considered to fall in the "EXCELLENT" range for performance evaluation purposes (Of exceptional merit; exemplary performance in a timely, efficient and economical manner; very minor, if any, deficiencies with no adverse effect on overall performance.)

Statement of Capability (SC) - The 45 SW Commander's expression of capability for support of a new mission program. It provides estimated 45 SW support capability, the need for additional resources, cost of solutions to remedy deficiencies and other pertinent information in response to the PI.

Subsystem - a collection of hardware, software and procedures, which perform an identifiable task in support of one or more systems.

Support catalog - a database file containing all support products plus support schedules and sequence of events.

Support products - sets of data containing time-ordered parameters used to configure link equipment. These data sets consist of telemetry, radiometric, antenna pointing, and command parameters. Support products also include software support files containing project files, configuration files, site unique files, and equipment setup tables.

Surveillance Plan - The negotiated plan defining the process, reviews, and documentation used to monitor technical performance metrics and to report the cause, impact, and corrective action required to resolve variations form contracted technical performance.

Sustaining Engineering - the process whereby hardware and software capability is introduced into a system to restore the system to its as-built capabilities and performance. It includes the functions of product design, product fabrication or programming, product specification testing and acceptance, and product integration and test.

Sustaining Engineering Services- This definition contains typical functions associated with hardware, firmware, and software sustaining engineering for the telecommunications and computing assets used to deliver the services in the statement of work. Sustaining engineering encompasses those activities required to restore systems to their as-built capabilities and performance. These functions include:

a) Plan, fabricate, develop, acquire, integrate, and modify hardware and/or software based on requirements changes, equipment obsolescence, and operational efficiency improvements.
b) Adherence to standards, architecture, functional designs, and engineering processes.
c) Configuration management of the system, including change requirements management and as built documentation (i.e. architecture baseline control).

Systems Engineering Services- This definition contains typical functions associated with the system engineering of individual ground systems within a mission, data, or center unique service. These functions include:

a) Review customer requirements and augment existing ground system functional requirements.

b) Propose modifications and/or enhancements to existing ground systems.

c) Develop and maintain functional designs of systems and subsystems

System maintainability - the implementation of a design, which improves the identification of a failure and eases the replacement of the faulty assembly.

System operability - the implementation of the human-machine interface, which minimizes operator errors and equipment setup time.

System restorability - the implementation of a design, which minimizes the time it, takes to restore a system to an operational state after a failure.

Testing- the process by which the presence, quality, performance or genuineness is determined

Testing Services - This definition contains typical functions associated with hardware and software subsystem testing for the assets used to deliver the services in the statement of work. These functions include:

a) Diagnostic testing.
b) Verification and acceptance testing.
c) Compatibility testing.
d) Test planning, activities leading to the development of test plans, procedures, resource deployment, and execution of tests.
e) Support validation testing and mission readiness testing.

Third level troubleshooting - problem resolution of major problems (e.g., circuit, router, or server outage, email problem) and documentation of results. The resolution may involve hardware or software redesigns.

Tool - hardware, firmware or software that serves as an aid to accomplishing a task.

Training - This definition contains typical functions associated with ensuring the preparation of personnel to perform the functions necessary to provide the services as listed in the statement of work. These functions include:

a) Customer training on applications or services.
b) Certification of personnel on operational consoles.
c) Maintenance and operations training.
d) Mission-specific training.

Universal Documentation System (UDS) - The Range Commanders' Council (RCC) Handbook 501-89 describes mandatory documentation to be used by the National Ranges and their users. The system provides a formal, common method of language and format for stating requirements and preparing support responses. The UDS encompasses documentation generated by user agencies, which state program, mission or test requirements and those response documents generated by the support agencies to define the support to be provided.

Validation testing - the testing of a newly developed or modified asset (system, subsystem, assembly, subassembly or lowest replaceable element), in an operational environment, to ensure that all requirements of the specification have been met.

Verification testing - the testing of a newly developed or modified asset (system, subsystem, assembly, subassembly or lowest replaceable element), in a non-operational environment, to ensure that all requirements of the specification have been met.

45th Space Wing (45SW) - The Air Force's 45th Space Wing is the DOD executive agent and single manager of Range facilities at Cape Canaveral Air Force Station, Patrick Air Force Base, and downrange stations. The 45th Space Wing's mission is to develop, operate and manage Eastern Range facilities and as host agency, provide support services to all launch/user activities.

Appendix 6
Work Breakdown Structure

For

Kennedy Space Center Integrated Communications Services (KICS)

1.0 Work Breakdown Structure (WBS), Work and Financial Reporting

1.1 Report Costs for Customer Organization

The costs incurred under this contract should be organized in such a manner to allow the customer community to see their cost, down to the system, project and task level. The goal is to allow each customer to identify where their funds are being expended to meet their service needs. The expectation is that the customer community will use this data to understand their communications utilization, understand what is driving their costs, and identify areas where they see a potential for improvement. In addition, costs should be aggregated across customers, by system to the third level of the WBS. This will allow system managers to address system wide costs across the contract by WBS element.

Costs shall be reported by customer and WBS element to the third level of the WBS. Provisions shall be made to allow costs to be collected by government provided cost allocation as well as by special projects or activities that make use of standard services. In addition, a cost summary shall be provided that sums all costs to the third level by WBS Element.

1.2 WBS and Cost Assignment

The WBS is organized by system, sub-system and work performed. Work will take place in a physical location. This location (site, facility, room) is necessary to schedule/assign work, and is a key component cost assignment. Work tasking information will include: sub-system to be operated upon, physical location of system to be operated upon and the specific task(s) to be performed. Reporting includes the task information and the resources expended to perform or support the task. Cost is assigned based upon WBS element and location. A listing of possible work locations, their associated customer(s), and the cost sharing allocation to be applied will be maintained by the contractor and updated by the Government on a quarterly basis. The current cost sharing allocation is located in the bidders library.

Resource utilization will be assigned to a customer or customers based upon a combination of the work performed, the work location and that locations related occupancy/responsibility. Project or mission support activities outside of normal operations will carry a unique project code that supersedes the work location cost assignment and allow cost collection and reporting by project and WBS element. These project codes will be related to specific customer(s) and will provide the necessary cost sharing allocation information.

1.3 ID/IQ Services

A stated goal of the KICS contract is to move KSC towards a service model for communications activities. The end state will be a fixed price catalogue of communications services. When this point is reached for a first or second level WBS element, the WBS will stop at that point. There will be no further detail below that level.

At this time, there are only two components of the WBS that are at that level. These are the Administrative Phones and the DOD Technical Multi-media Support. There is no corresponding third level WBS for Administrative Phones and DOD Technical Multi-media Support. These elements are identified in the WBS with and ID/IQ label following the element title.

Example 1: Provide additional OIS units to 3 rooms in the SSPF.
The WBS element would be:

> WBS 02.01.02Voice Communication Systems; Operational Intercommunication System (OIS-D); Activation/Validation

The Location Code would be SSPF (or facility number) and the room number. Based upon this data, the customers associated with the SSPF (either entire facility or that room) would be assigned the associated cost. The Summary report would show the cost under the WBS totals as a part of total Phone activation validation costs. The Customer would see their cost and have visibility to the nature of the cost.

Example 2: Provide XA (Public Affairs) support for VIP Launch Visitors.
Multiple WBS elements would be utilized, including:

- WBS 02.01.02Voice Communication Systems; Operational Intercommunication System (OIS-D); Activation / Validation
- WBS 03.03.03 Video & Visual Imaging; Public Affairs Television; Operations
- WBS 02.04.03 Voice Communications; Radio Systems; Operations

The location codes for these activities would all vary based upon the location. However, the XA project code would be used to identify and collect costs associated with the activity. The Summary report would show the cost under the associated WBS elements. The Customer Organization (XA) would see the costs under their project code and have visibility to the nature of the cost.

2.0 WBS Structure Organization

2.1 Level I - Major system

Top-level major systems

2.2 Level II - Subsystem

This will vary by WBS, but will consist of major subsystems within each WBS.

2.3 Level III - Activity

Every Level I/II WBS will contain the following standard Level III work elements.

.01 Design and Development

Support for Design and Development efforts including Sustaining Engineering to directly support WBS element.

.02 Activation, Validation

Support for Installation, Activation, and Validation of new operational systems or services in WBS element.

.03 Systems Operations

Support day-to-day operations of WBS element. Including test monitoring, system monitoring, mission support.

.04 Maintenance

Maintenance including preventative maintenance, troubleshooting, repair, and return to service.

.05 Logistics

Support for logistics, procurement, equipment lease, property management, and depot level maintenance for WBS element. Equipment and License Maintenance and Service Contracts for WBS element.

.06 Facilities

Support for modifications, move costs, facility lease, furniture, utilities for WBS Element.

.07 Training

Contract Personnel Training, End User Training, for WBS Element.

.08 Project management

Management Team, WBS Item Project Management for WBS Element.

.09 Studies

Support for specific tasking related to feasibility development for WBS Element.

.10 IDIQ Service and Materials

IDIQ Systems and Services provided by WBS element (once packaged as services).

.99 Misc.

Specific Items not allowed above. One time charges in support of WBS Element.

3.0 KICS Level I and Level II WBS Structure

WBS 01 KICS Contract Management

01.01 Management

Project Control, Business Management

01.02 Logistics

01.03 Configuration Management

Integration Board

01.04 S&MA

WBS 02 Voice Communication Systems [PWS Attachment J-1, Section 4.2.1]

02.01 Operational Intercommunication System (OIS-D)

02.02 Quintron Operational Intercommunication System (OIS-Q)

02.03 Paging and Area Warning System (P/AWS)

02.04 Radio Systems

02.05 Audio Distribution System

02.06 Voice Distribution Management System (VDMS)

02.07 Astrocomm System

02.08 Voice Recording System

02.09 Public Affairs Audio Systems

WBS 03 Video and Visual/Imaging Systems [PWS Attachment J-1, Section 4.2.2]

03.01 Launch Complex 39 Shuttle Operations Television

03.02 Industrial Area Operational Television

03.03 KSC Public Affairs Television (KSCTV)

03.04 Broadband Communications Distribution System (BCDS)

03.05 Timing & Countdown (T&CD)

03.06 KSC/Shuttle Photo Support

03.07 Photo Optical Control Systems (POCS)

03.08 KSC/NASA Digital Photo Services Support

03.09 DOD Technical Multi-media Support – ID/IQ

WBS 04 Transmission Systems [PWS Attachment J-1, Section 4.2.3]

04.01 T-Carrier/SONET Multiplex System

04.02 Asynchronous Transfer Mode (ATM) Transmission System (ATXS)

04.03 Fiber Optic Systems

SONET

04.04 Remote Monitoring and Monitoring System (RMAS)

WBS 05 Cable Systems [PWS Attachment J-1, Section 4.2.4]

05.01 Inside Plant – Telecom

Premise wiring, conduit, copper, fiber optic systems, test board support, circuit monitoring,

05.02 Outside Plant

Wide area cables, conduit, copper, fiber optic systems, underground utilities location, circuit monitoring,

WBS 06 Administrative Phones [PWS Attachment J-1, Section 4.2.5]

06.01 Telephone Systems – ID/IQ

911 emergency service, operator service, FTS/CCAFS/Local interface, voice mail, conference calling, firewall, VoIP, conference room sound suppression, Phone Switch, End Instruments, Cable Plant Interface, Collaboration Servers, User Support, Scheduling

WBS 07 Network Systems [PWS Attachment J-1, Section 4.2.6]

07.01 Network Hardware

Switches, Routers, Hubs, Cable Plant interface Equipment, Wireless, Smart Cards, Terminal Services

07.02 Network Services

Scheduling, remote access, DHCP, DNS, IP Database, authentication services, certificate management, Requirements Management, End User Support

WBS 08 IT and Communication Security [PWS Attachment J-1, Section 4.2.7]

08.01 IT and Communication Security Operations

Firewalls, Intrusion Detection & Monitoring, Plans, Call Lists, External Access, Security Scanning, Scheduling

08.02 Incident Response

Incident Response Teams

WBS 09 IDIQ Specialized Services [PWS Attachment J-1, Section 5.0]

09.01 System Administrator Services

09.02 Help Desk Services

09.03 System Engineering Services

09.04 Subsystem Engineering Services

09.05 Technical Support Services

J-2
Communication Demarcation Points

For

Kennedy Space Center Integrated Communications Services (KICS)

Communication Demarcation Points

The following table identifies the major demarcation points for communications interfaces to systems under the responsibility of others. The contractor shall effectively interface and operate with entities external to KICS to ensure communications services successfully interoperate.

System	Demarcation Points
Shuttle Forward Link	NISN Circuits at CD&SC Room 104
	LPS/RPS at Building LCC Room 4R10
NISN Circuits (includes East/West Range Video Comm.)	NISN Circuit at CD&SC Rm. 104
	Various Customers /CCAFS at Hanger AE Room 1025
	Customers at Eastern Range Comm. Circuit Term. Bldg.
	Various Customers at MILA
KSC TV	Uplink to NASA Satellite at CD&SC Satellite Dish
	Broadcast Networks at KSC Press Site, Multiple Interfaces
	Press and Commercial Service at Press Site, Multiple Interfaces

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: Life, accident, and health insurance plans, sick leave, pension pl civic and personal leave, severance pay, and savings and thrift plans. Minimum empl contributions costing an average of $2.56 per hour computed on the basis of all hour worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or success weeks after 5 years, 4 weeks after 15 years, and 5 weeks after 20 years. Length of includes the whole span of continuous service with the present contractor or success wherever employed, and with the predecessor contractors in the performance of simila at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year: New Year's Day, Martin Luther Ki Jr.'s Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Co Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitu any of the named holidays another day off with pay in accordance with a plan communi to the employees involved.) (See 29 CFR 4.174)

THE OCCUPATIONS WHICH HAVE PARENTHESES AFTER THEM RECEIVE THE FOLLOWING BENEFITS (as numbered):

1) Does not apply to employees employed in a bona fide executive, administrative, o professional capacity as defined and delineated in 29 CFR 541. (See CFR 4.156)

2) APPLICABLE TO AIR TRAFFIC CONTROLLERS ONLY - NIGHT DIFFERENTIAL: An employee is entitled to pay for all work performed between the hours of 6:00 P.M. and 6:00 A.M. rate of basic pay plus a night pay differential amounting to 10 percent of the rate basic pay.

3) WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a r tour of duty, you will earn a night differential and receive an additional 10% of ba for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours week) and Sunday is part of your regularly scheduled workweek, you are paid at your basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday wo which is not overtime (i.e. occasional work on Sunday outside the normal tour of dut considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees emp in a position that represents a high degree of hazard when working with or in close proximity to ordinance, explosives, and incendiary materials. This includes work su screening, blending, dying, mixing, and pressing of sensitive ordance, explosives, a pyrotechnic compositions such as lead azide, black powder and photoflash powder. Al house activities involving propellants or explosives. Demilitarization, modificatio renovation, demolition, and maintenance operations on sensitive ordnance, explosives incendiary materials. All operations involving regrading and cleaning of artillery

A 4 percent differential is applicable to employees employed in a position that repr a low degree of hazard when working with, or in close proximity to ordance, (or empl possibly adjacent to) explosives and incendiary materials which involves potential i

such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adj work area or equipment being used. All operations involving, unloading, storage, an hauling of ordance, explosive, and incendiary ordnance material other than small arm ammunition. These differentials are only applicable to work that has been specifica designated by the agency for ordance, explosives, and incendiary material differenti

** UNIFORM ALLOWANCE **

If employees are required to wear uniforms in the performance of this contract (eith the terms of the Government contract, by the employer, by the state or local law, et the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) uniforms is an expense that may not be borne by an employee where such cost reduces hourly rate below that required by the wage determination. The Department of Labor w accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequat number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsib of the employee, all contractors and subcontractors subject to this wage determinati shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual c reimburse all employees for such cleaning and maintenance at a rate of $3.35 per wee $.67 cents per day). However, in those instances where the uniforms furnished are m "wash and wear" materials, may be routinely washed and dried with other personal gar and do not require any special treatment such as dry cleaning, daily washing, or com laundering in order to meet the cleanliness or appearance standards set by the terms Government contract, by the contractor, by law, or by the nature of the work, there requirement that employees be reimbursed for uniform maintenance costs.

** NOTES APPLYING TO THIS WAGE DETERMINATION **

Source of Occupational Title and Descriptions:

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations," Fourth Edition, January 1993, as amended by Third Supplement, dated March 1997, unless otherwise indicated. This publication ma obtained from the Superintendent of Documents, at 202-783-3238, or by writing to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 Copies of specific job descriptions may also be obtained from the appropriate contra officer.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is no listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), classified by the contractor so as to provide a reasonable relationship (i.e., appro level of skill comparison) between such unlisted classifications and the classificat listed in the wage determination. Such conformed classes of employees shall be paid monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract wo such unlisted class(es) of employees. The conformed classification, wage rate, and/ fringe benefits shall be retroactive to the commencement date of the contract. {See 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separa 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

1) When preparing the bid, the contractor identifies the need for a conformed occupa and computes a proposed rate).

2) After contract award, the contractor prepares a written report listing in order p classification title), a Federal grade equivalency (FGE) for each proposed classification), job description), and rationale for proposed wage rate), including information regarding the agreement or disagreement of the authorized representative employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later tha days after such unlisted class(es) of employees performs any contract work.

3) The contracting officer reviews the proposed action and promptly submits a report action, together with the agency's recommendations and pertinent information includi position of the contractor and the employees, to the Wage and Hour Division, Employm Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b) Regulations 29 CFR Part 4).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disa the action via transmittal to the agency contracting officer, or notifies the contra officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupat (the Directory) should be used to compare job definitions to insure that duties requ are not performed by a classification already listed in the wage determination. Rem it is not the job title, but the required tasks that determine whether a class is in in an established wage determination. Conformances may not be used to artificially combine, or subdivide classifications listed in the wage determination.

J-4
Award Fee Plan

For

Kennedy Space Center Integrated Communications Services (KICS)

I. INTRODUCTION

The Award Fee Evaluation Plan defines the process by which the government will encourage and reward the contractor for safe, high quality, cost effective performance in fulfilling the contract requirements. The Award Fee evaluation process is composed of an objective as well as a subjective assessment by the government and applies to all contract line item numbers.

The potential fee earned will be based upon the contractor's performance measured against objective performance criteria in areas of safety, technical, cost performance, and management effectiveness. A subjective assessment will be made based upon Areas of Emphasis (AOE) and customer satisfaction. The fee is intended to facilitate contractor performance in several ways. The first way is to encourage the contractor to meet and exceed communication asset service level support. The second way is to encourage effective government/contractor, contractor/other KSC contractor working relationships and cooperation. Additionally, the award fee is intended to stimulate overall process improvements initiatives for the KICS contract.

Each fee evaluation rating is discrete and final. Unearned fee in a given period is lost and cannot be reassessed or moved into subsequent fee evaluation periods for consideration. An overall performance evaluation and fee determination of zero shall be made for any evaluation period when there is a major breach of safety or security as defined in NFS 1852.223-75, Major Breach of Safety or Security.

II. EVALUATION PROCEDURES

Award fee will be determined semiannually in accordance with the KDP-KSC-P-2402, Award Fee Evaluation Process. The Award Fee Board (AFB) will review and consider the summary evaluation report prepared by the Contracting Officer's Technical Representative (COTR), and additional contractor data, if any. The COTR will be the focal point for the accumulation and development of Award Fee evaluation reports, reviews, and presentations, as well as discussions with contractor management on Award Fee matters.

Performance metrics and AOEs will be established for each evaluation period and communicated by the Contracting Officer to the contractor at least 30 calendar days prior to the start of the evaluation period.

The contractor's performance will be assessed at the mid-point of each evaluation period. Contractor performance levels which require remedial attention, or which may adversely affect Award Fee ratings, will be made known to the contractor by the COTR.

Within 30 calendar days following each evaluation period, the COTR will prepare a summary report on the evaluation of the contractor's performance based on, but not limited to, all government surveillance data, AOEs and contractor furnished data. The contractor will be furnished a copy of the evaluation report for the period. Within 5

working days from receipt of the evaluation report, the contractor may submit additional data relevant to the performance evaluation in writing to the COTR. The contractor also has the option of making a presentation to the Fee Determination Official (FDO) on that period's performance.

The award fee plan may be revised unilaterally by the government prior to the beginning of any rating period. Any changes made to the metrics and AOEs occurring within the evaluation period for which the metric is measured or the AOE is applied shall require mutual agreement of the government and contractor.

A. Evaluation Criteria

The Government will use objective and subjective criteria as a basis for arriving at the Award Fee score. Objective metrics will be used to measure the contractor's performance and assist the government in the Award Fee evaluation process. The contractor's performance against the metrics combined with the government's subjective assessment will be used to arrive at an overall Award Fee score.

B. Award Fee

The first award fee category encourages the contractor focus on overall safety, technical, cost performance, management effectiveness, customer satisfaction and areas of emphasis.

The Government will use objective criteria as a basis for arriving at an award fee for safety, technical, cost performance and management effectiveness. The maximum possible award fee score for these factors is 70 points. This part of the award fee score will be determined from the contractor's performance of the metrics described in the contract surveillance plan. If the contractor meets all applicable metrics for the evaluation period, the portion of the award fee score associated with safety, technical, cost performance, and management effectiveness awarded will be 70 points. If the contractor does not meet all applicable metrics for the evaluation period, the FDO will consider the significance of the failure and determine the score based on objective and subjective criteria.

The remaining award fee encourages contractor to focus on customer satisfaction and AOEs. The Government will use subjective criteria as a basis for arriving at the award fee score for these factors. The maximum possible award fee score for these factors is 30 points. Subjective criteria will include considerations for process improvement initiatives, maintaining excellent business relationships with the government as well as the other contracting organizations at the Kennedy Space Center, and overall responsiveness to dynamic support requirements. Table J4-1 summarizes the Award Fee Basis and associated point allocation.

Award Fee Basis	Point Allocation
Safety	
Technical	
Cost Performance	
Management Effectiveness	
Sub-total	**70**
Areas of Emphasis	
Customer Satisfaction	
Sub-total	**30**
Total Points	**100**

Table J4-1: Award Fee Basis

III. Numerical ranges, adjective definitions, and score conversion matrix

Table J4-2 provides numerical ranges and adjective definitions used to define the various levels of performance under the contract.

Table J4-3 provides the associated score conversion chart to be used for award fee determination under the contract.

Table J4-2: Numerical Ranges and Adjective Definitions

ADJECTIVE RATING	RANGE OF POINTS	DESCRIPTION
Excellent	100 - 91	Of exceptional merit; exemplary performance in a timely, efficient and economical manner; very minor (if any) deficiencies with no adverse effect on overall performance.
Very Good	90 – 81	Very effective performance, fully responsive to contract; contract requirements accomplished in a timely, efficient and economical manner for the most part; only minor deficiencies.
Good	80 – 71	Effective performance; fully responsive to contract requirements; reportable deficiencies, but with little identifiable effect on overall performance.
Satisfactory	70 – 61	Meets or slightly exceeds minimum acceptable standards; adequate results; reportable deficiencies with identifiable, but not substantial, effects on overall performance.
Poor/Unsatisfactory	60 – 0	Does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas; deficiencies in one or more areas which adversely affect overall performance.

Surveillance Plan

For

Kennedy Space Center Integrated Communications Services (KICS)

1.0 INTRODUCTION

1.1 Background: This Surveillance Plan for the KICS has been developed to describe the government's general plan in providing effective and systematic surveillance and reporting of all aspects of KICS contract performance. This plan recognizes the responsibility of the contractor to carry out its own quality control obligations in the performance of this contract. Surveillance will be accomplished via insight and oversight into the contractor's performance against requirements listed in the Performance Work Statement (PWS) and performance standards listed in this plan. In addition to meeting the PWS requirements, the contractor is responsible for providing services that meet or exceed the following overarching KICS contract objectives.

- Providing safety, health, and environmental stewardship
- Providing quality communication systems with no impacts to operational activities
- Providing flexible communication resources to meet customer requirements
- Providing personnel and processes that are timely and responsive to customer needs
- Providing expertise in communication systems
- Modernizing KSC communication systems infrastructure
- Delivering communication services within contract value
- Providing state of the art technology in communication systems
- Beginning and finishing projects on schedule and within budget
- Providing communications infrastructure stewardship
- Managing costs, including labor rates and indirect cost growth

The contractor's degree of success in achieving these objectives will be measured as indicators of contractor performance and will be the foundation of the award fee evaluation.

1.2 Responsibilities: Responsibilities for each entity involved in KICS surveillance and performance evaluation are described below.

1.2.1 The KICS Contracting Officer (CO) is responsible for contract management and ensuring compliance with the terms of the contract.

1.2.2 The primary function of the Contracting Officer's Technical Representative (COTR) is to serve as the technical liaison between the contractor and the CO. The COTR is responsible for monitoring the contractor's performance and delivery of the final product and/or services under the contract. The COTR is responsible for assimilating performance surveillance data summaries into a performance/ award fee report and presenting to the Award Fee Board (AFB) including the Fee Determining Official (FDO).

1.2.3 The CO/COTR will maintain insight into the KICS contractor performance using performance monitors and specific metrics for their area of responsibility. The COTR

provides centralized direction to the various performance monitors, initiates the call for input from performance monitors, consolidates all findings into a performance assessment, and presents the findings/assessments to the CO, AFB, and FDO.

1.3 Documentation: The contractor provides contract assessment reports and contract deliverables to the government. The government will integrate the surveillance data and prepare a variety of reports and presentations.

2.0 SURVEILLANCE METHODOLOGY

Surveillance will be accomplished through continual monitoring and verification of contract performance. Surveillance can be performed using an insight, oversight (first-time, high risk and out-of-family operations) or a combination mode as determined by the government using a risk-based decision process. There are a variety of surveillance tools including, but not limited to: customer feedback, management information systems, audits/checklists, metrics, sampling, observation, inspection, review, and analysis.

2.1 Surveillance Tools: The following is a description of the surveillance tools that may be used by the government. This list of tools is not exhaustive. If it becomes evident that additional tools are necessary and available, they may be added to the list. It is anticipated that the type of surveillance method utilized will be based on relative risk of the technical area. For example, the more critical the area, the more intrusive the method of surveillance. However, the government can use any of these tools at any time for any of the technical areas.

2.1.1 Customer feedback is a reactive tool based on input from the customers with the primary purpose to provide performance feedback to the government. This tool may be used as an indicator to increase government surveillance through use of different surveillance tools. Customer feedback will generally not be the only tool used for critical processes and activities.

2.1.2 Management Information Systems (MIS) provide proactive insight into contractor performance through assessment of contractor or government generated data. The data and output of the MIS will be validated as necessary by the government to assure that it is factual and accurately reflects the contractor's performance.

2.1.3 Audits/Checklists are used to conduct surveys and perform audits to gather inputs to determine whether or not a service is being provided in accordance with contract requirements. Survey checklists are used to gather subjective inputs to determine whether or not a service was adequately provided. Surveys collect personal judgments and may not necessarily reflect the quality of the service. Audit checklists are used to collect findings of fact related to contract requirements.

2.1.4 Metrics are performance indicators provided by the contractor or generated by the government. The metrics proposed by the Offerors shall be reviewed, refined and agreed

to by the government using a combined KICS/IT&C Integrated Product Team (IPT). The IPT shall review proposed or existing metrics, create new metrics or other performance indicators, develop additional contract monitoring surveillance methods to effectively monitor financial, technical, schedule, security or other aspects of the KICS activities. The IPT review and final government approval shall be completed within 9 months of contract award. The metrics will be periodically evaluated for appropriateness and effectiveness throughout contract duration. In most cases, the contractor will generate the data in order to manage their processes.

2.1.5 Sampling is a quantitative approach that involves statistically based random checks of the contractor's data or work performance. The purpose of these random checks is to validate that data is factual and that work performance meets contract or contractor-specified requirements.

2.1.6 In-depth observation entails directly observing the contractor during performance of work. This tool may be used where work involves tasks which present high risk to program assets; however, use of the tool is not limited to such critical activities. This surveillance method does not represent a constraint to the contractor's authority to proceed or perform work. In-depth observation allows the government to have real-time insight into contractor performance.

2.1.7 Inspection is an in-line function in which the government reviews and approves a specific contractor product or service. Inspection indicates approval and acceptance of a contractor requirement by the government and may present a constraint to the contractor's authority to proceed or perform work. The government may choose to use this surveillance technique due to high risk to program assets and a need to assure that performance is demonstrated.

2.1.8 Review of all processes, design documentation, and integration plans associated with design, development and integration of information technology products will be considered part of the evaluation criteria. The government will participate in the formal design reviews as part of the evaluation insight.

2.1.9 Analysis of all communication services provided, contractor processes, planning, and project management will be considered part of the evaluation criteria. The government may use this technique to ascertain the level of performance provided by the contractor.

2.2 Assessment: The government conducts continuous assessments of the contractor's performance. Performance assessments include the review of customer feedback and contractor performance data gathered utilizing the tools referenced in Section 2.1 herein. The data is analyzed to determine the level of performance. The validity and accuracy of contractor provided data will be verified by the government either through surveillance of activities or through review of each data element. These assessments ensure receipt of the quantity and kinds of products and services required by the contract and will become inputs for the evaluation of contractor performance. The performance metrics described in

this surveillance plan will become the first official set of performance metrics. Performance metrics will be aligned with the objectives identified in Section 1.1 herein. Award Fee metrics will be reviewed and modified as required through partnering. Partnering will continue throughout the life of the contract to ensure that Award Fee metrics remain valid and relevant to government priorities and contractor performance.

2.3 Evaluation: The COTR, in conjunction with the CO, is responsible for summarizing the contractor's performance utilizing the surveillance inputs to assess and report the level of contractor performance in meeting the KICS objectives. All data gathered as part of this surveillance process using the methods described will be considered in the evaluation. This data will also be used as part of the Award Fee evaluation.

PERFORMANCE STANDARDS SUMMARY

The following summarizes examples of performance standards for specific PWS tasks. Additional metrics based upon areas of emphasis and specific task orders will be included as performance metrics. Lack of inclusion in Table J5-1 in no way relieves the contractor of the obligation to perform all mission support elements and delineated tasks. Examples provided below are representative of performance criteria that will be incorporated into the final government performance surveillance plan. The actual criteria incorporated into the contract will be determined by the government and may include the methodologies, approaches, and levels of expected performance as proposed by the offeror.

The following is a description of the service level metrics that will be used as part of the surveillance metrics.

Level I Service

Description: Level I service commitments do not require work packages. Examples include but are not limited to the items below:

- DNS registration or IP address assignment
- Port status changes (enable/disable, speed, duplex)
- Mission support re-patching in communication rooms
- Radio provisioning and/or programming (request/drop-off/pickup)
- Channel 60 program scheduling, reproduction or studio production (to be scheduled)
- Telephone move, add or change with existing equipment at both locations

Criteria: Level I service commitments are service based, do not require work packages, and should be completed in accordance with Table J5-2.

1. Documented standard Internal Operating Procedure (IOP) to perform.
2. Can be accomplished without dispatch of personnel to the field or with minimum number of service technicians.

Level II Service

Description: Level II service commitments shall not require system/network outages to perform, nor require updates to system equipment configuration files. Examples of Level II service commitments are:

- Additions, moves and changes of customer interfaces or cables

Criteria: Level II service commitments are system service based, require work packages, and should be completed in accordance with Table J5-2.

1. Requires cable installation work in supported facilities
2. Requires Bill of Materials and/or equipment from ready reserve
3. Requires documentation updates to interface or cable drawings
4. No impact to system/network availability or performance
5. Audio installation in existing facilities or mobile radio installation

Level III Service

Description: Level III service commitments require engineering work packages and updates to system equipment configuration files.

Examples are:

- Service to new facility or area
- Expansion of existing infrastructure

Criteria: Level III service commitments are system service based, require engineering work packages, and should be completed in accordance with Table J5-2 provided there is no dependency on outside service organization (i.e.: electrical, external communication circuits, etc).

Level IV Service

Description: Level IV service commitments require engineering work package for relocation of existing communication services for completion by the agreed upon user need date. Level IV service commitments include but are not limited:

- Relocation of existing communications services

Criteria: Level IV requires engineering work package for relocation of existing communication services. Level IV service requires coordination with and dependency upon other KSC contractors to complete the prescribed work.

1. Project coordinated through official KSC Major Move Committee and Program Projects
2. Requires deployment or reconfiguration of existing system infrastructure
3. Requires updates or modification to premises wiring or cable plant
4. Requires documentation updates

The following table describes the metrics that will be used for determining award fee.

System	Availability Standard of Excellence (1)	Availability Expectation (1)	Trouble Resolution Standard of Excellence (1)	Trouble Resolution Expectation (1)	Adds/Moves/ & Changes Criteria: I, II, III & IV Standard of Excellence (1)	Adds/Moves/ & Changes Criteria: I, II, III &IV Expectation (1)	Customer Satisfaction Standard of Excellence (1)	Customer Satisfaction Expectation (1)
Voice Communications	99.9%	99%	95% 10 Work Hrs	90% 10 Work Hrs	95%	90%	90%	85%
Video & Visual Imaging	99.9%	99%					90%	85%

Note 1: In all cases the level of service shall not impact safety, mission success or major program/ project milestone.

Table J5-1: KICS Service Metrics

Type	System	Service	Time to Implement
Voice	OIS-D	Install or relocate OIS-D unit in facility that currently has OIS-D capability	14 calendar days
Voice	OIS-D	Install or relocate speaker on an installed OIS-D unit	14 calendar days
Voice	Paging and Area Warning	Install or relocate Paging speaker in facility that currently has paging capability	14 calendar days
Voice	VDMS	Establish data circuit	14 calendar days
Video	BCDS	Normal service connection adds, moves and deletes in facility that currently has BCDS capability	14 calendar days for requests less than 20 drops. 28 calendar days otherwise
Cable	Telecomm	Add, move or delete telephone circuit	14 calendar days for requests less than 20 drops. 28 calendar days otherwise
Cable	Telecomm	Add, move or delete routine circuit	28 calendar days
Cable	Telecomm	Add, move or delete non-routine circuit	35 calendar days
Transmission	Transmission (Non-ATM)	Establish new circuit	35 calendar days
Transmission	ATM	Establish new circuit	14 calendar days
Networks	Networks	Activate CFP in wired facility	24 hours
Networks	Networks	Activate CFP in non-wired facility	14 calendar days for requests less than 20 drops. 28 calendar days otherwise
Networks	Remote Access	Activation of Approved Remote Access Account/Service	3 calendar days – Standard Account
Networks	IP address	Obtain ID and allocation of new IP addresses	2 hours
Security	Perimeter Security	Activation of Approved Perimeter Access Control Change Request	7 calendars days – Standard Request

Table J5-2: Communication Standard Service Delivery Standards

Type	System	Service	Time to Implement
Security	Perimeter Security	Activation of Approved Perimeter Access Control Change Request	2 Working Days – Priority Request (NTE 10% of total requests)
Security	Perimeter Security	Activation of Approved Perimeter Access Control Change Request	4 Working Hours– Priority Expedite Request (NTE 2% of total requests)

Table J5-2: Communication Standard Service Delivery Standards (continued)

J-5
Surveillance Plan

For

Kennedy Space Center Integrated Communications Services (KICS)

1.0 INTRODUCTION

1.1 Background: This Surveillance Plan for the KICS has been developed to describe the government's general plan in providing effective and systematic surveillance and reporting of all aspects of KICS contract performance. This plan recognizes the responsibility of the contractor to carry out its own quality control obligations in the performance of this contract. Surveillance will be accomplished via insight and oversight into the contractor's performance against requirements listed in the Performance Work Statement (PWS) and performance standards listed in this plan. In addition to meeting the PWS requirements, the contractor is responsible for providing services that meet or exceed the following overarching KICS contract objectives.

- Providing safety, health, and environmental stewardship
- Providing quality communication systems with no impacts to operational activities
- Providing flexible communication resources to meet customer requirements
- Providing personnel and processes that are timely and responsive to customer needs
- Providing expertise in communication systems
- Modernizing KSC communication systems infrastructure
- Delivering communication services within contract value
- Providing state of the art technology in communication systems
- Beginning and finishing projects on schedule and within budget
- Providing communications infrastructure stewardship
- Managing costs, including labor rates and indirect cost growth

The contractor's degree of success in achieving these objectives will be measured as indicators of contractor performance and will be the foundation of the award fee evaluation.

1.2 Responsibilities: Responsibilities for each entity involved in KICS surveillance and performance evaluation are described below.

1.2.1 The KICS Contracting Officer (CO) is responsible for contract management and ensuring compliance with the terms of the contract.

1.2.2 The primary function of the Contracting Officer's Technical Representative (COTR) is to serve as the technical liaison between the contractor and the CO. The COTR is responsible for monitoring the contractor's performance and delivery of the final product and/or services under the contract. The COTR is responsible for assimilating performance surveillance data summaries into a performance/ award fee report and presenting to the Award Fee Board (AFB) including the Fee Determining Official (FDO).

1.2.3 The CO/COTR will maintain insight into the KICS contractor performance using performance monitors and specific metrics for their area of responsibility. The COTR

provides centralized direction to the various performance monitors, initiates the call for input from performance monitors, consolidates all findings into a performance assessment, and presents the findings/assessments to the CO, AFB, and FDO.

1.3 Documentation: The contractor provides contract assessment reports and contract deliverables to the government. The government will integrate the surveillance data and prepare a variety of reports and presentations.

2.0 SURVEILLANCE METHODOLOGY

Surveillance will be accomplished through continual monitoring and verification of contract performance. Surveillance can be performed using an insight, oversight (first-time, high risk and out-of-family operations) or a combination mode as determined by the government using a risk-based decision process. There are a variety of surveillance tools including, but not limited to: customer feedback, management information systems, audits/checklists, metrics, sampling, observation, inspection, review, and analysis.

2.1 Surveillance Tools: The following is a description of the surveillance tools that may be used by the government. This list of tools is not exhaustive. If it becomes evident that additional tools are necessary and available, they may be added to the list. It is anticipated that the type of surveillance method utilized will be based on relative risk of the technical area. For example, the more critical the area, the more intrusive the method of surveillance. However, the government can use any of these tools at any time for any of the technical areas.

2.1.1 Customer feedback is a reactive tool based on input from the customers with the primary purpose to provide performance feedback to the government. This tool may be used as an indicator to increase government surveillance through use of different surveillance tools. Customer feedback will generally not be the only tool used for critical processes and activities.

2.1.2 Management Information Systems (MIS) provide proactive insight into contractor performance through assessment of contractor or government generated data. The data and output of the MIS will be validated as necessary by the government to assure that it is factual and accurately reflects the contractor's performance.

2.1.3 Audits/Checklists are used to conduct surveys and perform audits to gather inputs to determine whether or not a service is being provided in accordance with contract requirements. Survey checklists are used to gather subjective inputs to determine whether or not a service was adequately provided. Surveys collect personal judgments and may not necessarily reflect the quality of the service. Audit checklists are used to collect findings of fact related to contract requirements.

2.1.4 Metrics are performance indicators provided by the contractor or generated by the government. The metrics proposed by the Offerors shall be reviewed, refined and agreed

to by the government using a combined KICS/IT&C Integrated Product Team (IPT). The IPT shall review proposed or existing metrics, create new metrics or other performance indicators, develop additional contract monitoring surveillance methods to effectively monitor financial, technical, schedule, security or other aspects of the KICS activities. The IPT review and final government approval shall be completed within 9 months of contract award. The metrics will be periodically evaluated for appropriateness and effectiveness throughout contract duration. In most cases, the contractor will generate the data in order to manage their processes.

2.1.5 Sampling is a quantitative approach that involves statistically based random checks of the contractor's data or work performance. The purpose of these random checks is to validate that data is factual and that work performance meets contract or contractor-specified requirements.

2.1.6 In-depth observation entails directly observing the contractor during performance of work. This tool may be used where work involves tasks which present high risk to program assets; however, use of the tool is not limited to such critical activities. This surveillance method does not represent a constraint to the contractor's authority to proceed or perform work. In-depth observation allows the government to have real-time insight into contractor performance.

2.1.7 Inspection is an in-line function in which the government reviews and approves a specific contractor product or service. Inspection indicates approval and acceptance of a contractor requirement by the government and may present a constraint to the contractor's authority to proceed or perform work. The government may choose to use this surveillance technique due to high risk to program assets and a need to assure that performance is demonstrated.

2.1.8 Review of all processes, design documentation, and integration plans associated with design, development and integration of information technology products will be considered part of the evaluation criteria. The government will participate in the formal design reviews as part of the evaluation insight.

2.1.9 Analysis of all communication services provided, contractor processes, planning, and project management will be considered part of the evaluation criteria. The government may use this technique to ascertain the level of performance provided by the contractor.

2.2 Assessment: The government conducts continuous assessments of the contractor's performance. Performance assessments include the review of customer feedback and contractor performance data gathered utilizing the tools referenced in Section 2.1 herein. The data is analyzed to determine the level of performance. The validity and accuracy of contractor provided data will be verified by the government either through surveillance of activities or through review of each data element. These assessments ensure receipt of the quantity and kinds of products and services required by the contract and will become inputs for the evaluation of contractor performance. The performance metrics described in

this surveillance plan will become the first official set of performance metrics. Performance metrics will be aligned with the objectives identified in Section 1.1 herein. Award Fee metrics will be reviewed and modified as required through partnering. Partnering will continue throughout the life of the contract to ensure that Award Fee metrics remain valid and relevant to government priorities and contractor performance.

2.3 Evaluation: The COTR, in conjunction with the CO, is responsible for summarizing the contractor's performance utilizing the surveillance inputs to assess and report the level of contractor performance in meeting the KICS objectives. All data gathered as part of this surveillance process using the methods described will be considered in the evaluation. This data will also be used as part of the Award Fee evaluation.

PERFORMANCE STANDARDS SUMMARY

The following summarizes examples of performance standards for specific PWS tasks. Additional metrics based upon areas of emphasis and specific task orders will be included as performance metrics. Lack of inclusion in Table J5-1 in no way relieves the contractor of the obligation to perform all mission support elements and delineated tasks. Examples provided below are representative of performance criteria that will be incorporated into the final government performance surveillance plan. The actual criteria incorporated into the contract will be determined by the government and may include the methodologies, approaches, and levels of expected performance as proposed by the offeror.

The following is a description of the service level metrics that will be used as part of the surveillance metrics.

Level I Service

Description: Level I service commitments do not require work packages. Examples include but are not limited to the items below:

- DNS registration or IP address assignment
- Port status changes (enable/disable, speed, duplex)
- Mission support re-patching in communication rooms
- Radio provisioning and/or programming (request/drop-off/pickup)
- Channel 60 program scheduling, reproduction or studio production (to be scheduled)
- Telephone move, add or change with existing equipment at both locations

Criteria: Level I service commitments are service based, do not require work packages, and should be completed in accordance with Table J5-2.

1. Documented standard Internal Operating Procedure (IOP) to perform.
2. Can be accomplished without dispatch of personnel to the field or with minimum number of service technicians.

Level II Service

Description: Level II service commitments shall not require system/network outages to perform, nor require updates to system equipment configuration files. Examples of Level II service commitments are:

- Additions, moves and changes of customer interfaces or cables

Criteria: Level II service commitments are system service based, require work packages, and should be completed in accordance with Table J5-2.

1. Requires cable installation work in supported facilities
2. Requires Bill of Materials and/or equipment from ready reserve
3. Requires documentation updates to interface or cable drawings
4. No impact to system/network availability or performance
5. Audio installation in existing facilities or mobile radio installation

Level III Service

Description: Level III service commitments require engineering work packages and updates to system equipment configuration files.

Examples are:

- Service to new facility or area
- Expansion of existing infrastructure

Criteria: Level III service commitments are system service based, require engineering work packages, and should be completed in accordance with Table J5-2 provided there is no dependency on outside service organization (i.e.: electrical, external communication circuits, etc).

Level IV Service

Description: Level IV service commitments require engineering work package for relocation of existing communication services for completion by the agreed upon user need date. Level IV service commitments include but are not limited:

- Relocation of existing communications services

Criteria: Level IV requires engineering work package for relocation of existing communication services. Level IV service requires coordination with and dependency upon other KSC contractors to complete the prescribed work.

1. Project coordinated through official KSC Major Move Committee and Program Projects
2. Requires deployment or reconfiguration of existing system infrastructure
3. Requires updates or modification to premises wiring or cable plant
4. Requires documentation updates

The following table describes the metrics that will be used for determining award fee.

System	Availability Standard of Excellence (1)	Availability Expectation (1)	Trouble Resolution Standard of Excellence (1)	Trouble Resolution Expectation (1)	Adds/Moves/ & Changes Criteria: I, II, III & IV Standard of Excellence (1)	Adds/Moves/ & Changes Criteria: I, II, III &IV Expectation (1)	Customer Satisfaction Standard of Excellence (1)	Customer Satisfaction Expectation (1)
Voice Communications	99.9%	99%	95% 10 Work Hrs	90% 10 Work Hrs	95%	90%	90%	85%

J-7
Contract Security Classification Specifications (DD254)

For

Kennedy Space Center Integrated Communications Services (KICS)

DEPARTMENT OF DEFENSE
CONTRACT SECURITY CLASSIFICATION SPECIFICATION

(The requirements of the DoD Industrial Security Manual apply to all aspects of this effort)

1. CLEARANCE AND SAFEGUARDING
a. FACILITY CLEARANCE REQUIRED: Secret
b. LEVEL OF SAFEGUARDING REQUIRED: None

2. THIS SPECIFICATION IS FOR: *(X and complete as applicable)*

☐	a. PRIME CONTRACT NUMBER		
☐	b. SUBCONTRACT NUMBER		
☒	c. SOLICITATION OR OTHER NUMBER: RFP 03-HAW-001	Due Date (YYMMDD): 030527	

3. THIS SPECIFICATION IS: *(X and complete as applicable)*

☐	a. ORIGINAL *(Complete date in all cases)*		Date (YYMMDD)
☐	b. REVISED *(Supersedes all previous specs)*	Revision No.	Date (YYMMDD)
☐	c. FINAL *(Complete Item 5 in all cases)*		Date (YYMMDD)

4. IS THIS A FOLLOW-ON CONTRACT? ☐ YES ☒ NO. If Yes complete the following

Classified material received or generated under _____ *(Preceding Contract Number)* is transferred to this follow-on contract

5. IS THIS A FINAL DD FORM 254? ☐ YES ☒ NO. If Yes complete the following

In response to the contractor's request dated _____, retention of the identified classified material is authorized for the period of _____.

6. CONTRACTOR *(Include Commercial and Government Entity (CAGE) Code)*

a. NAME, ADDRESS, AND ZIP CODE	b. CAGE CODE	c. COGNIZANT SECURITY OFFICE *(Name, Address, and Zip Code)*

7. SUBCONTRACTOR

a. NAME, ADDRESS, AND ZIP CODE	b. CAGE CODE	c. COGNIZANT SECURITY OFFICES *(Name, Address, and Zip Code)*

8. ACTUAL PERFORMANCE

a. LOCATION	b. CAGE CODE	c. COGNIZANT SECURITY OFFICE *(Name, Address, and Zip Code)*

9. GENERAL IDENTIFICATION OF THIS PROCUREMENT

Provide communication services at KSC/CCAFS to Shuttle, International Space Station, Launch Services Program Office payloads and center-wide business enterprises.

10. THIS CONTRACT WILL REQUIRE ACCESS TO:	YES	NO	11. IN PERFORMING THIS CONTRACT, THE CONTRACTOR WILL:	YES	NO
a. COMMUNICATIONS SECURITY (COMSEC) INFORMATION	☐	☒	a. HAVE ACCESS TO CLASSIFIED INFORMATION ONLY AT ANOTHER CONTRACTOR'S FACILITY OR A GOVERNMENT ACTIVITY	☒	☐
b. RESTRICTED DATA	☐	☒	b. RECEIVE CLASSIFIED DOCUMENTS ONLY	☐	☒
c. CRITICAL NUCLEAR WEAPON DESIGN INFORMATION	☐	☒	c. RECEIVE AND GENERATE CLASSIFIED MATERIAL	☐	☒
d. FORMERLY RESTRICTED DATA:	☐	☒	d. FABRICATE, MODIFY, OR STORE CLASSIFIED HARDWARE	☐	☒
e. INTELLIGENCE INFORMATION:			e. PERFORM SERVICES ONLY	☐	☒
(1) Sensitive Compartmented Information (SCI)	☐	☒	f. HAVE ACCESS TO U.S. CLASSIFIED INFORMATION OUTSIDE THE U.S., PUERTO RICO, U.S. POSSESSIONS AND TRUST TERRITORIES	☐	☒

12. PUBLIC RELEASE. Any information *(classified or unclassified)* pertaining to this contract shall not be released for public dissemination except as provided by the Industrial Security Manual or unless it has been approved for public release by appropriate U.S. Government authority. Proposed public release shall be submitted for approval prior to release

☐ Direct ☒ Through *(Specify)*:

John F. Kennedy Space Center
Attn: XA-A
Kennedy Space Center, FL 32899

to the Directorate for Freedom of Information and Security Review, Office of the Assistant Secretary of Defense (Public Affairs)* for review.
*In the case of non-DoD User Agencies, requests for disclosure shall be submitted to that agency.

13. SECURITY GUIDANCE. The security classification guidance needed for this effort is identified below. If any difficulty is encountered in applying this guidance or if any other contributing factor indicates a need for changes in this guidance, the contractor is authorized and encouraged to provide recommended changes: to challenge the guidance or classification assigned to any information or material furnished or generated under this contract; and to submit any questions for interpretation of this guidance to the official identified below. Pending final decision, the information involved shall be handled and protected at the highest level of classification assigned or recommended. *(Fill in as appropriate for the classified effort. Attach, or forward under separate correspondence, any document/guides/extracts referenced herein. Add additional pages as needed to provide complete guidance.*

The STS Security Classification Guide, current and subsequent versions, shall be part of this contract. Guide will be provided under separate cover.

Additional classification guidance will be provided as required under separate cover.

14. ADDITIONAL SECURITY REQUIREMENTS. Requirements, in addition to ISM requirements, are established for this contract. *(If Yes, identify the pertinent contractual clauses in the contract document itself, or provide an appropriate statement which identifies the additional requirements. Provide a copy of the requirements to the cognizant security office. Use Item 13 if additional space is needed.)* ☒ Yes ☐ No

As a long term visitor to NASA/KSC the contractor will comply with all applicable security issuances.

15. INSPECTIONS. Elements of this contract are outside the inspection responsibility of the cognizant security office. *(If Yes, explain and identify specific areas or elements carved out and the activity responsible for inspections. Use Item 13 if additional space is needed.* ☒ Yes ☐ No

Inspection conizance of activities at the Kennedy Space Center is the responsibility of NASA/KSC Protective Services Branch.

16. CERTIFICATION AND SIGNATURE. Security requirements stated herein are complete and adequate for safeguarding the classified information to be released or generated under this classified effort. All questions shall be referred to the official named below.

a. TYPED NAME OF CERTIFYING OFFICIAL	b. TITLE	c. TELEPHONE *(Include Area Code)*
